Career, Technical and Agricultural Education will prepare students to become college and career ready to compete in a global workforce through exploration, experience and extension.

Campbell's Career, Technical and Agricultural Education Program will empower students to successfully participate and compete in a dynamic global workplace. To this end, the curriculum focuses on:

- infusion of rigorous and relevant academic instruction
- application of essential global emerging technologies
- early identification of career cluster opportunities
- career employability and economic/living skills
- preparation for post-secondary studies and lifelong learning

What is Career, Technical and Agricultural Education

Campbell High School offers several CTAE Career Pathways that consist of three sequenced courses, an end of pathway assessment (EOPA), and credentials that align with national and statewide skills certifications.

Benefits of a CHS CTAE Pathway Completer

Complete all 3 Level courses in a pathway, pass the EOPA, and a student will receive a Pathway Completion Certificate, graduation cord, and the student's name will be placed on a Campbell HS CTAE banner of pathway completers by school year displayed in the school. Each Pathway may offer additional credentials.
