# CCSD Wireless Instructions: Mac OS

The following are directions for connecting your **PERSONAL** Mac OS device (MacBook, MacBook Pro and MacBook Air) to the CCSD Secured Wireless Network. You must complete **all three sections** and **follow all steps** for the Internet to work properly: Connect to Wireless, OnBoarding Verification, and Certificate Download.

Connect to Wireless

1. Go to your WiFi settings and select the **CCSDWireless** network.

2. You will need to enter the **Password** provided by your local school's Library Media Specialist, Lab Manager, School Administrator, or TTIS.

3. Check **Remember this network**.

4. Click **Join**.

5. Open a web browser (i.e. Safari, Chrome) and navigate to login.cobbk12.org.

6. If prompted to save your password, select **Never for This Website**.
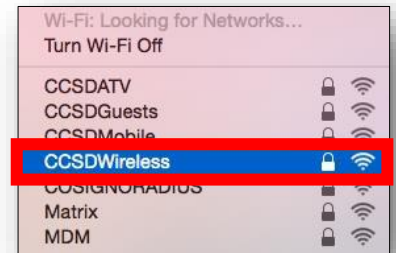

OnBoarding Verification

7. Sign in to CCSDWireless using your **badge ID** (for staff) or **lunch number** (for students) and **Network Password**. *Note: Network password is the same password used to access any school computer. Remember to check the Acceptable Use Policy after reading the terms.*

Certificate Download

8. You will be redirected to the SSL Certificate Page. Click the **gold key** to install the SSL Certificate.
   Note: If you are not redirected to the SSL Page, open a web browser, and go to cert.cobbk12.org.

9. Press **Command + Space bar** to open Spotlight.

10. In the spotlight search, enter **Keychain Access**.

11. Under Keychains, select **System**.

12. From the Keychain Access Menu, select **File**.

13. Select **Import Items**.

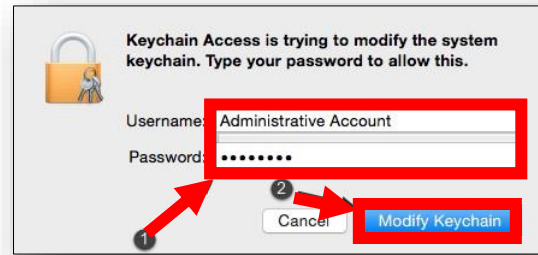

14. Under Favorites, select **Downloads**.

15. Select the file named **ccsdfg_sha2.der**.

16. Click **Open**.

17. To modify the system keychain, you must enter your device's **Username** and **Password**.

18. Click **Modify Keychain**.

19. Double-click the **CCSD FortiGate Root Authority** certificate.

20. Change the option for When using this certificate to **Always Trust**. Then close the dialog box.

21. Before the certificate trust settings are applied, you will need to reenter your device's **Username** and **Password**.

22. Click **Update Settings**.

23. Navigate to a secure HTTPS site like www.yahoo.com, www.google.com or www.bing.com. Verify that the page displays properly.
