

Milestones Testing Brief

Cobb Middle Schools: 2016–2017

Georgia Milestones End-of-Grade (EOG) Assessments were given in the 2015–2016 school year for the second year time. EOG assessments are given in grades 3 to 8 in English Language Arts and Math. EOG assessments are also given in Science, and Social Studies in grades 5 and 8. Some students take the high school courses Algebra 1 and/or Physical Science in 8th grade. In 2017, these students took the End-of-Course (EOC) assessment instead of the EOG assessment.

Achievement Levels on the Georgia Milestones EOG and EOC Assessments

Student performance on the EOG Assessments is divided into one of four achievement levels: (1) Beginning Learner, (2) Developing Learner, (3) Proficient Learner, or (4) Distinguished Learner.

Beginning Learners These students did not demonstrate proficiency.

Developing Learners These students demonstrated partial proficiency.

Proficient Learners These students demonstrated proficiency.

Distinguished Learners These students demonstrated advanced proficiency

Percent proficient is the percentage of students scoring in the top two achievement levels. The Georgia DOE considers the percent proficient to correspond to those students who are ready to progress to the next grade in that test subject.

Data Provided in this Testing Brief

The summary statistics of assessment results presented in this document are from EOG assessments taken during the Spring administration of the Georgia Milestones and all EOC assessments taken during the 2016–2017 school year. All summary statistics for the district presented in this testing brief were calculated from individual student test scores provided in the final data file from the Georgia DOE. In the following tables, groupings that contained fewer than 15 students were excluded to protect privacy.

The following tables include district- and school-level summaries of the performance of Cobb students on the Georgia Milestones EOG and EOC assessments. Comparisons are made to the state-level summaries where available.

Historical trends are shown for most test metrics from 2015 to 2017 in the following tables. The 1-year trend is calculated by subtracting the 2016 test metric from the 2017 value. Likewise, the 2-year trend is calculated by subtracting the 2015 test metric from the 2017 value.

For the historical EOC results in math, the EOC results presented for 2015 are from Coordinate Algebra; whereas, for 2016 and 2017 the results are from Algebra 1.

If this document is viewed online, the titles in the list of tables are hyperlinked so that clicking on a table title will take you to that table. A hyperlink is also provided in the upper-right-hand corner of each page that will return you to the list of tables.

The two-year trend for math and science in grade 8 is skewed because all grade 8 students took the EOG for those subjects in 2015; whereas, in 2017 those students taking a high school course in middle school did not take the EOG.

The 1-year trend is calculated by subtracting the 2016 value from the 2017 value. Likewise the 2-year trend is calculated by subtracting the 2015 value from the 2017 value.

In 2015, many students took both the EOG and EOC; whereas, in later years students in a high school course only took the EOC. To insure that each student was included only once, the scores from 2015 only include the EOG for each 8th grade student. This issue only affects the 2-year trend calculations in the table above.

The 1-year trend is calculated by subtracting the 2016 value from the 2017 value. Likewise the 2-year trend is calculated by subtracting the 2015 value from the 2017 value.
