

SUMMER LINK

Science (K-8) Help your child to enhance his environmental skills with a gardening project. The website provides a simple way to learn about gardening, composting, nature, and environmental concepts. If you do not have a large area of land or an established garden, you can still try these activities with your child. Consider starting a small garden in your yard, a container garden, or even simply growing one plant indoors. You can even pay some visits to a community garden as well! Visit the website for more details:
