Purpose and Goal:

The District believes family and community engagement is critical to student and district success. The establishment of Principal Advisory Councils (Councils) is intended to provide a means by which parents, community members, and school staff can work together to create a better understanding of and mutual respect for each other's concerns and share ideas for school improvement.

A Council functions as an advisory board, offering input to the local school principal on matters relating to student achievement and school improvement. The principal may seek input from the Council on a variety of topics which may include, but are not limited to, student achievement goals, student attendance, school improvement plans, curriculum, school budget priorities, communications strategies, school-based and community services, community use of school facilities, and early intervention services.
