

Allergens List

This information is subject to change by the manufacturer at any time; therefore, we cannot guarantee the accuracy of this information. In addition, USDA products may become available at anytime during the year and may replace a purchased item; product brands may change during the year as new bids are approved; schools may be using inventory from a previous bid or manufacturer; and recipes may change during the school year. Although there are many potential food allergens, this list only addresses the most common ones (The Big 9). Also, an item could inadvertently come in contact with an allergen during the manufacturing process that is not listed below. This list should be used as a tool to help manage your child's food allergies. If your child has a life-threatening allergy, please consult with your school nurse. Items sold a la carte are included at the bottom of the report.

X=the allergen is found on the product's ingredient list.

Updated 1/16/2025

Recipe Name	Stock Description	Dairy	Egg	Fish	Peanuts	Sesame	Shellfish	Soy	Soybean Oil	Treenuts	Wheat
