Scheduling Clerk	Ms. Kristin Fox
Records Room	Ms. Melissa Schrenk
College & Career Center	Dr. Rebecca England

Academic Program

Walton High School operates on a two-semester system with each semester being approximately 18 weeks long. Credit is established in units; each course meets every day for approximately 50 minutes and carries one-half unit credit upon successful completion. It is possible to earn three units of credit per semester, or a total of six units per year if all classes are successfully completed. During the 4 years (8 semesters) of high school, students may earn a total of 24 units of credit. Students may earn additional credit by taking a paid morning tuition class (1 per semester). Classes are offered based on minimum enrollment to support the program. Walton will accept one additional credit per semester from tuition-based Cobb Virtual Academy or Georgia Virtual School for upperclassmen. Ninth grade students can only take 7 courses in any combination of zero period or online to earn 3.5 units of credit per semester. While online classes are completely independent of Walton High School and all academic responsibility is between the family and that school, students must receive permission from Walton High School to take the online course.

The variety of course offerings in each department will give students the necessary prerequisites for future activities, whether they include college, technical school, or work. Some courses have prerequisites. A prerequisite is a course that must be taken before another course. Some courses are sequential and must be taken in order. World Language and Mathematics are courses that are sequential in nature. Students should begin thinking and planning for future goals early in high school to be well prepared upon graduation. Students enrolled in an EOC course (Algebra, Biology, US History, and Literature & Composition II) must pass the course in which a Georgia Milestones End of Course Assessment is given and comprises 10% of the overall grade, as well as all necessary courses for graduation.

Advisement Program

The focus and intent of advisement is to create a communication bond between the school, student, and parents. It is an organized method for developing, with the input of three parties, an academic plan for students. Ninth grade students will receive advisement during spring semester to complete a four-year academic plan. Eleventh grade students will receive advisement in the fall to assess progress toward graduation and post-secondary goals. Scheduled meeting times for students and parents will be planned during the regular school day.

Athletic Eligibility

The Georgia High School Athletic Association requires the following accumulation of Carnegie units toward graduation according to the following criteria:

1. First-year students are eligible first semester. They must earn 2.5 units at the end of first semester to be eligible for the spring semester.
2. Second-year students must have accumulated 5 total units in the first year and have earned 2.5 units the previous semester.
3. Third-year students must have accumulated 11 total units in both years and have earned 2.5 units the previous semester.
4. Fourth-year students must have accumulated 17 total units in all three years and have earned 2.5 units the previous semester.

Grades/Grading Scale

The Cobb County School District has set the following grading scale:

A = 90-100 B = 80-89 C = 74-79 D = 70-73 F = Below 70

A student's grade point average is based on quality points awarded for each grade earned. All regular courses earn the following:

A = 4 quality points B = 3 quality points C = 2 quality points D = 1 quality point F = 0 quality points

Honors courses receive an extra 0.5 quality point. Honors courses are designated in the course section of the booklet with two asterisks (**). Advanced Placement courses are awarded an extra 1.0 quality point. These courses are designated with three asterisks (***). No extra quality points are earned if the student fails the course. Students are recommended by their current teacher for Honors and Advanced Placement courses based on the student's performance in the current course. Course placement is based on criteria set by each department.

Graduation Requirements

The State Board of Education has one common set of high school graduation requirements. Fulfillment of these graduation requirements will earn a student a high school diploma. Georgia's Board of Regents establishes the admissions requirements for Georgia's colleges and universities. Students should check the admission requirements of the college they wish to attend. Students must pass the course in which a Georgia Milestone End of Course Exam is given which comprises 10% of the overall course grade. Each student is encouraged to complete either an Academic, Fine Arts, CTAE or World Languages pathway.

Subject	Required Credits	Diploma Requirement
English	4	Must include Literature and Composition I and Literature and Composition II
Mathematics	4	Must include Algebra, Geometry and Advanced Algebra, or their equivalencies
Science	4	Must include Physical Science/Physics; Biology; Chemistry or Environmental Science or an AP Science; and 1 additional unit of science.
Social Studies	3	Must include World History, United States History, American Government, and Economics
Health and PE	1	Health and Personal Fitness (0.5 credit each)
Required Electives	3	From Career Tech, World Language, and/or Fine Arts
Additional Electives	4	
Total	23	Minimum required credits

Pathway Completion

Starting with the class of 2017, each student is encouraged to complete either an Advanced Academic, Fine Arts, CTAE, or World Languages pathway.

Advanced Academic Pathway: An Advanced Academic Pathway may be followed in any of the following content areas: English, mathematics, science or social studies. Students complete an Advanced Academic Pathway when they have completed the required courses for graduation and one of the courses listed in the student's course history is either AP, IB, or dual enrollment. Additionally, students must earn credits in two sequential courses in one world language.

Fine Arts Pathway: Students complete a Fine Arts pathway when they have completed three courses in either Visual Arts, Band, Chorus, Orchestra, or Journalism/Yearbook.

World Language Pathway: Students complete a World Language Pathway when they have completed three courses in the same World Language.

CTAE Pathway: Students earn a CTAE Pathway when they complete a series of three or four specific courses in a CTAE-approved pathway. Walton High School offers complete pathways in the following areas: Financial Marketing Services Career Pathway, Computing Career Pathway, Therapeutic Services-Physical Medicine Career, Graphic Design Career Pathway, Broadcast/Video Production Career Pathway, and Engineering and Technology Concentration Pathway. Students may complete the JROTC Air Force Career Pathway by taking courses at Wheeler High School. Those interested in this pathway can contact the school counseling department.

School Counseling

School counselors are available to meet with students regarding academic, personal/social, or career development needs. Students should make appointments to see a school counselor either before school, after school or during their lunch periods. To see a counselor during a class period, students should request permission from their teacher and obtain a hall pass. [Walton School Counseling](#) | [Walton High School Counseling](#) | [Marietta](#)

Honor Roll

Students who earn a semester GPA of 3.5 or higher and have no grades lower than a 74 will be placed on the Honor Roll. Students who earn a semester GPA of 4.0 or higher and have no grades lower than an 80 will be placed on the Principals' Honor Roll. Students who earn a 4.0 or higher in each semester of an entire academic school year will be awarded an Academic Letter. Students who do so in a subsequent year will be awarded an Academic Bar.

Promotion Requirements

Per Cobb County School Board Policy, students shall be on track to advance with the graduating class they enter as a ninth grader. The following minimum requirements must be met to advance to the next grade level.

10th grade: 5 units, including one full credit in English, math, and science.

11th grade: 10 units, including two full credits in English, math, and science.

12th grade: 16 total units

Transcripts

TRANSCRIPT REQUEST- A student who wants a copy of her/his transcript sent to a college must sign a request for a transcript to be released. This request form is kept on file in the RECORDS ROOM located in the school counseling office. Transcripts are released for a charge of \$2.00 each. Payments can be made with exact change or a check.

DUAL ENROLLMENT TRANSCRIPT REQUEST- A student who wants a copy of her/his transcript sent to a college must sign a request for a transcript to be released. This request form is kept on file in the RECORDS ROOM located in the school counseling office. Transcripts are released for a charge of \$2.00 each. Payments can be made with exact change or a check.

Post-Secondary Planning

At Walton, approximately 95% of students attend either a two- or four-year college upon graduation. This figure remains steady with each graduating class. All students at Walton are encouraged to take challenging courses that will prepare them for whatever post-secondary school they desire to attend. Colleges appreciate students who demonstrate a willingness to attempt higher level classes, such as AP and Honors. Success in these classes is evidence to admission committees that a student has what it takes to succeed and excel at their institution as well. In addition to the rigorous coursework, essays, extra-curricular involvement, and teacher recommendations, colleges may consider SAT and ACT test scores as a measure of how well a student will do once they are in college.

The College and Career Center at Walton is open to juniors and seniors. There are computers available for students to use to begin the college search process, research programs of study, work on applications and essays, and check the status of their applications. Students may also set up individual appointments to obtain assistance on beginning the college search, choosing colleges, preparing for interviews, and career exploration. In addition to live help, there are also numerous books and publications for student use on all aspects of applying, test taking, and funding for college.

College admissions representatives visit Walton throughout the year. These visits provide a personal touch that may not be available in schools' literature. Representatives inform students about the school's admissions process and deadlines, campus life, housing, majors available, and scholarships. Students can ask questions, and this is often a chance for students to meet the person who will read their application in the future. Juniors and Seniors must register 25 hours in advance and print the email reminder to present to teachers. Students must notify teachers in advance if they need to miss class to attend a college visit. It is up to the teacher to determine if the student can miss the class.

Walton school counselors offer a college panel presentation for juniors and their parents/guardians in the spring each year and host a detailed college application process presentation for parents of seniors in the fall. There is also a Financial Aid Night for parents held in the fall each year to help simplify the financial aid process. A representative from the Georgia Student Finance Commission and a Walton school counselor addresses all aspects of financial aid including the HOPE scholarship, the FAFSA, CSS Profile, loans, and grants.

NCAA Clearing House

Students interested in playing a sport on the collegiate level must register with the National Collegiate Athletic Association (NCAA) before communication and official visitation for recruiting purposes. This registration is usually done during junior year; however, students are encouraged to register earlier. To register go to: www.eligibilitycenter.org. Review the three account options and choose the one that's right for you! You'll only need to create one account with the Eligibility Center. Starting with the free Profile Page is best practice, as you can transition it later to the Certification account needed for your circumstances. Students should request their official transcript in the Records Room. Transcripts are released to NCAA for a charge of \$2.00.

Course Selection Specifics

We try to make the registration process as smooth as possible at Walton High School. One way we do this is by building the master schedule for both teachers and students only after we have received all student requests for courses during registration. The master schedule, therefore, is determined by the student registration and provides the maximum accommodation for the courses desired by Walton students, with a minimum of schedule conflicts.

Since the master schedule is based entirely upon initial student registration, it is essential that students remain in the course for which they have registered, unless it is determined that the academic placement is inappropriate. Students register for the next school year during the February-March registration period; however, during the fall semester, students will have an opportunity to drop/add one semester elective courses for the upcoming spring semester. Year-long courses may not be dropped at the end of first semester.

The following information should be helpful in having a successful registration.

1. For all CORE classes (English, Math, Science, Social Studies and World Language), the current teacher will make recommendations for the level of curriculum the student should take next year. While each teacher will make a recommendation based on the specific core area, it is important to consider the overall course load. If the student and/or parent disagrees with the teacher's recommendation, or has concerns about the academic rigor, a waiver may be completed to request a different placement. **PLEASE NOTE:**
 - Waivers are binding for one complete semester. Once the waiver has been submitted and approved, the class cannot be changed again during that semester.
 - Waivers are due to the school by April 1st for fall semester and November 1st for spring semester and will not be accepted after that date unless the teacher recommendation has changed.
 - Waivers may be obtained online through the student's CTLS homeroom.
2. For elective classes, students will complete registration using a form disseminated through their homeroom. Freshmen will complete elective registration during Freshmen Advisement with the Counseling Department.
3. Registration for a year-long course (classes with an A and B semester) in an academic area, regardless of if a core credit or an elective, may **not** be dropped at the end of first semester. Additionally, the course must be completed at Walton High School.
4. We do not honor teacher-preference requests during scheduling. All 2700+ students have preferences, and it would be impossible to honor the requests of all students.

5. Seniors may not request Minimum Day once the semester has started. Seniors must request minimum day either during registration or during the drop/add time for second semester. All minimum day forms for fall must be turned in by the specified deadline during junior year. Students registered for minimum day normally leave the last period of the day. If a student's lunch period can be scheduled for the period before the last period, they may be allowed to leave school two periods early, with parent permission. However, students should not assume they can leave school two periods early because scheduling may not permit all minimum day students this option. **THERE IS NO GUARANTEE THAT A STUDENT WILL HAVE 6TH PERIOD LUNCH.** Students taking an online course other than Health and Personal Fitness are NOT eligible for Minimum Day.
6. Students approved for an extracurricular early release are still required to take a minimum of 3 total credits. One course may be taken online, but the online course must be an elective course, not an academic course. Specific paperwork is required for extracurricular early release approval, please contact your counselor for additional information.
7. Morning tuition school will be available if there is enough student interest. If you would like to take seven classes rather than six, please email Kristin Fox at Kristin.Fox@cobbk12.org for registration information. The fee for the extra course is \$300 per semester. Cash or check (payable to Walton High School) must accompany your registration and should be brought in person to the counseling suite. Students will be placed in any zero-period course that his or her schedule allows.
8. Registering for zero period, Dual Enrollment, or teacher apprenticeship does **NOT** guarantee a parking space on campus.
9. **CHOOSE YOUR COURSES CAREFULLY.** There are course descriptions for each course in this planning guide. In addition, there is an online Advanced Placement Booklet on the Walton website that will give more detailed information regarding the requirements and demands specific to AP classes. **It is not possible for students to "try out" a course to determine if it is a correct fit.** After the 10th day of the semester, any course dropped will receive a grade of "F" with an average of "10" as the grade on the official transcript per Cobb County School District policy.
10. AP courses taken at Walton High School or through an approved online provider will be given credit, an AP designation and receive the extra 1.0 extra quality point added to the GPA **ONLY if the AP exam is taken and the student takes both semesters of the course if it is a yearlong/1.0 credit course.**
11. Course selections are changed for the following reasons only:
 - If you failed or have not had the prerequisite for the particular course.
 - If you are a senior and need a specific course to graduate.
 - If you have previously received credit for the course.

Included in the list of course offerings are the grade level and course prerequisites. The following notations are used to denote additional weighting for grades earned in Honors and Advanced Placement courses:

**denotes course which receives an additional 0.5 quality point

***denotes course which receives an additional 1.0 quality point

AP Capstone Courses

To earn the AP Capstone Diploma, students must score a 3 or above on both the AP Seminar and AP Research exams as well as a 3 or above on four other AP exams of their choosing.

AP Seminar***

For Grades 11-12

Prerequisites: A prior AP Course is highly encouraged

In AP Seminar students will engage with complex academic and real-world issues, examining them through multiple lenses and considering multiple viewpoints. The topics may change from year to year depending on student and teacher interests, global and civic issues, academic questions, and concepts from other AP courses. Students will evaluate multiple viewpoints through several of the following lenses: cultural and social, artistic and philosophical, political and historical, environmental, scientific, futuristic, and ethical. Through inquiry and investigation, students will develop their own perspectives on complex issues and topics while honing their critical and creative thinking skills. During the course, students will complete a team research project and presentation, an individual research project and presentation, and an end of course exam in which they will analyze, compare and synthesize arguments.

AP Research***

For Grade 12

Prerequisites: AP Seminar; AP Statistics is strongly recommended

AP Research allows students to deeply explore an academic topic, problem or issues of individual interest. Through this exploration, students design, plan and conduct a year-long research-based investigation to address a research question. In the AP Research course, students further their skills acquired in the AP Seminar course by understanding research methodology; employing ethical research practices; and accessing, analyzing, and synthesizing information as they address a research question. Students explore their skill development, document their processes and curate the artifacts of the development of their scholarly work in a portfolio. The course culminates in an academic paper of approximately 4000-5000 words (accompanied by a performance or exhibition of product where applicable) and a presentation with an oral defense.

Career, Technology, & Engineering

A total of three units are required from Career Tech Education, Modern Language, Latin, and/or Fine Arts.

Intro to Business & Tech A & B

For Grades 9 – 12

This course is the first in the Financial Management Services Career Pathway. This course provides an overview of business and technology skills required for today's business environment. Students will learn essentials for working in a business environment, managing a business and owning a business. The intention of this course is to prepare students to be successful both personally and professionally in an information-based society.

Financial Literacy A & B

For Grades 10-12

Prerequisite: Intro to Business & Tech A & B

This is the second course in the Financial Management Services Career Pathway. In this course, students will learn about career decisions, money management and consumer rights and responsibilities.

Banking, Finance & Insurance A & B

For Grades 11-12

Prerequisite: Financial Literacy or Jr/Sr Status

This course is the third course in the Financial Management Services Career Pathway. Using project-based instruction, students are introduced to the basics of the banking system, bank operating procedures, negotiable instruments and the deposit and credit functions of banks. Methods used for measuring the financial performance of banks are analyzed. Current issues and future trends in banking are examined. Students explore the major functions of bank employees by completing a flow-of-work simulation. Students formulate business and individual investment decisions by comparing a variety of investment options. Students analyze annual reports, predict growth rates and chart trend lines.

Work-Based Learning A & B

For Grade 12

Prerequisite: Application required

Work based learning is an opportunity for students who work (paid or unpaid) to earn course credit for applying skills from their coursework. Students must average 5 hours per week and the position must directly relate to a course taken during high school.

Mentorship I & II A & B**For Grades 11-12****Prerequisite: Application required**

The course is for students who would like to assist in an administrative office at Walton. The course is designed to provide the student with skills required for successful performance in an administrative support position. This course will include training and work-based experience in a school office environment.

Intro to Graphics & Design I A&B**For Grades 9-12**

This is the first course in the Graphic Design Career Pathway. This class is designed to provide an overview of the field of Graphic Communications and Design. Students will learn design concepts, computer layout, and production of printed materials which are pervasive in our world. Students will custom make the products using the Adobe Creative Suite 5. Some projects include notepads, mouse pads, business cards, stationery, brochures, post cards, CD covers, invitations, and more. Students are acquainted with career opportunities in the areas of advertising, graphic design, illustration, typesetting, screen printing, digital printing, offset printing, and others. Students will learn basic techniques of photo editing in Adobe Photoshop, drawing and vector art creation using Adobe Illustrator and page layout skills using Adobe InDesign. Many opportunities are available for students to gain local, state and national recognition through their work produced in this and future courses. This course is a PrintEd accredited program in which a student may obtain a national certification upon completing specific competencies.

Graphic Design and Production—Graphics Arts Tech II A & B**For Grades 10-12****Prerequisite: Intro to Graphics & Design I**

This is the second course in the Graphic Design Career Pathway. Topics included in this course are Color Theory, Design Principles, Career Path and opportunities in the Design Profession, Digital File Preparation, Introduction to Output Operations, Bindings and Finishing, Ink & Substrates and Workflow.

Advanced Graphic Design – Graphic Arts Tech III A & B**For Grades 11-12****Prerequisite: Graphic Design & Production**

This is the third course in the Graphic Design Career Pathway. This course enhances level three skills and provides the opportunity for special projects or independent study. Topics included are Portfolio Development, Professional Practices, Employability Preparation and Advanced Problem Solving.

Advanced Graphic Output Processes-Graphic Arts Tech IV A & B**For Grades 11-12****Prerequisite: Adv Graphic Design**

This is the fourth course in the Graphic Communications Pathway. Topics included in this course are Career Development, Production Planning, Production Simulation and Advanced Image Preparation. Students will obtain hands on experience learning multiple output processes including wide format printing, dye sublimation, vinyl cutting for signs, heat transfers and hybrid technologies. Students will print items such as posters, banners, etc.

Broadcast/Video Productions I A & B**For Grades 9-12**

This is the first course in the Broadcast Video/Production Career Pathway preparing the students for employment of entry into a postsecondary education program in this field. Students in Broadcast/Video Productions will discover the ins and outs of how a television show is made. Topics covered include history of mass media, basic field equipment function, shooting and editing video, studio production, production teams, planning, writing and editing a field production, employability skills, storyboarding, career opportunities and professional ethics.

Broadcast/Video Productions II A&B**For Grades 10-12****Prerequisites: BVP I**

This is the second course in the Broadcast Video/Production Career Pathway. Students enhance the skill set established in the first course by participating in the production of a daily live newscast. Topics included in this course are operational set-up and maintenance, audio/video control systems, production graphics, studio camera and teleprompter operation, audio production and professional ethics.

Broadcast/Video Production III A&B**For Grades 11-12****Prerequisite: BVP II**

This is the third course in the Broadcast Video/Production Career Pathway. This course is designed to facilitate student-led broadcasts under the guidance of the instructor. Students work cooperatively and independently in all phases of broadcast/video production. Topics included in this course are planning, writing and directing a studio production,

advanced audio operations, reporting, scriptwriting, technical directing, producing, employability skills and professional ethics.

Broadcast/Video Production IV A&B

For Grades 11-12

Prerequisite: BVP III

This is the fourth course in the Broadcast/Video Production Career Pathway. Students work cooperatively and independently in all phases of broadcast/video production. Advanced technical and leadership roles, like directing, anchoring and producing, are emphasized in the production of the daily newscast. Topics included in this course are advanced camera techniques, advanced editing, employability skills and development of a digital portfolio to include resume, references and production samples.

AP Computer Science Principles A&B***

For Grades 10-12

Prerequisite: concurrently Algebra

Students are introduced to fundamental computer programming concepts, hardware, and interactive programming. Development of a logical problem-solving approach is stressed. Students gain experience in program design and development using Java programming language. The course is the equivalent of a college-level Computer Science Principles course and is preparation for the AP Computer Science Principles exam.

AP Computer Science A&B***

For Grades 10-12

Prerequisite: AP Computer Science Principles

This course emphasizes Java-based objective oriented programming, problem solving, and algorithm development. Development of a logical problem-solving approach is stressed. Students gain experience in designing programs with multiple classes and class hierarchies using the Java programming language. The course is the equivalent of a first semester college-level Computer Science course and is preparation for the AP Computer Science exam.

Computer Science Research – Web Design A&B***

For Grades 12

Prerequisite: AP Computer Science Principles & AP Computer Science

Computer Science Research uses HTML, CSS, and JavaScript to build upon the fundamental concepts learned in AP Computer Science Principles and AP Computer Science A. The course explores the historical and rapidly changing trends in web design. Through programming projects, students will gain the skills and project-based experience needed for entry into web design and development careers. Students will produce a capstone project at the end of the course that demonstrates a superior understanding of the concepts learned throughout the course.

Honors Intro to Engineering Design A&B**

For Grades 9-12

Prerequisite: concurrent with college-prep Algebra or higher.

Introduction to Engineering Design is a year-long honors introductory course based on the Project Lead the Way curriculum. Project Lead the Way is a nation-wide organization that develops curriculum in Engineering and Technology (PLTW.org). The IED course teaches problem-solving skills through the use of the Engineering and Design Process. Topics include the Engineering Design Process, technical sketching, 3-D CAD modeling (Autodesk Fusion), Materials Analysis, measurement, and documentation. Students will create and prototype 3-D models using industry standard CAD software and various manufacturing techniques including 3-D Printers and Laser Cutters. Students will learn how to properly document this entire design process.

Honors Principles of Engineering A&B**

For Grades 10-12

Prerequisite: Intro to Eng. Design & college-prep geometry or higher math.

Principles of Engineering is a year-long honors survey course based on the Project Lead the Way curriculum. This course explores many engineering disciplines including mechanical, electrical, environmental, and computer engineering. Some specific topics explored include mechanisms, electricity, energy, statics, materials, fluids, and control systems. Using activities, projects, and problem-solving techniques, students learn first-hand how engineers and technicians use math, science, and technology in a group-focused engineering problem-solving process to benefit people. Students continue mastery of engineering documentation.

Honors Aerospace Engineering A&B**

For Grades 11-12

Prerequisite: Principles of Engineering & college-prep advanced algebra or teacher approval

Aerospace Engineering is a year-long honors course based on the Project Lead the Way Curriculum. Through hands-on engineering projects developed with NASA, students explore aerodynamics, astronautics, space-life sciences, and systems

engineering. Students use a flight simulator to learn why airplanes fly, build and test airfoils in a wind tunnel, build rockets to learn about astronautics, and build robots to further explore systems engineering.

Honors Digital Electronics A&B**

For Grades 11-12

Prerequisite: Principles of Engineering & college-prep advanced algebra or teacher approval

Digital Electronics is a year-long honors course in the Project Lead the Way Curriculum. This course in applied logic encompasses the application and construction of electronic circuits and devices. Students explore the 1's and 0's behind basic computer logic by using the circuit design process to create truth tables, implement basic logic gates, and use industry standard simulation software to design, test, and build digital circuitry.

Engineering Design & Development A&B

For Grade 12

Prerequisite: STEM Engineering Academy

Engineering Design and Development is a year-long honors capstone course based on the Project Lead the Way curriculum. It is an engineering research course in which students work in teams to design and develop an original solution to a valid open-ended technical problem by applying the engineering design process. The course applies and concurrently develops secondary level knowledge and skills in math, science and technology.

Introduction to Healthcare Science A&B

For Grades 9-12

Introduction to Healthcare Science is a foundations course for the Sports Medicine Pathway. It is appropriate for students wishing to pursue a career in the Healthcare Industry. The course will enable students to receive initial exposure to healthcare skills and attitudes applicable to the healthcare industry. The concepts of health, wellness, and preventative care are evaluated, as well as ethical and legal responsibilities of today's healthcare provider. Fundamental healthcare skills development is initiated including medical terminology, microbiology, and basic life support.

Essentials of Healthcare A & B

For Grades 10-12

Prerequisite: Intro to Healthcare Science A&B

Anatomy and Physiology is a vital part of most healthcare post-secondary education programs. The Essentials of Healthcare is a medical-focused anatomy course addressing the physiology of each body system, along with the investigation of common diseases, disorders and emerging diseases. The prevention of disease and the diagnosis and treatment that might be utilized are addressed, along with medical terminology related to each system. This course provides an opportunity to demonstrate technical skills that enforce the goal of helping students make connections between medical procedures and the pathophysiology of diseases and disorders.

Sports Medicine

For Grades 11-12

Prerequisite: Essentials of Healthcare A&B

Sports Medicine is the third course in the Therapeutic Services/Sports Medicine Career Pathway. The course is appropriate for students who wish to pursue a career in healthcare with a focus on the musculoskeletal system, injury assessment, injury prevention, or rehabilitation including careers in Sports Medicine and Rehabilitative Services. This course will enable students to receive initial exposure to therapeutic services skills and attitudes applicable to the healthcare industry. The concepts of anatomy and physiology, assessment, preventative and rehabilitative care are introduced. Fundamental healthcare skills development is initiated, including medical terminology, kinesiology, patient assessment, record keeping, and basic life support.

Work-based learning (Healthcare)

For Grade 12

Prerequisite: Sports Medicine A&B

Work-based Learning placement represents the pinnacle of the Therapeutic Services/Sport Medicine Career Pathway. The job placement must be directly related to the curriculum of the pathway. Students interested in the course must get approval from the pathway director and have plans of placement options before the beginning of the semester.

Other Courses

JROTC (At Wheeler High School)

For Grades 9-12

Air Force Junior Reserve Officers' Training Corps (AFJROTC) is one of the largest youth development programs in the country with a mission to develop citizens of character. This program, which spans from two to four years, is available to high school students in grades 9-12. It offers a flexible, blended curriculum that allows students to join at any point during their high school journey and has been part of Cobb County since 1970.

AFJROTC aims to educate and train high school cadets in citizenship, promote community service, instill responsibility, build character, and develop self-discipline, all while providing instruction in air and space fundamentals.

THERE IS ABSOLUTELY NO MILITARY OBLIGATION ASSOCIATED WITH TAKING HIGH SCHOOL AIR FORCE JUNIOR ROTC AND NO UNIFORM REQUIREMENT FOR FIRST YEAR STUDENTS.

The curriculum includes Aerospace Science (AS), Leadership Education (LE), and Wellness components, and it serves students from both Wheeler and Walton High Schools.

Students who successfully complete the AFJROTC course will receive academic credit applicable towards graduation requirements. Depending on the course level (AS 100-400), students will learn various life skills, such as understanding the impact of weather, career selection, project management, training in chosen career fields, college admission and financing, and American civics. Additionally, students will enhance their leadership and management skills through the study and practice of responsibility and teamwork, learn orderliness and precision through drill and ceremonies, and understand the role of public service in American society.

Note: *3 units of AFJROTC will waive the Health and Personal Fitness graduation requirements and *1 course AS 200: Science of Flight will count as a 4th science elective. Click here to learn more: [WHEELER / WALTON JROTC Unit GA-052 \(wheelerwaltonjrotc.com\)](http://WHEELER / WALTON JROTC Unit GA-052 (wheelerwaltonjrotc.com))

English

All students must earn 4 units of English to satisfy graduation requirements. Each course is designed for increasing complexity so that students will build on their learning each year. Georgia's K-12 English Language Arts (ELA) Standards are incorporated in the rigorous curriculum developed at Walton High School. The comprehensive Sadlier vocabulary series is utilized to prepare students for the PSAT and SAT/ACT. All students are required to complete summer readings and assignments.

Literature & Composition I A & B Honors**

For Grade 9

Prerequisites: Teacher recommendation

This honors-level class prepares able and ambitious readers and writers for AP and/or honors level English courses. Literature & Composition I is the first course in the sequence of secondary English language arts courses required for graduation. This course develops the integrated skill set that comprises the English language arts discipline to ensure that students are on track to be college ready. Literature & Composition I focuses on the interpretation, evaluation, construction, and design of texts across genres and modes in a variety of real-world, academic, and disciplinary contexts while sustaining and building mastery of language applications and discipline-specific practices. Students will read at least 7 parallel and/or teacher-directed longer pieces of literary merit over the year (including summer reading).

Literature & Composition I A & B

For Grade 9

Literature & Composition I is the first course in the sequence of secondary English language arts courses required for graduation. This course develops the integrated skill set that comprises the English language arts discipline to ensure that students are on track to be college and work ready. Literature & Composition I focuses on the interpretation, evaluation, construction, and design of texts across genres and modes in a variety of real-world, academic, and disciplinary contexts while sustaining and building mastery of language applications and discipline-specific practices. Students will read at least 6 parallel and teacher-directed longer pieces of literary merit over a year (including summer reading).

Literature & Composition I ELL A & B

For Grade 9

Prerequisites: Identified ELL

This course contains the same curricular objectives as Lit & Comp I. Adaptation in presentation is made to accommodate the needs of ELL students. This course is designed for the college-bound student.

AP Language/Lit & Comp II A & B***

For Grade 10

Prerequisites: 1 unit of Lit & Comp I & teacher recommendation

The AP Language & Composition course is designed to build upon the writing and analysis skills learned in Honors Literature & Composition II. The focus of the course is rhetoric, writing, historical and contemporary fiction, and non-

fiction. Students are trained to understand writer's choices in diction, syntax, and tone and to write in a wide variety of forms, including narrative, expository, and argumentative subjects ranging from personal experience to political analysis, and from imaginative literature to popular culture. This course fulfills the graduation requirement for Literature & Composition II. Students will take the AP Language exam and the Georgia Milestones EOC at the end of the course.

Literature & Composition II A & B Honors**

For Grade 10

Prerequisites: 1 unit of Lit & Comp I & teacher recommendation

This honors-level class prepares able and ambitious readers and writers for an AP or honors level track throughout high school English. Literature & Composition II is the second course in the sequence of secondary English language arts courses required for graduation. This course develops the integrated skill set that comprises the English language arts discipline to ensure that students are on track to be college ready. Literature & Composition II focuses on the interpretation, evaluation, construction, and design of texts across genres and modes in a variety of real-world, academic, and disciplinary contexts while sustaining and building mastery of language applications and discipline-specific practices. Students will read at least 7 parallel and teacher-directed longer pieces of literary merit over the year (including summer reading). Students will take the Georgia Milestones EOC at the end of the course.

Literature & Composition II A & B

For Grade 10

Prerequisites: ½ unit of Lit & Comp I

Literature & Composition II is the second course in the sequence of secondary English language arts courses required for graduation. This course develops the integrated skill set that comprises the English language arts discipline to ensure that students are on track to be college and work ready. Literature & Composition II focuses on the interpretation, evaluation, construction, and design of texts across genres and modes in a variety of real-world, academic, and disciplinary contexts while sustaining and building mastery of language applications and discipline-specific practices. Students will read at least 6 parallel and teacher-directed longer pieces of literary merit over the year (including summer reading). Students will take the Georgia Milestones EOC at the end of the course.

Literature & Composition II 103 A & B (No waivers)

For Grade 10

Prerequisites: ½ unit of Lit & Comp I

This course includes the same topics of study included in Literature & Composition II but places more emphasis on fundamental reading and writing. Literature & Composition II is the second course (required) in the sequence of secondary English language arts courses required for graduation. This course develops the integrated skill set that comprises the English language arts discipline to ensure that students are on track to be college and work ready. Literature & Composition II focuses on the interpretation, evaluation, construction, and design of texts across genres and modes in a variety of real-world, academic, and disciplinary contexts while sustaining and building mastery of language applications and discipline-specific practices. Students will read at 4-6 parallel and teacher-directed longer pieces of literary merit over the year (including summer reading). Students will take the Georgia Milestones EOC at the end of the course.

Literature & Composition ELL II A & B

For Grade 10

Prerequisites: Identified ELL & ½ unit of English credit

This course contains the same curricular objectives for Literature & Composition II. Adaptation in presentation is made to accommodate the needs of ELL students. This course is designed for college-bound students. Students will take the Georgia Milestones EOC at the end of the course.

AP Language ***

For Grade 11

Prerequisites: 1 unit of Lit & Comp I, 1 unit Lit & Comp II & Teacher rec

AP Language is designed for high-achieving students who are willing to read and write extensively. AP Language differs from AP Literature in its focus on prose writing, historical and contemporary fiction and nonfiction. In addition, students are trained to understand a writer's choice in diction, syntax, and tone. Students are also asked to write in a wide variety of forms, including narrative, expository, and argumentative. Students also take on various subjects, from personal experience to political analysis, from imaginative literature to popular culture. This course conforms to the College Board recommendations; a syllabus has been approved and is on file with College Board.

Literature & Composition III (LA) A & B Honors**

For Grade 11

Prerequisites: AP Language/Literature & Composition II A & B

The Honors American Literature (LA) course is designed to build upon writing analysis skills learned in AP Language. Literature & Composition III is the third course in the standard pathway of secondary English language arts courses. This course develops the integrated skill set that comprises the English language arts discipline to ensure that students are on track to be college ready. Literature & Composition III provides a platform for the wide interpretation, evaluation,

construction, and design of texts across genres and modes, with an emphasis on the application of these skills in a variety of real-world, academic, and disciplinary contexts. Students will complete various assignments including a full-length research paper, literary analyses, argumentative essays, and vocabulary and grammar. Students will read at least 7 parallel and/or teacher-directed longer pieces of literary merit over the year (including summer reading).

Literature & Composition III A & B Honors**

For Grade 11

Prerequisite: 1 unit of Lit & Comp I, 1 unit Lit & Comp II & teacher recommendation

This honors level class prepares able and ambitious readers and writers for continued study in AP and honors English classes. Literature & Composition III is the third course in the standard pathway of secondary English language arts courses. This course develops the integrated skill set that comprises the English language arts discipline to ensure that students are on track to be college ready. Literature & Composition III provides a platform for the wide interpretation, evaluation, construction, and design of texts across genres and modes, with an emphasis on the application of these skills in a variety of real-world, academic, and disciplinary contexts. Students will complete various assignments including a full-length research paper, literary analyses, argumentative essays, and vocabulary and grammar. Students will read at least 7 parallel and/or teacher-directed longer pieces of literary merit over the year (including summer reading).

Literature & Composition III A & B

For Grade 11

Prerequisite: 1 unit of Lit & Comp I, ½ unit Lit & Comp II or Lit & Comp II 103 & teacher recommendation

Literature & Composition III is the third course in the standard pathway of secondary English language arts courses. This course develops the integrated skill set that comprises the English language arts discipline to ensure that students are on track to be college and workplace ready. Literature & Composition III provides a platform for the wide interpretation, evaluation, construction, and design of texts across genres and modes, with an emphasis on the application of these skills in a variety of real-world, academic, and disciplinary contexts. This is a college preparatory course, which covers American Literature chronologically. Students will complete various assignments including a full-length research paper, literary analyses, argumentative essays, and vocabulary and grammar. Students will read at least 6 parallel and teacher-directed longer pieces of literary merit over the year (including summer reading).

Literature & Composition IV A & B Honors**

For Grade 12

Prerequisite: 1 unit of Lit & Comp I, 1 Lit & Comp II, 1 Lit & Comp III or AP Language & teacher rec.

This is an accelerated college preparatory course designed for the student who has a serious interest in interpreting literature. Literature & Composition IV is the fourth course in the standard pathway of secondary English language arts course. This course develops and refines the integrated skill set that comprises the English language arts discipline to ensure that students are on track to be college ready, with an emphasis on the interpretation, analysis, evaluation, and application of real-world texts and communications across a wide variety of modes, genres, and disciplines. Students complete assignments such as a full-length research paper, literary analyses, argumentative essays, and advanced vocabulary and grammar. Also, students will read at least 7 parallel and teacher-directed longer pieces of literary merit over the year (including summer reading).

Advanced Composition A & B

For Grade 12

Prerequisite: 1 unit of Lit & Comp I, 1 Lit & Comp II, ½ Lit & Comp III or AP Language

Advanced Composition focuses on the writing processes (e.g., planning, drafting, revising). Students will focus on analyzing and producing texts for a wide variety of intended purposes, target audiences, modes, and genres. Students will engage in research and explore multiple text structures (e.g., compare-contrast, process analysis, cause and effect, exemplification, classification, definition), literary devices, and craft techniques. Advanced language skills (grammar, usage, mechanics, and syntax) are a major component of this course. Students will read at least 6 parallel and teacher-directed longer pieces of literary merit over the year (including summer reading).

Dramatic Writing (Film, Television, and Theater 1)

For Grade 12

Prerequisite: 1 unit of Lit & Comp I, 1 Lit & Comp II, ½ Lit & Comp III

This college preparatory course develops skills necessary in creating and developing dramatic writing for theatrical media with special emphasis on film and television. Students will focus on the development of a “writerly stance” by reading, viewing, and analyzing texts and visual media from a writer’s point of view with a focus on understanding the construction process and including the application of conventions of grammar and usage. Students must complete multiple writing assignments including a full-length research paper. Note: This course meets fourth English Language Arts core requirement.

AP Literature A&B***

For Grade 12

Prerequisites: 1 unit of Lit & Comp I, 1 Lit & Comp II, 1 Lit & Comp III or AP Language

AP Literature & Composition is a college level course focusing on reading and analyzing literary works, writing critical essays, independent learning, and extensive discussion. The course is a novel-based course along with an intensive study of poetry. Works studied will range from sixteenth century literature to contemporary literature. Composition is the main focus in this class in conjunction with the understanding of style found in literature. This course conforms to the College Board recommendations; a syllabus has been approved and is on file with College Board.

Mythology Honors**

For Grade 11-12

This one semester honors level elective course introduces the importance of myths and tales of classical mythology. Mythology offers students an opportunity to engage in the comparative study of Greek, Roman, and Norse mythology, with an emphasis on texts and language. This course emphasizes critical and analytical skills, word analysis skills, vocabulary development, and composition skills. Students will consider the influence of the Greek, Roman, and Norse histories and languages on the English language and culture. Through examining the cultural contexts and literary elements of these myths, students will gain insights into the ancient world and its enduring influence on modern literature and culture. This course is an academic elective and does not satisfy English requirements for graduation.

	9th	10th	11th	12th
Honors/AP	Literature and Composition I Honors *80 or below = possibility of moving to on-level Lit And comp II	*AP Language/Literature and Composition II (see below) Literature and Composition II Honors *C or lower = move to on-level Literature and Composition III	Literature and Composition III (LA) Honors *C or lower = move to on-level Literature and Composition IV *AP Language (see below) OR Literature and Composition III Honors	AP English Literature and Composition

Small Group (IEP placement)	Literature and Composition I (SG)	Literature and Composition II (SG)	Literature and Composition III (SG)	Advanced Composition (SG)

<p>4 Units of English Required. Must include: *1 unit of Literature and Composition I And *1 unit of Literature and Composition II</p>	<p>NOTES: *Students in Honors Literature and Composition I have the possibility of taking AP Language in 10th grade OR 11th grade depending on their English grades. Students cannot take AP Language in both 10th and 11th grades. *For each English class, there are a minimum of three parallel readings each semester. *The research paper is written during the 2nd semester of honors Literature and Composition II and all Literature and Composition III classes as well as 1st semester of all Literature and Composition IV classes and Dramatic Writing. A research paper is also a component of AP English Language and Composition and AP English Literature and Composition.</p>
---	--

Journalism/Yearbook

For Grades 9-12

This is a yearlong class designed for college bound students interested in learning the principles of design, writing and photography necessary to produce the yearbook. Students enrolled in the class are expected to work independently and meet deadlines throughout the year. The class requires outside time for completion of spreads as well as pictures of events that occur throughout the year. This course is an academic elective and does not satisfy English requirements for graduation.

Mathematics

Four units of mathematics study are required for graduation. A graphing calculator (TI-84 or higher) is required for ALL math classes. There are a limited number of calculators available for student check out, but it will be advantageous to purchase for student use.

Algebra A & B

For Grade 9

Prerequisite: Math 8 & teacher recommendation

This is the first course in a sequence of courses designed to provide students with a rigorous program of study in mathematics. It conforms to Georgia's K-12 Mathematics Standards of Algebra. Students will take the state Georgia Milestones EOC at the end of the course.

Foundations of Algebra 93 A&B

For Grade 9

Prerequisite: Math 8 & teacher recommendation (no waivers accepted)

Foundations of Algebra is a first-year high school mathematics course option for students who have completed mathematics in grades 6-8 yet will need substantial support to bolster success in high school mathematics. The course is aimed at students who have reported low standardized test performance in prior grades and/or have demonstrated significant difficulties in previous mathematics classes.

Foundations of Algebra will provide many opportunities to revisit and expand the understanding of foundational algebra concepts, will employ diagnostic means to offer focused interventions, and will incorporate varied instructional strategies to prepare students for required high school mathematics courses. The course will emphasize both algebra and numeracy in a variety of contexts including number sense, proportional reasoning, quantitative reasoning with functions and solving equations and inequalities. This is a core mathematics course and does fulfill a mathematics requirement for graduation. Students in this course will take Foundations of Algebra A and Foundations of Algebra B during fall semester and then Algebra A 93 and Algebra B 93 during spring semester.

Algebra 93 A&B

For Grade 9

Prerequisite: Math 8 & teacher recommendation (no waivers accepted)

This course includes the same topics of study included in Algebra but places more emphasis on fundamental processes and practice. This course will place more emphasis on basic problem solving and mathematical concepts. Students will take the state Georgia Milestones EOC at the end of the course.

Algebra Support A & B

For Grade 9

Prerequisite: concurrent enrollment in Algebra A&B & teacher recommendation

The purpose of the Math Support class is to address the needs of students who have traditionally struggled in mathematics by providing the additional time and attention they need to successfully complete their regular grade-level mathematics

course. Mathematics Support is an elective class that will be taught concurrently with a student's regular Algebra course. This course is an academic elective credit only and does not fulfill the mathematics requirements for graduation.

Honors Algebra A&B**

For Grade 9

Prerequisite: Advanced Math 8 & teacher recommendation

This course includes the same topics of study included in Algebra but places more emphasis on formal processes and rigor. This course will place more emphasis on critical thinking and analysis of mathematical concepts. Students will take the state Georgia Milestones EOC at the end of the course.

Geometry A&B

For Grade 10

Prerequisite: Algebra & teacher recommendation

This is the second in a sequence of courses designed to provide students with a rigorous program of study in mathematics. It conforms to the Georgia's K-12 Mathematics Standards of Geometry.

Geometry 103 A&B

For Grade 10

Prerequisite: Alg 93, teacher rec (no waivers accepted)

This course includes the same topics of study included in Geometry but places more emphasis on fundamental processes and practice. This course will place more emphasis on basic problem solving and mathematical concepts.

Honors Geometry A&B**

For Grades 9-10

Prerequisite: Honors Algebra or Algebra & Teacher recommendation

This course includes the same topics of study included in Geometry but places more emphasis on formal processes and rigor. This course will place more emphasis on critical thinking and analysis of mathematical concepts.

Enhanced Honors Geometry A&B/Enhanced Honors Advanced Algebra A&B**

For Grade 9

Prerequisite: Honors Algebra or Algebra & Teacher recommendation

This course includes the same topics of study included in Geometry and Advanced Algebra but places more emphasis on formal processes, rigor, critical thinking, and analysis of mathematical concepts. It conforms to Georgia's K-12 Mathematics Standards of Geometry and Advanced Algebra. Students taking this course must complete a summer packet that is due on the first day of school. Students will take the full Honors Geometry course fall semester and the full Honors Advanced Algebra course spring semester. Students not maintaining an A or B average for fall semester will receive credit for Honors Geometry A and be moved to Honors Geometry B for spring semester. Students successfully completing this course will be prepared to take higher level courses such as AP Precalculus BC, AP Calculus BC, AP Statistics, and/or Multivariable Calculus.

Advanced Algebra A&B

For Grade 11

Prerequisite: Geometry A & B or Geometry 103 & teacher recommendation

This is the third in a sequence of courses designed to provide students with a rigorous program of study in mathematics. It conforms to Georgia's K-12 Mathematics Standards of Advanced Algebra

Advanced Algebra 113 A&B

For Grade 11

Prerequisite: Geometry 103 A & B, teacher rec (no waivers accepted)

This course includes the same topics of study included in Advanced Algebra but places more emphasis on fundamental processes and practice. This course will place more emphasis on basic problem solving and mathematical concepts.

Honors Advanced Algebra A&B**

For Grades 10-11

Prerequisite: Honors Geometry or Geometry & teacher rec

This course includes the same topics of study included in Advanced Algebra but places more emphasis on formal processes and rigor. This course will place more emphasis on critical thinking and analysis of mathematical concepts.

AP Precalculus BC A&B**

For Grades 10-11

Prerequisite: Enhanced Honors Geom/Adv Alg or Honors Advanced Algebra & Teacher rec

This course conforms to the Georgia K-12 Mathematics Standards of Precalculus and/or College Board's AP Precalculus. It places more emphasis on formal processes and rigor. This course will place more emphasis on critical thinking and analysis of mathematical concepts. Students that successfully complete this course are prepared to take AP Calculus BC.

Prerequisite: Enhanced Honors Geom/Adv Alg or Honors Advanced Algebra & Teacher recommendation
 This course conforms to the Georgia K-12 Mathematics Standards of Precalculus and/or College Board’s AP Precalculus. It places more emphasis on formal processes and rigor. This course will place more emphasis on critical thinking and analysis of mathematical concepts. Students that successfully complete this course are prepared to take AP Calculus AB.

Precalculus A & B **For Grades 11-12**

Prerequisites: Advanced Algebra & teacher recommendation
 This is a fourth-year mathematics course designed to prepare students for calculus and other college-level mathematics courses. It conforms to the Georgia K-12 Mathematics Standards.

AP Calculus AB A & B*** **For Grade 11-12**

Prerequisite: AP Precalc BC, AP Precalc AB or PreCalc & teacher recommendation
 This course conforms to the College Board topics for the Advanced Placement Calculus AB Examination. Topics covered include functions, graphs, limits, derivatives, differential calculus, and integral calculus.

AP Calculus BC A & B*** **For Grade 11-12**

Prerequisite: AP Calculus AB or AP Precalculus BC & Teacher recommendation
 This course conforms to the College Board topics for the Advanced Placement Calculus BC Examination. Topics covered include functions (including parametric, polar and vectors), graphs, limits, derivatives, integrals, polynomial approximation and series.

Multivariable Calculus A & B*** **For Grade 11 or 12**

Prerequisites: AP Calculus BC
 This course is a continuation of calculus and includes topics such as vectors, vector functions, partial derivatives, multiple integrals and vector calculus.

AP Statistics *** **For Grades 10-12**

Prerequisites: Hon Geometry or Accelerated Geom/Alg II & teacher rec
 This course conforms to the College Board topics for the Advanced Placement Statistics Examination. Students learn to make decisions based on real-world data. They learn to plan studies and experiments using probability and simulation models to anticipate and predict patterns in data. Extensive use is made of calculators with statistical capabilities. This course covers four major themes: Exploratory analysis, planning a study, probability and statistical inference.

9 th	10 th	11 th	12 th

AP Statistics can be taken as an elective any time after successful completion of Enhanced Honors Geo/Adv Alg or Honors Geometry as an elective			

Fine Arts

Our Fine Arts department includes visual and performance groups. Students must audition to register for a performance group. For the class of 2012 and beyond, a total of three units are required from Career Technical Education, World Language, Latin and/or Fine Arts.

The Fine Arts department offers advanced level classes in addition to on-level classes. If accepted to a higher-level course, students are expected to behave and perform with higher-level expectations, including preparation, attendance, attitude, etc.

All fine arts classes count towards the Georgia Fine Arts Diploma Seal. Students must earn three in a single fine arts area, plus an additional fine arts course in addition to completing community service and a capstone presentation.

Visual Arts Comprehensive

For Grades 9-12

This one semester class is open to any student with an interest in art and serves as the first semester in the **Visual Arts Pathway**. Introduces art history, criticism, aesthetic judgment, and studio production. Emphasizes the ability to understand and use elements and principles of design through a variety of media, processes, and visual resources, which may include pencil, charcoal, pastels, clay, and related media. Explores master artworks for historical and cultural significance.

Visual Arts: Drawing I

For Grades 9-12

Prerequisite: Visual Arts Comprehensive

This one or two semester course, which is the second semester in the **Visual Arts Pathway**, explores a variety of drawing techniques and media with an emphasis on developing drawing skills. Examines solutions to drawing problems through student drawings and those of other artists. Develops critical analysis skills for responding to master drawings. Covers western and non-western cultures. Homework is required.

Visual Arts: Drawing & Painting I

For Grades 10-12

Prerequisite: Drawing I

This course, which serves as the second year in the **Visual Arts Pathway**, introduces drawing and painting techniques and a variety of drawing and painting media. Emphasizes development of drawing and painting skills from observation and utilizes problem solving skills to achieve desired results. Stresses critical analysis of master paintings and drawings of different styles and historical periods. Homework is required.

Visual Arts: Drawing II

For Grades 11-12

Prerequisite: Drawing & Painting I

This course, which serves as the third year in the **Visual Arts Pathway**, enhances skills developed in Drawing & Painting I and provides further exploration of drawing media. It reinforces basic drawing and critical analysis skills for responding to master drawings of different historical styles and periods. Examines solutions to drawing problems through student drawings and those of other artists. Homework is required.

AP Art & Design: General A & B*****For Grades 11-12****Prerequisite: Drawing & Painting I plus Teacher Recommendation OR Drawing II**

This year-long class is designed for serious art students who may pursue a career in the visual arts field. This class requires significant out of class time and commitment. A portfolio can be developed in one of three areas: Drawing, 2D Design or 3D Design. 3D Design is only offered in the second year of the course. Drawing, printmaking, painting, mixed media, ceramics, sculpture, and/or photography are the major areas of study. Personal artistic style development is encouraged.

Bel Canto**For Grades 10-12****Prerequisite: Audition & Teacher Recommendation**

Bel Canto is an intermediate treble chorus for students who have mastered the choral, vocal, music reading, and rehearsal skills learned in 9th Grade Treble Choir. It is one full credit in the Fine Arts Pathway. Singers in Bel Canto learn music independently with an emphasis on performing at a high level of choral artistry. Members of Bel Canto are eligible to participate in the Walton Tour Choir. Bel Canto performs three concerts a year and is evaluated at the Georgia Music Educators Association Performance Evaluation. These performances are extensions of chorus class and attendance is expected. Bel Canto is a year-long course. There is a participation fee to defray costs of music, and instructional expenses.

Varsity Treble Ensemble**For Grades 11-12****Prerequisite: Audition & Teacher Recommendation**

Varsity Treble is an advanced chorus for treble voices who have mastered the choral, vocal, music reading, and rehearsal skills learned in Bel Canto. It is one full credit in the Fine Arts Pathway. Varsity Treble Choir strives for excellence, growth, individual responsibility, and teamwork. Varsity Treble performs three concerts a year and is evaluated at the Georgia Music Educators Association Performance Evaluation. These performances are extensions of chorus class and attendance is expected. Varsity Treble is a year-long course. There is a participation fee to defray costs of music, and instructional expenses.

Men's Ensemble**For Grade 9-12****Prerequisite: Audition & Teacher Recommendation**

Men's Ensemble is a chorus for tenor and bass voices. It is one full credit in the Fine Arts Pathway. Singers in Men's Ensemble work on skills related to choral, vocal, music reading, and rehearsal techniques. Men's Ensemble performs three concerts a year and is evaluated at the Georgia Music Educators Association Performance Evaluation. These performances are extensions of chorus class and attendance is expected. Men's Ensemble is a year-long course. There is a participation fee to defray costs of music, and instructional expenses.

9th Grade Treble Choir**For Grade 9-12****Prerequisite: Audition & Teacher Recommendation**

9th Grade Treble Choir is beginning treble chorus for students working to master the choral, vocal, music reading, and rehearsal skills necessary for success. It is one full credit in the Fine Arts Pathway. Students in 9th Grade Treble Choir work to learn music independently, with an emphasis on performing at a high level of choral artistry. Members of 9th Grade Treble are eligible to participate in the Walton Tour Choir. 9th Grade Treble performs three concerts a year and is evaluated at the Georgia Music Educators Association Performance Evaluation. These performances are extensions of chorus class and attendance is expected. 9th Grade Treble is a year-long course. There is a participation fee to defray costs of music, and instructional expenses.

Select Women's Vocal Ensemble**For Grades 10-12****Prerequisite: Audition & Teacher Recommendation**

Select Women's Ensemble is an advanced choral ensemble for treble singers who demonstrate mastery level proficiency in music reading, choral tone, and rehearsal skills. It is one full credit in the Fine Arts Pathway. Singers in this choir are expected to practice independently outside of class. Membership in Select Women's Ensemble may require additional time and commitment in rehearsals and performances. Auditions for the ensemble are held in March. Select Women's Ensemble is a year-long course. Members are eligible to participate in Walton Tour Choir. There is a participation fee to defray costs of music, and instructional expenses.

A Cappella**For Grades 10-12****Prerequisite: Audition & Teacher Recommendation**

Walton A Cappella is an advanced choral ensemble for soprano, alto, tenor, and bass voices, who demonstrate mastery level proficiency in music reading, choral tone, and rehearsal skills. It is one full credit in the Fine Arts Pathway. Singers in this choir are expected to practice independently outside of class. Membership in A Cappella requires additional time commitment in rehearsals and performances. Auditions for the ensemble are held in March. A Cappella is a year-long course. Members are eligible to participate in Walton Tour Choir. There is a participation fee to defray costs of music, and instructional expenses.

Concert Bands**For Grades 9-12****Prerequisite: Audition & Teacher Recommendation**

Concert Band provides opportunities to develop performance skills on a wind or percussion instrument. This course is the first year in the Fine Arts Pathway. This class emphasizes performances and production, stresses individual progress within group experiences, and may include analysis, historical and cultural influences, improvisation, and appreciation of music. Students have organized objectives for self-paced progress. Rising freshmen students who do not elect to take the spring audition at the end of their 8th grade year will be placed in one of the Concert Band classes. Participation in concert

performances outside of regular class hours is expected. Concert Band 2 is a year-long course that performs GMEA level II and III music. Concert Band 1 is a year-long course that performs GMEA Level III and IV music. There is a participation fee to defray costs of music, uniforms, and instructional expenses.

Symphonic Band**For Grades 9-12****Prerequisite: Audition & Teacher Recommendation**

This performance-based class provides opportunities for advanced-level performers to increase, develop and refine performance skills and precision on a wind or percussion instrument. The course covers performance and production, analysis and theoretical studies, historical and cultural contributions and influences, creative aspects of music, and appreciation of music at advanced levels of understanding. Students have organized objectives for self-paced progress with individual learning strategies and ensemble experiences. Individual growth and achievement are encouraged through participation in adjudicated solo and ensemble festivals, district honor bands, and private lessons. Participation in rehearsals and concert performances outside of regular class hours is expected. Symphonic Band is a year-long course that performs GMEA Level V and VI music. There is a participation fee to defray costs of music, uniforms, and instructional expenses.

Wind Symphony**For grades 9-12****Prerequisite: Audition & Teacher Recommendation**

This performance-based class provides opportunities for students to develop master skills in music reading and performance techniques. A variety of mastery band literature of various historical and contemporary styles and genres is performed. Students extend their knowledge of music theory, analysis of form, and exploration of compositional and improvisational techniques of instrumental music. Individual growth and achievement are encouraged through participation in adjudicated solo and ensemble festivals, district honor bands, community bands, community orchestras, and private lessons. Participation in rehearsals and concert performances outside of regular class hours is expected. Wind Symphony is a year-long course that performs GMEA Level VI and collegiate-level music. There is a participation fee to defray costs of music, uniforms, and instructional expenses.

Percussion**For Grades 9-12****Prerequisite: Audition & Teacher Recommendation**

In Advanced Instrumental Ensemble students are selected by director's recommendation. Offers advanced-level performers an alternative ensemble experience to large band and orchestra. Emphasizes the performance style and literature of the instrumental chamber group medium. Includes percussion ensemble and techniques. Covers performance and production, analysis and theoretical studies, creative aspects of music, historical and cultural influences, and music appreciation. Participation in rehearsals and concert performances outside of regular class hours is expected. Percussion is a year-long course. There is a participation fee to defray costs of music, uniforms, and instructional expenses.

On-Level Orchestras (Dorian, Aeolian, Locrian)**For grade 9-12****Prerequisite: Audition & Teacher Recommendation**

On-level orchestras are intermediate string ensembles for students who play violin, viola, cello, or double bass. This course counts for the Fine Arts Pathway. The techniques of string playing are taught within the context of musical performance (GMEA Level II-III difficulty). Rehearsals are held during the curricular school day, with an occasional afternoon rehearsal before concerts. On-level orchestras perform four concerts each year including Georgia Music Educators Association Large Group Performance Evaluation. These performances are extensions of class and attendance is expected. Orchestra is a co-curricular class and students have the opportunity to earn a letter in orchestra. Orchestra is a year-long course. Please note that orchestra instruments are not provided by the school and that purchasing a uniform is required. There is a participation fee to defray costs of music, uniforms, and instructional expenses.

Sinfonia**For Grades 9-12****Prerequisite: Audition & Teacher Recommendation**

Sinfonia is an advanced orchestra for violin, viola, cello and double bass students. Admission to this group is by audition only. Advanced techniques of string players are stressed within the context of music performance (Georgia Level IV music difficulty). Rehearsals are held during the curricular school day, with an occasional afternoon rehearsal before concerts. Performances are usually in the evening. These performances are extensions of class and attendance is expected. Orchestra is a co-curricular class and students have the opportunity to earn a letter in orchestra. Please note that orchestra instruments are not provided by the school and that purchasing a uniform is required. Sinfonia is a yearlong course. There is a participation fee to defray costs of music, uniforms, and instructional expenses.

Philharmonia**For Grades 9-12****Prerequisites: Audition & Teacher Recommendation**

Philharmonia is an advanced orchestra for violin, viola, cello and double bass students. Admission to this group is by audition only. This award-winning group performs music with advanced techniques of string playing (Georgia Level V-VI music difficulty). After school or evening rehearsals are required in addition to evening concerts. These performances are extensions of class and attendance is expected. Orchestra is a co-curricular class, and students have the opportunity to earn a letter in orchestra. Please note that orchestra instruments are not provided by the school and that purchasing a uniform is required. Private lessons are strongly recommended. Philharmonia is a yearlong course. There is a participation fee to defray costs of music, uniforms, and instructional expenses.

Chamber Orchestra**For Grades 9-12****Prerequisite: Audition & Teacher Recommendation**

Chamber Orchestra is Walton's most advanced orchestra. Admission to this group is by audition only. This award-winning group performs standard, professional, orchestral, string and chamber music at the highest level of difficulty. On occasion, woodwind, brass and percussion students from Wind Symphony may join the strings to form a full orchestra. After school or evening rehearsals are required in addition to evening concerts. These performances are extensions of class and attendance is expected. Orchestra is a co-curricular class, and students have the opportunity to earn a letter in orchestra. Please note that orchestra instruments are not provided by the school and that purchasing a uniform is required. Private lessons are recommended. Chamber Orchestra is a yearlong course. There is a participation fee to defray costs of music, uniforms, and instructional expenses.

AP Music Theory*****For Grades 11-12****Prerequisites: Teacher recommendation**

AP Music Theory conforms to College Board topics for the Advanced Placement Music Theory Examination. It covers terminology and notational skills, writing skills, visual analysis and aural skills, and stresses ear training and compositions practice. This class analyzes and composes music from the classical period so that students can analyze its influence on current music trends.

Technical Theater**For Grades 9-12**

This class introduces technical considerations of play production; covers set construction, scene painting, lighting and settings, make-up and costumes. The students will learn the basic principles of stage design and construction. The class serves as the prerequisite course for other technical courses. This class utilizes and trains students on new technology related to the theatre. This course is an academic elective and does not satisfy English requirements for graduation. This is a one-semester elective.

Acting I**For Grades 9-12**

Introduces the acting process and the role of the actor in various styles/methods with a focus on scene study. Stresses developing imagination, observation, concentration powers, and self-discipline. Includes developing physical and vocal control while transmitting emotions, convictions, and ideas; enhances self-confidence and self-awareness. Theater is used to encourage cooperative learning, teamwork, organization, and leadership skills. The class allows all students the opportunity to perform on a regular basis. This course is an academic elective and does not satisfy English requirements for graduation. This is a one-semester elective.

International Spanish Academy

The International Spanish Academy is a rigorous program of study for students who are learning Spanish as a foreign language. Students must apply in the spring of the 8th grade year. Those accepted will take 4 years of Spanish as well as 4 honors or AP level content area courses that include a delivery component in Spanish.

ISA Spanish II A&B: Culture, Comparisons & Communication**For grade 9**

Prerequisite: Admission to ISA, Spanish I & concurrent enrollment in 9th Lit Honors and AP Human Geography

The International Spanish Academy Level II course focuses on the rapid development of communicative competence in the target language and understanding and comparing the cultures of the Spanish speaking world. The major means of communication between the students and instructors will be in Spanish. The philosophy of the ISA program is that the students will use the language to learn it instead of learning the language to use it.

ISA Spanish III Advanced A&B: The Humanities-Art & History****For grade 10**

Prerequisites: ISA Spanish II & concurrent enrollment in ISA AP Government/ISA Honors Microeconomics

The International Spanish Academy Spanish III Advanced course is an extremely accelerated course designed to complete the expectations of level III & IV in one year. The language skills and communicative competence will continue to rapidly develop through the study of the Humanities with an emphasis on Art and History of the Spanish speaking world.

ISA AP Spanish Language A&B*****For grade 11**

Prerequisite: ISA Spanish III Adv & Admission to ISA

This course conforms to the College Board topics for the Advanced Placement Spanish Language Examination. It emphasizes the ability to comprehend formal and informal spoken Spanish, to acquire the vocabulary and grasp of structure to read newspapers, magazines and Hispanic literature to compose expository passages, and to speak accurately and fluently. The major means of communication is in the target language. This course will also maintain its commitment to and collaboration with the Ministry of Education of Spain as a course within Walton's International Spanish Academy.

ISA AP Spanish Literature A&B*****For grade 12**

Prerequisite: ISA AP Spanish Language

This course conforms to College Board required authors and selected works for the Advanced Placement Spanish Literature Examination. It emphasizes the ability to understand a lecture in Spanish and discuss literary topics in Spanish, to read Hispanic literary texts in all genres, and to analyze critically the content of literary works, orally and in writing using appropriate terminology. This course will also maintain its commitment to and collaboration with the Ministry of Education of Spain as a course within Walton's International Spanish Academy.

ISA Literature & Composition I A&B Honors****For grade 9**

Prerequisites: Admission to ISA program & Spanish I credit

This honors-level class prepares able and ambitious readers and writers for AP and/or honors level English courses. Literature & Composition I is the first course (required) in the sequence of secondary English language arts courses required for graduation. This course develops the integrated skill set that comprises the English language arts discipline to ensure that students are on track to be college ready. Literature & Composition I focuses on the interpretation, evaluation, construction, and design of texts across genres and modes in a variety of real-world, academic, and disciplinary contexts while sustaining and building mastery of language applications and discipline-specific practices. Students will read at least 7 parallel and/or teacher-directed longer pieces of literary merit over the year (including summer reading). This class includes a Spanish language component and collaborates with the Spanish II International Spanish Academy class.

Prerequisite: ISA Ninth grade courses

This course conforms to the College Board topics for the Advanced Placement Government Examination. The AP Government program is a heavily case study-based analysis of our political system equivalent to most introductory level college courses in political science. Topics covered include federalism, separation of powers, influences on the formulation and adoption of the Constitution, political beliefs, political parties and elections, interest groups, institutions and policy processes, and civil liberties and civil rights. This course will be taught in both English and Spanish. It will maintain its commitment to the Ministry of Education of Spain as a course within the International Spanish Academy.

ISA Honors Literature & Composition II A & B **

For Grade 10

Prerequisites: ISA Lit & Comp I Honors

This honors-level class prepares able and ambitious readers and writers for an AP or honors level track throughout high school English. Literature & Composition II is the second course (required) in the sequence of secondary English language arts courses required for graduation. This course develops the integrated skill set that comprises the English language arts discipline to ensure that students are on track to be college ready. Literature & Composition II focuses on the interpretation, evaluation, construction, and design of texts across genres and modes in a variety of real-world, academic, and disciplinary contexts while sustaining and building mastery of language applications and discipline-specific practices. Students will read at least 7 parallel and teacher-directed longer pieces of literary merit over the year (including summer reading). Students will take the Georgia Milestones EOC at the end of the course. This class includes a Spanish language component and collaborates with the Spanish III/IV International Spanish Academy course.

ISA AP United States History A&B***

For grade 11

Prerequisite: ISA AP Govt & ISA Spanish III

This course conforms to the College Board topics for the Advanced Placement United States History Examination. It covers discovery and settlement, colonial society, the American revolution, Constitution and New Republic, Age of Jefferson, Nationalism, Sectionalism, Territorial Expansion, Civil War, Reconstruction, Industrialization, progressive Era, World War I, Depression, New Deal, World War II, The Cold War through modern times. This course will be taught primarily in Spanish.

ISA AP Literature A&B***

For grade 12

Prerequisites: 1 unit Lit & Comp I, 1 unit of Lit & Comp II, 1 unit Lit & Comp III or AP Language, all ISA Spanish courses and teacher rec.

AP Literature & Composition is a college level course focusing on reading and analyzing literary works, writing critical essays, independent learning, and extensive discussion. The course is a novel-based course along with an intensive study of poetry. Works studied will range from sixteenth century through contemporary literature. Composition is also a main focus in this class in conjunction with the understanding of style found in literature. This course conforms to the College Board recommendations; a syllabus has been approved and is on file with College Board. This class is the final content course of the ISA and will be conducted in both English and Spanish

Physical Education

All students are required to take Personal Fitness and Health for graduation.

Health

For Grades 9-12

Health allows students to develop a higher state of wellness (high levels of physical, mental/emotional, and social health) through an understanding of preventative health strategies as they pertain to personal health, nutrition, communicative and chronic diseases, consumer health, first aid and CPR, drug education, community health and family living. An emphasis is placed on the decision-making process and preventative health care. The Alcohol Drug Awareness Program (ADAP) which is a requirement for driver's licensure in Georgia will be given during all Health classes.

Personal Fitness

For Grades 9-12

Introduces instruction in methods to attain a healthy level of physical fitness; implements a lifetime fitness program based on a personal fitness assessment and stresses strength, muscular endurance, flexibility, body composition, and cardiovascular endurance; includes instruction in fitness principles, nutrition, fad diets, weight control, stress management, adherence strategies, and consumer information; and promotes self-awareness and responsibility for fitness. There is a workout component that is supported by a classroom component in this class.

Intro to Team Sports A&B

For Grades 9-12

Introduces fundamental skills, strategies, and rules associated with team sports such as basketball, volleyball, soccer, softball, baseball, field hockey, lacrosse, team handball, and flag football.

Intro to Outdoor Education A&B

For Grades 10-12

Promotes an appreciation of the outdoors; provides physical activities and adventures in an outdoor laboratory which include camping, fishing, hiking, orienteering, backpacking, repelling, outdoor cooking, boating safety, hunter safety, riflery and archery.

Weight training A&B

For Grades 9

Advanced Weight training A&B

For grade 10

Physical Conditioning A&B

For grade 11

Advanced Physical Conditioning A&B

For Grades 12

Exercise and Weights A&B

For Grades 10-12

These courses are designed to introduce students to a program of activities that promote the development of health-related fitness. Activities may include stretching exercises, weightlifting, strength training, polymeric exercises, flexibility, and physical fitness training. Students will devise an individual program for their fitness and strength level. Some sections are sport and/or gender specific, while other sections serve those who enjoy lifting or have a desire to learn about lifting.

Intro to Lifetime Sports A&B

For Grades 9-12

This course is designed to introduce students to the fundamental skills, strategies, and rules of various lifetime sports. This course may include the following: tennis, badminton, basketball, volleyball, golf, bowling, and any other individual or dual sport or activity. The history of the games, along with proper etiquette are discussed as well.

Intro to Recreational Games A & B

For Grades 9-12

Introduces recreational games for lifetime leisure activities which may include table tennis, shuffleboard, frisbee, deck tennis, new games, horseshoes, darts and croquet. Emphasizes the rules of each game and the skills necessary to play.

Body Sculpting

For Grades 9-12

This course is designed for the student who is interested in redefining her/his body shape through specific exercises. The course differs from our traditional weightlifting courses which emphasize Olympic lifts geared toward improved power and strength for athletic/skill performance. This course utilizes weight training, conditioning exercises, flexibility/mobility exercises, and proper nutrition to improve muscle tone, muscle definition, posture, bodily proportions, and overall condition of the body and energy levels.

Female Weight Training

For Grades 9-12

This course is designed for the experienced female weight training student. Much of the focus is utilizing Olympic Style lifts to increase strength and power specifically for student-athletes. Flexibility and cardiovascular exercises are also performed to enhance performance and prevent injury. **Prerequisite: Teacher/Coach Recommendation**

Science

Four units of science study, including one unit of Biology, one unit of Physics or Physical Science, one unit of Chemistry, Earth Systems, Environmental Science or AP science, and one additional unit of science is required/

Biology A&B Honors**

For grade 9

Prerequisite: teacher rec and student recommended for Honors Literature & Composition I

Honors Biology topics of study include inorganic and organic chemistry principles, cell structures and function, cellular processes, cellular respiration, photosynthesis, and cellular reproduction, genetics, and DNA, evolution, biological diversity and its classification, and biotechnology. Honors Biology is a laboratory-based class. Students will be involved in computer-based and traditional lab activities with an emphasis on collaborative inquiry exploration. Students will take the state Georgia Milestones EOC at the end of the course.

Biology A&B

For grade 9

Biology introduces biological processes. Starting at the molecular level the structures and functions both unique and common to various life forms will be examined and compared. Study topics will include biological molecules, energy processes, cellular structure, genetics and reproduction, biological diversity, behavior and adaptation, and ecology. Laboratory exercises will provide hands-on opportunities to increase knowledge and skills in both biology and the design of controlled experiments. Students are required to take the state Georgia Milestones EOC.

Biology 93 A&B

For grade 9

Prerequisite: teacher rec - no waivers allowed

The fall semester of this course will introduce the topics of cellular structure and function, genetics, and the development and diversity of life. The spring semester of this course will deal with the classification of living things, a survey of the five biological kingdoms, and ecology. This course is supplemented with materials not found in the textbook. Students are required to take the state Georgia Milestones EOC.

Human Anatomy/Physiology Honors A&B**

For grade 10-12

Prerequisite: 1 unit of Biology & teacher recommendation

The honors Anatomy/Physiology course is designed to introduce students to the structure and function of the human body through a study of the 11 organ systems. The class will concentrate on three themes of study– interrelationships of body organ systems, homeostasis and complementarity of structure and function. Students will analyze the structures of the organs found within each system as a prerequisite to comprehending its function. Pathological conditions are integrated throughout the course to clarify and illuminate normal functioning. This course satisfies the fourth science requirement for graduation.

Human Anatomy and Physiology

For grade 10-12

Prerequisite: 1 unit of Biology

Human Anatomy and Physiology will introduce students to the structures and functions of all of the human body systems. Depth and breadth of the course will be aligned with Biology. Curriculum will be enriched with case studies, lab dissections and other hands-on, student-centered activities. This course satisfies the fourth science requirement for graduation.

Human Anatomy and Physiology 123

For grade 12

Prerequisite: 1 unit of Biology 93, 1 unit of Env or Chem, 1 unit Physics

Human Anatomy and Physiology will introduce students to the structures and functions of all of the human body systems. Depth and breadth of the course will be aligned with Biology 93. Curriculum will be enriched with group case studies and lab dissections. This course satisfies the fourth science requirement for graduation.

Environmental Science A&B

For Grades 10-12

Prerequisite: 1 unit of Biology

Environmental Science is designed to integrate the study of many components of our environment, including the human impact on our planet. Students will investigate the flow of energy and cycling of matter within ecosystems and evaluate

types, availability, allocation, and sustainability of energy resources. Course instruction is based on hands-on, student-centered, and inquiry-based approaches to engage students in higher order thinking skills to promote learning in the classroom. This course satisfies the third science requirement for graduation.

Environmental Science 113 A&B

For Grades 10-12

Prerequisite: 1 unit of Biology & teacher recommendations

Environmental Science 113 is designed to integrate the study of many components of our environment, including the human impact on our planet. Students will investigate the flow of energy and cycling of matter within ecosystems and evaluate types, availability, allocation, and sustainability of energy resources. Course instruction is based on hands-on, student-centered, and inquiry-based approaches to engage students in higher order thinking skills to promote learning in the classroom. This course satisfies the third science requirement for graduation.

Astronomy A&B

For Grades 11-12

Pre-requisite: 3 units of science, 1 unit of Geometry

This course is an introduction to the world's oldest science, astronomy. The topics studied will include the origin of the universe, earth centered cosmology, stellar evolution, the laws of gravity and light, the concepts of space and time travel, current and historical concepts of astronomy observing, and the methodologies and equipment used in modern astronomy along with the historic development of these methods and procedures. This course satisfies the fourth science requirement for graduation.

Forensics A&B

For Grades 11-12

Prerequisite: 2 units of science & teacher recommendation

Forensic science is the use of scientific protocols to analyze a crime scene. Students will learn how to use biological, chemical, and physical separation methods to isolate and identify materials. They will also learn how to analyze physical evidence, biological evidence, and the use of tools, including impressions from firearms, tool marks, and arson. This course satisfies the fourth science requirement for graduation.

Chemistry A&B

For Grades: 10-12

Prerequisite: 1 unit of science and concurrent with Geometry or higher math (not recommended for Geometry 103)

Chemistry is a laboratory-investigation based science class studying matter & its changes. Topics covered include periodic trends, bonding, chemical reactions, states of matter, acids & bases, equilibrium, stoichiometry, & energy changes. Math-based reasoning is regularly used to predict & explain data. This course is designed to help prepare students for introductory college Chemistry. This course satisfies one science requirement for graduation.

Chemistry A&B Honors**

For Grades 10-12

Prerequisite: 1 unit of science and concurrent with Geometry or higher (not recommended for Geometry:103)

Honors Chemistry is a laboratory-investigation based science class studying matter & its changes. Topics covered include periodic trends, bonding, molecular shape, polarity, chemical reactions, intermolecular forces, acids & bases, equilibrium, stoichiometry, gas relationships, electrochemistry, & energy changes. This class emphasizes analysis & application of course content. Math-based reasoning is regularly used to predict & explain data. Students describe Honors Chemistry as interesting & fun. It is designed to prepare students for Advanced Placement Science courses, as well as general & inorganic chemistry college courses. This course satisfies one science requirement for graduation.

Honors Physics A&B **

For Grades 11-12

Prerequisite: 2 units of science & enrollment in Precalculus

This course concentrates on the subjects of mechanics, waves and optics, sound and musical acoustics, electricity and magnetism. Laboratory investigations are an integral part of the course. The laws of physics are generalized and conceptualized from observation and experimental results. Since physical laws are usually expressed as mathematical equations, algebraic ability is necessary to understand physics on any level beyond a qualitative description. Problem-solving and critical thinking skills are taught and nurtured.

Physics A&B **

For Grades 11-12

Prerequisite: 2 units of science– concurrent with Geometry or Advanced Algebra.

Physics is the laboratory course that examines the various forms of energy and their relation to matter. This course provides a hands-on conceptual overview of various topics in physics. Beginning with the difference between speed and velocity students are introduced to a new way of viewing and describing the world. Physical systems and the understanding of the dynamics between the component parts of those systems will be studied from conceptual,

mathematical, and laboratory perspectives. This course, while using algebraic equations as a guide for thought, emphasizes conceptual comprehension.

Physics 113 A&B ****For Grades 11-12**

Prerequisite: 2 units of science– concurrent with algebra or higher math, teacher recommendation, no waivers.

Physics is the laboratory course that examines the various forms of energy and their relationship to matter. This course provides a hands-on overview of various topics in physics. Beginning with the difference between speed and velocity students are introduced to a new way of viewing and describing the world. This course, while using some equations as a guide, emphasizes conceptual comprehension.

Biotechnology A&B Honors****For Grades 11-12**

Prerequisite: 1 unit of biology, 1 unit of chemistry & teacher recommendation

Key topics studied in this course include the principles and techniques of genomics, recombinant DNA, proteomics, and gene therapy. Biotechnology is a lab intensive course with hands on experiments 3-5 days per week. The focus of the lab component is to develop expertise in such lab procedures as volume and mass measurement, safe lab practices, preparing solutions, media and cell cultures, sterile technique, isolating and analyzing DNA and proteins, performing Agarose electrophoresis, SDS-PAGE Electrophoresis, DNA fingerprinting, antigen/antibody ELISA, PCR, and using appropriate technology for preparation and analysis of samples.

AP Biology*****For Grades 11-12**

Prerequisite: 1 unit Honors Bio, 1 Unit Honors Chem & teacher rec

The Advanced Placement Biology course is designed to be the equivalent of a college introductory biology course usually taken by biology majors during their first year. The AP course in biology differs significantly from the usual first high school course in biology with respect to the kind of textbook used, the range and depth of topics covered, the kind of laboratory work done by students, and the time and effort required of students. It provides students with the conceptual framework, factual knowledge, and analytical skills necessary to deal critically with the rapidly changing science of biology. Specific topics covered include biological chemistry, cells, energy transformations, molecular genetics, heredity, evolution, phylogeny, physiology, and ecology. This course prepares students to take the AP Biology exam. Students must be available on WEB days for labs, and there will be a required summer assignment.

AP Environmental Science A&B*****For Grades 11-12**

Prerequisite: 1 unit Biology, 1 unit Chemistry & teacher rec.

The Advanced Placement Environmental Science course is designed to be the equivalent of an introductory Environmental Science course at the college level. The goal of the course is to provide students with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze both natural and human made environmental problems, to evaluate the relative risks associated with these problems, and to examine alternative solutions for resolving or preventing them. Environmental science is interdisciplinary; it embraces a variety of topics from biology, chemistry, geology, and public policy. The course has significant laboratory and fieldwork components. The course prepares students to take the AP Environmental Science exam.

AP Chemistry A&B*****For Grades 10-12**

Prerequisite: 1 unit honors chemistry & teacher recommendation

AP Chemistry is a college level introductory course in chemistry for those intending to major in a science related field. Materials studied in this course also include the topics, concepts, and laboratory experiments associated with first-year college chemistry and extensive mathematical applications of laws learned in the first-year course. The goal of AP Chemistry is to develop critical thinking skills and improve reasoning regarding topics in chemistry. Topics to be studied include atomic theory and structure, chemical bonding, organic chemistry, gases, liquids, solids, solutions, types of reactions, stoichiometry, equilibrium, kinetics, and thermodynamics. This course prepares students to take the AP Chemistry exam.

AP Physics C– Mechanics A&B*****For Grades 11-12**

Prerequisite: 2 units of science, concurrently enrolled in Calculus, & teacher rec

The Advanced Placement Physics C - Mechanics course is a calculus-based, in-depth study of mechanics. The course is an investigation driven development of the laws of physics. Problem-solving and critical thinking are emphasized throughout the course. The topics of kinematics, dynamics, impulse and momentum, work and energy, rotational motion, oscillations and gravitation are covered in this course. This course ordinarily forms the first part of the college sequence that serves as

the foundation in physics for students majoring in science, applied science, and engineering. This course prepares students to take the AP Physics C exam in mechanics.

AP Physics C—Emag A&B*****For Grades: 12**

Prerequisite: 3 units of science including 1 unit of physics, 1 unit Calculus & teacher recommendation

The Advanced Placement Physics C – Emag course is a calculus-based, in-depth study of electricity and magnetism. The course is an investigation driven development of the laws of physics. Problem-solving and critical thinking are emphasized throughout the course. The topics of electrostatics, electric fields and forces, electrodynamics, electric potential and capacitance, current and resistance, circuit elements and dc circuits, magnetic fields and forces, magnetic flux, electromagnetic induction, and Maxwell's equations are covered in this course. This course ordinarily forms the second part of the college sequence that serves as the foundation in physics for students majoring in science, applied science, and engineering. This course prepares students to take the AP Physics C exam in electricity and magnetism.

AP Physics 1 A&B*****For Grades 11-12**

Prerequisite: 2 units of science, concurrent enrollment in AP Precalculus or higher math & teacher rec.

The Advanced Placement Physics 1 course is equivalent to a first-semester college course in algebra/trigonometry-based physics for non-physics majors. Emphasis is placed on the development of critical thinking skills and problem-solving ability. Course topics include Newtonian mechanics (including rotational dynamics and angular momentum); work, energy and power; and mechanical waves and sound. It also introduces electrical circuits. This course prepares students to take the AP Physics 1 exam. At the conclusion of this course, students will be prepared to continue the study of physics by taking either AP Physics 2 or AP Physics Emag dependent on math coursework.

AP Physics 2 A&B*****For Grades 11-12**

Prerequisite: 2 units of science, concurrent enrollment in AP Precalculus or higher math & teacher rec.

The Advanced Placement Physics 2 course is equivalent to a second-semester college course in algebra/trigonometry-based physics for non-physics majors. Emphasis is placed on the development of critical thinking skills and problem-solving ability. Course topics include fluid mechanics, thermodynamics, electricity and magnetism, optics, and atomic and nuclear physics. This course prepares students to take the AP Physics 2 exam.

For the Class of 2026 (Rising 12th)

	9th	10th	11th	12th
Accelerated/ Multiple AP options	Honors Biology (taken concurrently with Hon Alg 1 or higher math)	Honors Chemistry (taken concurrently with Geometry or higher math) <u>Elective Options:</u> Honors Anatomy/ Physiology Anatomy/Physiology	<i>“A or B” avg in Chem:</i> AP Biology OR AP Chemistry OR AP Physics C (must be taken with Calc) AP Physics 1 OR AP Environmental Science	AP Biology OR AP Chemistry OR AP Physics C (must be taken with Calc) AP Physics 1 OR AP Environmental Science OR Honors Anatomy/Physiology OR Honors Biotechnology OR Honors Physics

Science, Technology, Engineering, and Mathematics (STEM) Academy

The STEM Academy provides a rigorous program of study for students who have a sincere interest in the STEM fields. The academy provides three pathways: advanced math and science, biomedical sciences, and engineering. The academy's mission is to provide students a rigorous, interdisciplinary learning environment focused on science, technology, engineering, and mathematics, to foster curiosity, and to promote a collaborative culture of ethical and innovative problem-solving. Students must apply in the fall of the 8th grade year. Students accepted into the academy will take 4 years of paired STEM courses unique to each pathway. Placement into the following courses requires admission into the STEM Academy. Admission occurs prior to the 9th grade year.

ADVANCED MATH AND SCIENCE PATHWAY

STEM AP Environmental Science A&B

For grade 9

The Advanced Placement Environmental Science course is designed to be the equivalent of an introductory Environmental Science course at the college level. The goal of the course is to provide students with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze both natural and human made environmental problems, to evaluate the relative risks associated with these problems, and to examine alternative solutions for resolving or preventing them. Environmental science is interdisciplinary; it embraces a variety of topics from biology, chemistry, geology, and public policy. The course has significant laboratory and fieldwork components. The course prepares students to take the AP Environmental Science exam.

STEM Enhanced Honors Geometry A&B/Enhanced Honors Advanced Algebra A&B For grade 9**

Prerequisite: Honors Algebra or Algebra & Teacher recommendation

This course includes the same topics of study included in Geometry and Advanced Algebra but places more emphasis on formal processes, rigor, critical thinking, and analysis of mathematical concepts. It conforms to Georgia's K-12 Mathematics Standards of Geometry and Advanced Algebra. Students taking this course must complete a summer packet that is due on the first day of school. Students will take the full Honors Geometry course fall semester and the full Honors Advanced Algebra course spring semester. Students not maintaining an A or B average for fall semester will receive credit for Honors Geometry A and be moved to Honors Geometry B for spring semester. Students successfully completing this course will be prepared to take higher level courses such as AP Precalculus BC, AP Calculus BC, AP Statistics, and/or Multivariable Calculus.

STEM AP Chemistry A&B

For grade 10

AP Chemistry is a college level introductory course in chemistry for those intending to major in a science related field. Materials studied in this course also include the topics, concepts, and laboratory experiments associated with first-year college chemistry and extensive mathematical applications of laws learned in the first-year course. The goal of AP Chemistry is to develop critical thinking skills and improve reasoning regarding topics in chemistry. Topics to be studied include atomic theory and structure, chemical bonding, organic chemistry, gases, liquids, solids, solutions, types of reactions, stoichiometry, equilibrium, kinetics, and thermodynamics. This course prepares students to take the AP Chemistry exam.

STEM AP Precalculus BC A&B

For grade 10

This is the third in the sequence of mathematics courses designed to ensure that students are prepared to take higher level mathematics courses during their high school career, including AP Calculus AB, AP Calculus BC, and AP Statistics. It requires students to:

- Continue the study of conics, including systems of quadratic equations and using the discriminant
- Analyze and use trigonometric functions, their graphs, and their inverses
- Use trigonometric identities to solve problems and verify equivalency statements

- Solve trigonometric equations analytically and with technology
- Solve problems and verify equivalency statements using sum and difference formulas, double-angle and half-angle formulas, sum-to-power rule and power-to-sum rule
- Use complex numbers in trigonometric form
- Understand and use vectors in 2-space and 3-space.
- Use dot product and cross-product to solve problems
- Use sequences and series
- Explore parametric representations of plane curves in 2 and 3-space
- Explore polar equations
- Explore matrices and use matrices in applications
- Law of Sines/Cosines
- Understand and use vectors
- Use binomial theorem to calculate probability and expand binomials
- Explore set theory
- Develop the use of proofs, including direct proofs, indirect proofs and proof by induction
- Expand knowledge of rational functions, including partial fraction decomposition

STEM AP Physics C - Mechanics A&B**For grade 11**

The Advanced Placement Physics C course is a calculus-based, in-depth study of mechanics. The course is an investigation driven development of the laws of physics. Problem-solving and critical thinking are emphasized throughout the course. The topics of kinematics, dynamics, impulse and momentum, work and energy, rotational motion, oscillations and gravitation are covered in this course. This course ordinarily forms the first part of the college sequence that serves as the foundation in physics for students majoring in science, applied science, and engineering. This course prepares students to take the AP Physics C exam in mechanics.

STEM AP Calculus BC**For grade 11**

This course conforms to the College Board topics for the Advanced Placement Calculus BC Examination. Topics covered include functions (including parametric, polar and vectors), graphs, limits, derivatives, integrals, polynomial approximation and series. The STEM AP Calculus BC class follows the framework distributed by the College Board while incorporating proofs, applications, and additional calculus topics found outside the framework. The students are required to complete multiple projects that further enhance learning of calculus topics. This course prepares students to take the AP Calculus BC exam.

AP Capstone Courses

To earn the AP Capstone Diploma, students must score a 3 or above on both the AP Seminar and AP Research exams as well as a 3 or above on four other AP exams of their choosing.

STEM AP Seminar**For grade 11**

In AP Seminar students will engage with complex academic and real-world issues, examining them through multiple lenses and considering multiple viewpoints. The topics may change from year to year depending on student and teacher interests, global and civic issues, academic questions, and concepts from other AP courses. Students will evaluate multiple viewpoints through several of the following lenses: cultural and social, artistic and philosophical, political and historical, environmental, scientific, futuristic, and ethical. Through inquiry and investigation, students will develop their own perspectives on complex issues and topics while honing their critical and creative thinking skills. During the course, students will complete a team research project and presentation, an individual research project and presentation, and an end of course exam in which they will analyze, compare and synthesize arguments.

STEM AP Biology A&B**For grade 12**

The Advanced Placement Biology course is designed to be the equivalent of a college introductory biology course usually taken by biology majors during their first year. The AP course in biology differs significantly from the usual first high school course in biology with respect to the kind of textbook used, the range and depth of topics covered, the kind of laboratory work done by students, and the time and effort required of students. It provides students with the conceptual framework, factual knowledge, and analytical skills necessary to deal critically with the rapidly changing science of biology. Specific topics covered include biological chemistry, cells, energy transformations, molecular genetics, heredity,

evolution, classification, and organ systems, bacteria, Protista, fungi, plants, animals and ecology. This course also prepares students to take the AP Biology exam. Students must be available for WEB labs and there will be a required summer assignment.

STEM Multivariable Calculus**For grade 12**

This course is a continuation of calculus and includes topics such as vectors, vector functions, partial derivatives, multiple integrals and vector calculus. *Note: Students may apply for and if accepted, take Georgia Tech's Distance Calculus in lieu of multivariable.

STEM AP Research**For grade 12**

AP Research allows students to deeply explore a STEM topic, problem or issues of individual interest. Through this exploration, students design, plan and conduct a year-long research-based investigation to address a research question. In the AP Research course, students further their skills acquired in the AP Seminar course by understanding research methodology; employing ethical research practices; and accessing, analyzing, and synthesizing information as they address a research question. Students explore their skill development, document their processes and curate the artifacts of the development of their scholarly work in a portfolio. The course culminates in an academic paper of approximately 4000-5000 words (accompanied by a performance or exhibition of product where applicable) and a presentation with an oral defense. AP Statistics is strongly recommended.

BIOMEDICAL SCIENCES PATHWAY**STEM Biology A&B Honors****For grade 9**

Honors Biology explores basic biological processes. Topics of study include inorganic and organic chemistry principles, cell structures and function, cellular processes, cellular respiration, photosynthesis, and cellular reproduction, genetics, and DNA, evolution, biological diversity and its classification, and biotechnology. Honors Biology is a laboratory-based class. Students will be involved in computer-based and traditional lab activities with an emphasis on collaborative inquiry exploration. STEM students will work on a year-long project determined by the instructor. Students will take the state Georgia Milestones EOC at the end of the course.

STEM PLTW Principles of Biomedical Science A&B Honors**For grade 9**

Principles of Biomedical Science use the PLTW curriculum. This honors course requires students to design research strategies, analyze data related to outbreaks and healthcare as well and explore clinical empathy and health promotion. Students will develop technical skills using cutting edge technologies as well as skills involving problem solving, critical and creative thinking, communication, and collaboration. Students will take the PLTW end-of-course test.

STEM Chemistry A&B Honors**For grade 10**

Honors Chemistry is a laboratory-investigation based science class studying matter & its changes. Topics covered include periodic trends, bonding, molecular shape, polarity, chemical reactions, intermolecular forces, acids & bases, equilibrium, stoichiometry, gas relationships, electrochemistry, & energy changes. This class emphasizes analysis & application of course content. Math-based reasoning is regularly used to predict & explain data. Students describe Honors Chemistry as interesting & fun.

STEM PLTW Human Body Systems A&B Dual Honors**For grade 10**

Human Body Systems combines the PLTW curriculum with Honors Anatomy and Physiology. This course is designed to introduce students to the structure and function of the human body through a study of the 11 organ systems. The class will concentrate on three themes of study— interrelationships of body organ systems, homeostasis and complementarity of structure and function. Students will analyze the structures of the organs found within each system as a prerequisite to comprehending its function. Pathological conditions are integrated throughout the course to clarify and illuminate normal functioning. Students will take the PLTW end-of-course test. Students will receive dual honors credits for this course reflecting both Honors Human Body Systems and Honors Anatomy and Physiology on the transcript.

STEM AP Biology A&B**For grade 11**

The Advanced Placement Biology course is designed to be the equivalent of a college introductory biology course usually taken by biology majors during their first year. The AP course in biology differs significantly from the usual first high school course in biology with respect to the kind of textbook used, the range and depth of topics covered, the kind of

laboratory work done by students, and the time and effort required of students. It provides students with the conceptual framework, factual knowledge, and analytical skills necessary to deal critically with the rapidly changing science of biology. Specific topics covered include biological chemistry, cells, energy transformations, molecular genetics, heredity, evolution, classification, and organ systems, bacteria, Protista, fungi, plants, animals and ecology. This course also prepares students to take the AP Biology exam. Students must be available for WEB labs and there will be a required summer assignment.

STEM PLTW Medical Interventions A&B Honors**For grade 11**

Medical Interventions uses the PLTW curriculum. Students delve into activities like designing a prosthetic arm as they follow the life of a fictitious family and investigate how to prevent, diagnose, and treat disease. Students use current, cutting-edge biotechnology, such as PCR, during these investigations. Students will take the PLTW end-of-course test.

STEM AP Physics 1 A&B**For grade 12**

The Advanced Placement Physics 1 course is equivalent to a first-semester college course in algebra/trigonometry-based physics for non-physics majors. Emphasis is placed on the development of critical thinking skills and problem-solving ability. Course topics include Newtonian mechanics (including rotational dynamics and angular momentum); work, energy and power; and mechanical waves and sound. It also introduces electrical circuits. This course prepares students to take the AP Physics 1 exam.

STEM PLTW Biomedical Innovation A&B Honors and AP**For grade 12**

Students build on the knowledge and skills gained from previous courses to design their own innovative solutions for the most pressing health challenges of the 21st century. Students will receive dual credits for this course reflecting both Biomedical Innovations and (AP) Research IV on the transcript.

ENGINEERING PATHWAY**STEM Biology A&B Honors****For grade 9**

Honors Biology explores basic biological processes. Topics of study include inorganic and organic chemistry principles, cell structures and function, cellular processes, cellular respiration, photosynthesis, and cellular reproduction, genetics, and DNA, evolution, biological diversity and its classification, and biotechnology. Honors Biology is a laboratory-based class. Students will be involved in computer-based and traditional lab activities with an emphasis on collaborative inquiry exploration. STEM students will be working on designing and maintaining an aquaponics system using both the engineering design process as well as a biological systems approach. Students will take the state Georgia Milestones EOC at the end of the course.

STEM Intro to Engineering Design A&B Honors**For grade 9**

Introduction to Engineering Design is a year-long honors introductory course in the nationally known Project Lead the Way curriculum. The IED course teaches problem-solving skills through use of a design development process. Topics include the history of design, sketching and visualization, modeling, and documentation. Students will create and prototype 3-D models using industry standard CAD software and various manufacturing techniques. Students will learn how to properly document this entire design process. Students will take the PLTW end-of-course test.

STEM Chemistry A&B Honors**For grade 10**

Honors Chemistry is a laboratory-investigation based science class studying matter & its changes. Topics covered include periodic trends, bonding, molecular shape, polarity, chemical reactions, intermolecular forces, acids & bases, equilibrium, stoichiometry, gas relationships, electrochemistry, & energy changes. This class emphasizes analysis & application of course content. Math-based reasoning is regularly used to predict & explain data. Students describe Honors Chemistry as interesting & fun. STEM students will participate in Georgia Tech's InVenture challenge. InVenture challenges students to identify real-world problems and design novel solutions through careful analysis, creativity, and the scientific method. Top teams earn a spot in the K-12 InVenture Prize State Finals hosted at Georgia Tech.

STEM Principles of Engineering A & B Honors**For grade 10**

This survey course explores many engineering disciplines including mechanical, electrical, environmental, and computer engineering. Some specific topics explored include mechanisms, electricity, energy, statics, materials, fluids, and control systems. Using activities, projects, and problem-solving techniques, students learn first-hand how engineers and technicians use math, science, and technology in a group-focused engineering problem-solving process to benefit people. STEM POE students will design, build, and program robots as a control system and continue mastery of engineering documentation. Students will take the PLTW end-of-course test.

STEM AP Physics 1 or C: Mechanics A&B**For grade 11**

Engineering STEM students will complete a two-year course of physics study during their junior and senior years that offers options for level placement within the AP Physics curriculum based on the student meeting specific math requirements. Students concurrently enrolled in AP Calculus AB or BC have the option to take AP Physics C: Mechanics. All other students, plus calculus students who chose, will be enrolled in AP Physics 1.

AP Physics C: Mechanics is a calculus-based, college-level physics course. It covers kinematics; Newton's laws of motion; work, energy, and power; systems of particles and linear momentum; circular motion and rotation; oscillations; and gravitation.

AP Physics 1 is an algebra-based, introductory college-level physics course. Students cultivate their understanding of physics through inquiry-based investigations as they explore these topics: kinematics, dynamics, circular motion and gravitation, energy, momentum, simple harmonic motion, and torque and rotational motion.

Because of the similarity of these courses, they will be taught at the same time, allowing the STEM cohort to stay together for project-based work. While the students are learning from the same teacher in the same classroom, each student will receive credit on their transcript and take the AP Exam associated with the course they are enrolled in. The differences between the courses will be manifest in the unit exams and in the final AP Exam preparation unit at the end of the course.

STEM Aerospace Engineering A&B Honors**For grade 11**

Aerospace Engineering is an advanced year-long honors course in the Project Lead the Way Curriculum. Through hands-on engineering projects developed with NASA, students explore aerodynamics, astronautics, space-life sciences, and systems engineering. Students use a flight simulator to learn why airplanes fly, build and test airfoils in a wind tunnel, build rockets to learn about astronautics, and build robots to further explore systems engineering. Students will take the PLTW end-of-course test. (This course alternates years with STEM Digital Electronics. If a student wishes to take this class during a year the alternate is the primary course, students may take this course as an additional elective.)

STEM Digital Electronics A&B Honors**For grade 11**

Digital Electronics is a year-long, honors course in the Project Lead the Way Curriculum. This course in applied logic encompasses the application and construction of electronic circuits and devices. Students explore the 1's and 0's behind basic computer logic by using the circuit design process to create truth tables, implement basic logic gates, and use industry standard simulation software to design, test, and build digital circuitry. Students will take the PLTW end-of-course test. (This course alternates years with STEM Aerospace Engineering. If a student wishes to take this class on a year the alternate is the primary course, students may take this course as an additional elective.)

STEM Engineering Design & Development A&B Honors and AP**For grade 12**

Engineering Design and Development is the year-long capstone course in the PLTW high school engineering program. It is an engineering research course in which students work in teams to design and develop an original solution to a valid open-ended technical problem by applying the engineering design process. The course applies and concurrently develops secondary level knowledge and skills in math, science and technology. Students will receive dual credits for this course reflecting both Engineering Design & Development and (AP) Research IV on the transcript.

STEM AP Physics C: Electricity and Magnetism A&B**For grade 12**

AP Physics C: Electricity and Magnetism is a calculus-based, college-level physics course, especially appropriate for students planning to specialize or major in physical science or engineering. The course explores topics such as electrostatics; conductors, capacitors, and dielectrics; electric circuits; magnetic fields; and electromagnetism. Introductory differential and integral calculus is used throughout the course. In order to accommodate students that have not completed a course in calculus before enrolling in this physics course, this section has been designed with special instruction to present the requisite calculus in a manner that will allow engineering students of all levels to be successful.

SPECIAL CONSIDERATIONS FOR STEM STUDENTS

STEM students are encouraged to take AP Statistics.

AP Statistics

For Grades 10-12

Prerequisites: GSE Hon Geom or Accelerated Geom/Alg 2 & teacher rec

This course conforms to the College Board topics for the Advanced Placement Statistics Examination. Students learn to make decisions based on real-world data. They learn to plan studies and experiments using probability and simulation models to anticipate and predict patterns in data. Extensive use is made of calculators with statistical capabilities. This course covers four major themes: Exploratory analysis, planning a study, probability, and statistical inference.

STEM students have the option to take three years of computer science starting in the 10th grade. Non-STEM students may not begin computer science courses until 11th grade.

STEM AP Computer Science Principles A&B

For grade 10

Students are introduced to fundamental computer programming concepts, hardware, and interactive programming. Development of a logical problem-solving approach is stressed. Students gain experience in program design and development using Java programming language. The course is the equivalent of a college-level Computer Science Principles course and is preparation for the AP Computer Science Principles exam.

STEM AP Computer Science A&B

For grade 11

Prerequisite: AP Computer Science Principles

This course emphasizes Java-based objective oriented programming, problem solving, and algorithm development. Development of a logical problem-solving approach is stressed. Students gain experience in designing programs with multiple classes and class hierarchies using the Java programming language. The course is the equivalent of a first semester college-level Computer Science course and is preparation for the AP Computer Science exam.

STEM Computer Science Research – Web Design A&B

For grade 12

Prerequisite: AP Computer Science Principles & AP Computer Science

Computer Science Research uses HTML, CSS, and JavaScript to build upon the fundamental concepts learned in AP Computer Science Principles and AP Computer Science A. The course explores the historical and rapidly changing trends in web design. Through programming projects, students will gain the skills and project-based experience needed for entry into web design and development careers. Students will produce a capstone project at the end of the course that demonstrates a superior understanding of the concepts learned throughout the course.

STEM Curriculum Flowchart

	9th	10th	11th	12th
Advanced Math & Science Track	STEM AP Environmental Science	STEM AP Chemistry	STEM AP Physics C Mechanics	STEM AP Biology
	STEM Enhanced Hon Geometry/ Enhanced Hon Advanced Algebra	STEM AP Precalculus BC	STEM GSE AP Calculus BC	Multivariable Calculus or Georgia Tech Distance Calculus
			Starting with class of 2026: STEM AP Seminar	Starting with class of 2026: STEM AP Research

	STEM Honors Biology	STEM Honors Chemistry	STEM AP Physics 1/C	STEM AP Physics C: Electricity and Magnetism

STEM Advanced Math and Science, Biomedical and Engineering students enrolled in any of the following, AP Chemistry, Honors Biology, Honors Chemistry and/or PLTW courses, should expect to have labs several times each semester during WEB. STEM AP Biology students should expect to have labs during each WEB. Additionally, All STEM students should expect to participate in the Science Expo each January.

Social Studies

Three units of social studies are required including ½ unit American Government, ½ unit Principles of Economics, one unit World History and one-unit United States History

World Geography A&B

For grade 9

World Geography provides an overview of how human beings interact with their environment and introduces the idea that how we live is influenced by where we live. An awareness of similarities and differences in human needs and behaviors is developed along with an appreciation for the impact that geography has on our lives. World Geography will cover a wide variety of topics including, but not limited to demography, culture, political geography and agriculture. This course is an academic elective credit only and does not fulfill a social studies requirement for graduation.

AP Human Geography***

For grade 9

Prerequisite: teacher recommendation

The purpose of the AP course in Human Geography is to provide the students with an in-depth understanding of the earth's cultures, recent regional histories, political systems and disputes, land use patterns, and issues of sustainability. By the end of the course, each student will be able to watch the news on television and understand the issues that define our world. Students employ spatial concepts and landscape analysis to analyze human-social organization and its environmental consequences. They also learn about the methods and tools geographers use in their science and practice. The course will cover 7 general topics: demography, resources and human settlement, cultural patterns and processes, political patterns and processes, economic patterns and processes, and environmental and development issues. This course is an academic elective credit only and does not fulfill a social studies requirement for graduation.

American Government Honors**

For grade 10

Prerequisite: teacher recommendation

Honors American Government involves an in-depth study of United States political system. Students will study the founding principles and the structure of the American governmental system. They will also explore the relationship between citizens and their government. Various landmark Supreme Court rulings will be studied as students examine

their civil rights and liberties. Focus areas include: the foundation of the American government, the US Constitution and the rights of citizens, political parties and interest groups, elections and voting, and the three branches of the national government. Curriculum content has been designed for mastery and extension of state and district performance standards.

American Government

For grade 10

American Government focuses on the foundations, structure and functioning of the United States Government. The course examines the American political system including the role of state and local governments within the federal structure. Students will also explore the relationships between citizens and their government including their civil rights and liberties. Focus areas include: the foundations of the American government, the US Constitution and the rights of citizens, political parties and interest groups, elections and voting, and the three branches of the national government.

American Government 103

For grade 10

Prerequisite: teacher recommendation only; no waivers

An overview of the American political system. This course focuses on the foundation, principles and structure of the American system of government. It examines the role of political parties, social factors as they relate to the role of the citizen and analyzes the decision-making process that is a part of the system of American political behavior.

AP Government/Politics: US***

For grade 10

Prerequisite: teacher recommendation

The AP Government Program is an in-depth analysis of our political system and is equivalent to introductory level college courses in political science. Topics covered include federalism, separation of powers, influences on the formulation and adoption of the Constitution, political beliefs, political parties and elections, interest groups, institutions and policy processes, and civil liberties and civil rights. Students will be asked to develop skills in political science and apply them to real life scenarios.

AP Government: Comparative* (spring only)**

For grade 10-12

Prerequisite: AP Government US or Honors Government. Teacher recommendation required.

This course conforms to the College Board topics for the Advanced Placement Comparative Government and Politics Examination. Topics covered include sources of public authority and political power, society and politics, citizen and state, political framework, political change and an introduction to comparative politics. This course is an academic elective credit only. This course can be taken in addition to but not in lieu of an American government course.

Economics and Personal Finance Honors**

For grade 10

Prerequisite: Teacher Recommendation

Economics addresses the fundamental concepts and essential elements of the market economic system in a problem/issues orientation. Issues such as economic growth, productivity, the impact of government on the economy, foreign trade, and rights and responsibilities of individual consumers are explored. Basic principles studied include - Opportunity Costs and Scarcity, Supply/Demand analysis, competitive markets, Macroeconomics measurement, Business cycles, Inflation, Unemployment, Monetary and Fiscal Policies, Comparative Advantage and International trade.

Economics and Personal Finance

For grade 10

Economics addresses the fundamental concepts and essential elements of the market economic system in a problem/issues orientation. Issues such as economic growth, productivity, the impact of government on the economy, foreign trade, and rights and responsibilities of individual consumers are explored. Basic principles studied include - Opportunity Costs and Scarcity, Supply/Demand analysis, competitive markets, Macroeconomics measurement, Business cycles, Inflation, Unemployment, Monetary and Fiscal Policies, Comparative Advantage and International trade. The standards for a personal finance course covering personal banking, budgeting, planning for retirement, the impact of training and education and understanding interest and debt are also embedded in the course. Emphasis is placed on personal finance throughout the course and students will complete a culminating budget project at the end of the course.

AP Microeconomics***

For grade 10-12

Prerequisite: Teacher recommendation

AP Microeconomics is a college level course. Content is primarily focused on basic economic concepts, technical analysis of business costs and production, competition, market dynamics, economic measurement, and government policies. Students should be well versed in mathematical concepts and graphical analysis. This course fulfills the graduation requirement for economics.

AP Macroeconomics* (spring only)****For grade 10-12****Prerequisite: AP Microeconomics or Honors Economics. Teacher recommendation required.**

AP Macroeconomics is a college level course. The purpose of AP Macroeconomics is to give students a thorough understanding of the principles of economics that apply to an economic system as a whole. Such a course places particular emphasis on the study of national income and price-level determination, and also develops students' familiarity with economic performance measures, the financial sector, stabilization policies, economic growth, and international economics. This course includes several projects including a stock market simulation and research into the modern branches of economic thought. This course is an elective credit only and does not fulfill the requirements for graduation.

US History A&B Honors****For grade 11****Prerequisite: teacher recommendation**

This course investigates the United States, its people, institutions, and heritage. It emphasizes political, cultural, and social issues, the role of the United States as a world leader and the issues confronting the United States today. At the honors level, there is more in-depth analysis of events and sources. The students also have formal essay assignments and will take the GEORGIA MILESTONES EOC at the end of the course.

United States History A&B**For grade 11**

United States history is a survey of the development of the United States from discovery through the present. The purpose of this course is to increase knowledge, awareness, and appreciation of America's social, political, and economic evolution from colonization to its current position as a world leader. Students will take the state Georgia Milestones EOC at the end of the course.

United States History 113 A&B**For Grades 11****Prerequisite: teacher recommendation only; no waivers**

The course investigates the United States, its people, institutions, and heritage using a backwards design approach. It emphasizes political, cultural, and social issues, the role of the United States as a world leader and the issues confronting the United States today. Students will take the state Georgia Milestones EOC at the end of the course.

AP United States History A&B*****For grade 11****Prerequisite: teacher recommendation**

This course conforms to the College Board topics for the Advanced Placement United States History Examination. It covers discovery and settlement, colonial society, the American revolution, Constitution and New Republic, Age of Jefferson, Nationalism, Sectionalism, Territorial Expansion, Civil War, Reconstruction, Industrialization, progressive Era, World War I, Depression, New Deal, World War II, The Cold War through modern times. Heavy emphasis is placed on analytical and writing skills. Students will take the AP exam at the end of the course.

World History A&B Honors ****For grade 12****Prerequisites: teacher recommendation**

This course is a survey course emphasizing the study of global cultures and history. The course begins with premodern world history circa year 1200 through the modern age. The course explores the political, cultural, and economic heritage of civilizations as they change throughout time. Course content includes the emergence of nations through the development of science, communications, technology, and the emergence of interdependence of nations in the 20th and 21st centuries. This course also emphasizes the historical process through writing, analysis of primary source material, and reading comprehension.

World History A&B**For grade 12**

World History is a survey of people and nations of both Western and non-Western civilizations. This course explores the political, cultural, and economic heritage of civilizations from 1200 CE to present. Emphasizes the political, cultural, economic, and social development and growth of civilizations. Covers the development of change beginning with Second Wave civilizations, the emergence of nations through trade/communications, intellectual development, scientific/technological development, emergence of nation states, nations in conflict and the emerging interdependence of nations in the twentieth century.

World History 123 A&B**For Grade 12**

World History is a survey of people and nations of both Western and non-Western civilizations. This course explores the political, cultural, and economic heritage of civilizations from premodern world history circa year 1200 to the modern time. Course content begins with a brief overview of ancient history and then expands in more detail through the building of empires, the emergence of nations through trade/communications, intellectual development, scientific/technological

development, emergence of nation states, nations in conflict and the emerging interdependence of nations in the twentieth century. This course also emphasizes reading comprehension and introductory analysis of primary source material.

AP World History: Modern A&B*****For Grade 12****Prerequisite: Teacher recommendation**

The purpose of the AP World History: Modern course is to develop a greater understanding of the evolution of global processes and interaction with different types of human societies. The course highlights the nature of changes and continuities in international frameworks, their causes and consequences, as well as comparisons among major societies. The course emphasizes relevant factual knowledge deployed in conjunction with leading interpretive issues and types of historical evidence. Focused primarily on the past eight hundred years of the global experience, the course builds on an understanding of cultural, institutional, and technological precedents that, along with geography, set the course of human development in the modern era.

Current Issues**For Grades 11-12**

An in-depth examination of contemporary local, state, national and international issues. The main purpose of this course is to assess and analyze social, political, and economic issues involved in current events. Much of this class is discussion based on Internet and newspaper research.

Honors Psychology****For Grades 11-12**

Psychology attempts to understand the reasons for why people think and behave the way they do. This course includes learning about methods of conditioning, the biology behind behavior, our cognitive and social development from birth through adulthood, understanding abnormal behaviors and psychological disorders, as well as the impact of society on how we act and see ourselves in the world. This course includes a few projects, including a self-reflection that asks students to apply course concepts to better understand themselves.

AP Psychology*****For Grades 11-12****Prerequisite: teacher recommendation**

AP Psychology covers the principles of each of psychology's major subfields and studies the methods psychologists use in research and practice in alignment with the AP curriculum. Students develop a deeper understanding of the human mind and behavior through class discussions, demonstrations and the review of famous experiments. Topics include the biological basis of behavior, sensation, perception, learning, memory, cognition, personality, and abnormal and social psychology.

Sociology**For Grades 10-12**

Sociology is designed to examine the importance of sociology as a social science and will explain the corresponding theories and theorists. Students will examine culture and its correlation to society, as well as agents of socialization such as the family, peer groups, and the media. Students review social groups, social structures, life stages, and gender roles in relation to society. The focus of the course is to demonstrate how human behavior and interaction is key to understanding how societies function.

AP African American Studies**For Grades 11-12**

AP African American Studies is an interdisciplinary course that examines the diversity of African American experiences through direct encounters with varied sources. Students explore key topics that extend from early African kingdoms to the ongoing challenges and achievements of the contemporary moment. Given the interdisciplinary character of African American Studies, students in the course will develop skills across multiple fields, with an emphasis on developing historical, literary, visual, and data analysis skills. This course foregrounds a study of the diversity of Black communities in the United States within the broader context of Africa and the African diaspora.

AP European History A&B*****For Grades 10-12****Prerequisite: teacher recommendation**

This course conforms to the College Board topics for the Advanced Placement European History Examination. Topics covered include intellectual and cultural history, political and diplomatic history, and social and economic history of Europe from the Renaissance to the present day.

AP Art History A&B***

For Grades 10-12

Prerequisite: none

This course conforms to the College Board topics for the Advanced Placement Art History Examination. Students investigate art in its cultural context from pre-history to the current day, including European, American, Asian, African, and Pacific Islander. No art-making skill required.

Ethnic Studies

For Grades 10-12

This course is designed to promote discussion about diversity issues within American society. The course will focus on ethnic differences and the impact these differences continue to have on the respective populations and American society. The goal of the course is to promote enlightened perspectives about the eclectic society in which we live as well as foster a more tolerant school community. The course utilizes a wide array of primary and secondary source material to encourage students to form more objective opinions of a myriad of topics of concern in modern American society.

Technology & Society

For Grades 10-12

This course will expose students to the variety of ways in which our different forms of media and technology reflect and influence the issues of our society. We will examine how film, television, social media, and podcasts address the world we live in and how, in turn, the consumption of said media influences how we interact with society. The course will consist of the viewing and analysis of multiple films, television programs, articles, and other forms of online media to allow the students to make connections regarding how social issues are represented in the new digital world.

Sports in United States Society

For Grades 10-12

The Sports in United States Society course examines the vital sociological role of sport in the making of United States society and culture, and vice-versa. The course analyzes the reasons for and popularity of youth, high school, collegiate, and professional sports and the interrelationship between sports and other social institutions, such as the economy, education, media, and politics. Inequalities and deviance in society that are reflected in sports are discussed, along with social progress championed through sports. Current issues and controversies in sports that are a microcosm of society are also presented.

World Languages

Our World Language department offers a complete program in Chinese, French, Latin and Spanish. A total of three units is required from Career Technical Ed, Modern Language, Latin and/or Fine Arts. Students planning to enter or transfer to a University System of Georgia Institution or other post-secondary institution must take at least two units of the same modern language or Latin.

Levels I, II, III, and IV of the modern languages offered at Walton are for students who are learning these languages as a Foreign Language. Native and Heritage speakers wishing to study their native language at Walton will be placed on a case-by-case basis depending on their skill development levels. These students may instead prefer to study another modern language.

Latin 1 A&B

For Grades 9 –12

This course introduces students to the Latin language and ancient Roman civilization. It emphasizes the skills needed to read Latin literature. The approach used is a reading approach in which grammar is taught in context, and as an aid to, reading comprehension.

Latin 2 A&B

For Grades 9-12

Prerequisite: Latin 1

This course enhances Level I skills and provides opportunities to translate longer, more challenging passages. This course is the second half of a two-year sequential course, which develops the skills needed to read Latin literature.

Latin 3 A&B Honors**

For Grades 10-12

Prerequisite: Latin 2

This course enhances previously learned skills and introduces original works by Latin authors. The works of the authors may be selected in any order for courses designated at the third, fourth- and fifth-year levels. Latin III traditionally focuses on prose literature of the late Republic and early Empire. Grammar is taught in the context of the readings.

AP Latin A&B***

For Grades 11-12

Prerequisite: Latin 3

This course conforms to College Board required reading for the Advanced Placement Latin Examination. It covers Virgil's *Aeneid* as well as Caesar's *de Bello Gallico* and emphasizes the ability to translate accurately, to interpret critically, to read aloud with attention to pauses and phrasing, to scan Latin hexameter verse, and to demonstrate mastery of Latin syntax through written translations.

Latin 5 Honors A & B***

For Grade 12

Prerequisite: AP Latin

This course provides students with the opportunity to experience some of the finest and most influential works of the Latin corpus, and indeed, of world literature. Students can expect to read works by Ovid, Catullus, Caesar, Cicero, Tacitus, Suetonius and others. Emphasis is placed on critical reading, interpretation, and discussion of the literature and on understanding it in historical context.

Chinese 1 A&B

For Grades 9-12

This Level I language course focuses on the development of communicative competence in the target language and understanding the culture of the people who speak the language. It assumes that the students have minimal or no prior

knowledge of the language and culture. The major means of communication between the students and instructor is in the target language. The course content includes how to greet and take leave of someone, to ask and respond to basic questions, to speak and read within a range of carefully selected topics and to develop an understanding of Chinese-speaking cultures.

Chinese 2 A&B

For Grades 9-12

Prerequisite: Chinese 1

The Level II language course focuses on the continued development of communicative competence in the target language and understanding of the culture(s) of the people who speak the language. It assumes that the students have successfully completed a Level I course. Students begin to show a greater level of accuracy in communicating their immediate world and daily life, read materials on familiar topics, and write short, directed compositions. The major means of communication between students and instructor is the target language. It continues to provide practice in how to greet and take leave of someone, to ask and respond to basic questions, and to speak and read within a range of carefully selected topics.

Chinese 3 A&B Honors**

For Grades 11-12

Prerequisite: Chinese

The Chinese Level III course is an intermediate course conducted primarily in Chinese that emphasizes the development of reading, writing, listening, and speaking skills acquired through the student of new grammatical structures, vocabulary and idioms within the context of a specific theme and country. The textbook is used as the primary source. Students will also be exposed to a variety of supplementary materials such as music, film and internet websites.

Chinese 4 A&B Honors***

For Grade 11-12

Prerequisite: Chinese 3

The Chinese Level IV course will help students to develop the ability to express themselves with relative ease and greater proficiency on a variety of topics in both oral and written language. Readings (literary works, articles, and biographies) are utilized to generate oral and written expression as well as to expand vocabulary, grammatical knowledge and cultural understanding. The course, conducted primarily in Chinese, is intended for students who want to continue to develop a strong foundation in the language so that they may communicate effectively in the target language, improve their communication skills and cultural awareness.

Chinese 5 A&B Honors***

For Grades 9-12

Prerequisite: Chinese 4 or Native Speaker

The Chinese Level V course will not only support students' ability to express themselves with ease and proficiency on a variety of topics in both oral and written language but also aim for students to develop the ability to understand spoken Chinese in various contexts. The course embeds various Advanced Placement level topics with emphasis on using the language for active communication. Additionally, it supports student readiness to take the rigorous AP Chinese Language and Culture course the following academic year.

AP Chinese Language and Culture A&B***

For Grades 9-12

Prerequisite: Chinese 4, 5 or Native Speaker

AP Chinese Language conforms to College Board topics for the Advanced Placement Chinese Language Examination. The course emphasizes using the language for active communication and has for its objectives the development of the ability to understand spoken Chinese in various contexts, the development of Chinese vocabulary sufficient for reading newspapers and magazines, literary texts, and other non-technical writing, and the development of the ability to express oneself coherently, resourcefully and with reasonable fluency and accuracy in both written and spoken Chinese.

Chinese 6 A&B Honors***

For Grades 10-12

Prerequisite: AP Chinese

The Chinese Level VI course is mainly offered to students who have taken the AP Chinese Language and Culture course in prior years. The course is completely taught in Chinese and students who take this course are proficient in their Chinese speaking, listening, reading, and written skills. The course focuses on Chinese culture and literature with the goal of presenting one's Chinese language and culture knowledge in an authentic and culturally appropriate manner. A variety of authentic materials such as newspapers and magazines, books, movies, poetry, and audio recordings will be presented, discussed, and created in this course.

French 1 A&B**For Grades 9-12**

The Level I language course focuses on the development of communicative competence in the target language and understanding the culture of the people who speak the language. It assumes that the students have minimal or no prior knowledge of the language and culture. The major means of communication is in the target language. The course content includes how to greet and take leave of someone, to ask and respond to basic questions, to speak and read within a range of carefully selected topics, and to develop an understanding of French-speaking cultures.

French 2 A&B**For Grades 9-12****Prerequisite: French 1**

The Level II language course focuses on the continued development of communicative competence in the target language and understanding of the culture(s) of the people who speak the language. Students begin to show a greater level of accuracy when using basic language structures, and they are exposed to more complex features of the language. They continue to focus on communicating about their immediate world and daily life activities, read material on familiar topics, and write short, directed compositions. The major means of communication is in the target language.

French 3 A&B Honors****For Grades 10-12****Prerequisite: French 2**

The Level III language course focuses on the continued development of communicative competence in the target language and understanding of the culture(s) of the people who speak the language. Students use basic language structures with accuracy and recombine learned material to express their thoughts. They are exposed to more complex features of the language, moving from concrete to abstract concepts. The major means of communication is in the target language.

French 4 A&B Honors*****For Grades 11-12****Prerequisite: French 3**

The Level IV language course focuses on the continued development of communicative competence in the target language and understanding of the culture(s) of the people who speak the language. During this course, they gain confidence in recombining learned material of the language, creating in the language to express their own thoughts, interacting with other speakers of the language, understanding oral and written messages in the foreign language, and making oral and written presentations in the target language. They are exposed to more complex features of the language, moving from concrete to more abstract concepts. In addition, the students will develop the ability to read, analyze, and discuss perceptively representative works of French Literature.

AP French Language & Culture A&B*****For Grade 12****Prerequisite: French 4**

The AP French Language & Culture course conforms to the College Board themes for the Advanced Placement French Language Examination: global challenges, science and technology, contemporary life, personal and public identities, families and communities and beauty and aesthetics. It emphasizes the use of language for active communication and has for its objectives the development of interpretive communication through written, audio, visual, and audiovisual texts, spoken and written interpersonal communication, and spoken and written presentational communication. While communicating in French, students explore culture and events in both contemporary and historical settings and examine products and practices of the Francophone culture.

Spanish 1 A&B**For Grades 9 –12**

The Level I language course focuses on the development of communicative competence in the target language and understanding the culture of the people who speak the language. It assumes that the students have minimal or no prior knowledge of the language. The course content includes how to greet and take leave of someone, to ask and respond to basic questions, to speak, write and read within a range of specific topics, and to develop an understanding of Spanish-speaking cultures. The major means of communication between students and instructors will be in the target language.

Spanish 2 A&B**For Grades 9-12****Prerequisite: Spanish 1**

The Level II language course focuses on the continued development of communicative competence in the target language and understanding of the cultures of the people who speak the language. Students begin to show a greater level of accuracy when using basic language structures, and they are exposed to more complex grammar as well as expansions in vocabulary topics learned in Level 1. They continue to focus on communicating about their daily life activities, read material on familiar topics, and write short, directed compositions. The major means of communication between students and instructors will be the target language.

Spanish 2B Honors**For Grades 9-12****Prerequisite: Spanish 2A & Teacher recommendation; no waivers accepted.**

This course is by teacher recommendation only. The Spanish 2B Honors course focuses on the advanced development of communicative competence in the target language and understanding of the cultures of the people who speak the language. Students begin to show a greater level of accuracy when using basic language structures, and they are exposed to more complex grammar as well as expansions in vocabulary topics learned in Level 1. They continue to focus on communicating about their daily life activities, read material on familiar topics, and write short, directed compositions. The major means of communication between students and instructors will be the target language. This course is for highly motivated students with strong language skills who will go on to complete both AP Spanish Language and AP Spanish Literature before graduating high school.

Spanish 3 A&B Honors****For Grades 10-12****Prerequisite: Spanish 2**

The Level III language course focuses on the continued development of communicative competence in the target language and understanding of the cultures of the people who speak the language. Students use basic language structures with accuracy and recombine learned material to express their thoughts. They are exposed to more complex features of the language, moving from concrete to some abstract concepts. The major means of communication between students and instructors will be the target language.

Pre-AP Spanish 3 A&B Advanced Honors****For Grades 10-12****Prerequisite: Spanish 2B Honors & teacher recommendation**

This course is an extremely accelerated course in which students will cover Spanish III and Spanish IV in one year. This course is for highly motivated students with strong language skills who will go on to complete both AP Spanish Language and AP Spanish Literature before graduating high school. The major means of communication is in the target language.

Spanish 4 A&B Honors*****For Grades 11-12****Prerequisite: Spanish 3**

The Level IV language course focuses on the continued development of communicative competence in the target language and understanding of the cultures of the people who speak the language. They gain confidence in applying learned material of the language to express their own thoughts, interact with other speakers of the language, understand oral and written messages in the foreign language, and make oral and written presentations in the target language. They are exposed to more complex features of the language. Students are able to understand material presented on a variety of topics related to contemporary events and issues in the target language. The major means of communication is in the target language.

Spanish 5 A&B Honors*****For Grade 11-12****Prerequisite: Spanish 3 Advanced, Spanish 4 & teacher recommendation**

The Level V language course focuses on the continued development of communicative competence in the language and understanding of the culture(s) of the people who speak the language. Students will focus on reading, writing, listening, and speaking while refining grammar and expanding vocabulary. Students continue to gain confidence in recombining learned material of the language, while continuing to create, interact with other speakers, understand oral and written language, and make presentations. They will manipulate more complex features of the language, including more abstract concepts. Students can understand material presented on a variety of topics related to contemporary, historical, and literary events and issues in the target culture(s).

AP Spanish Language & Culture A&B*****For Grades 11-12****Prerequisite: Spanish 4 or Spanish 3 Advanced & teacher rec.**

This course conforms to the College Board topics for the Advanced Placement Spanish Language Examination. It emphasizes the ability to comprehend formal and informal spoken Spanish, to acquire the vocabulary and grasp of structure to read newspapers, magazines, and Hispanic literature to compose expository passages, and to speak accurately and fluently. The major means of communication is in the target language.

AP Spanish Literature & Culture A&B*****For Grade 12****Prerequisite: AP Spanish Language**

This course conforms to College Board required authors and selected works for the Advanced Placement Spanish Literature Examination. It emphasizes the ability to understand a lecture in Spanish and discuss literary topics in Spanish, to read Hispanic literary texts in all genres, and to analyze critically from and content of literary works orally and in writing using appropriate terminology.
