Math (K-8) What time is it?

[https://www.education.com/activity/article/clock\\_first/](https://www.education.com/activity/article/clock_first/)

It's time for your child to make a clock to help them [learn to tell time](#), that is. Mastering this skill may seem hard at first, but with hands-on practice, students strengthen their understanding of how clocks work. Here's a fun activity that lets kids create a [clock](#) of their own, and then see the importance of time in real-world events, like a soccer game! Challenge kids to think outside the digital box with these analog clock activities.
