EcoScience

Love 2 Learn

NEW ECO-SCIENCE AFTERSCHOOL PROGRAM

A dynamic and interactive program to transition the best helpers into independent leaders/entrepreneurs with take home projects.

Semesters will include three *Themes for ultimate engagement and challenge. Whether students are beginners or seeking a challenge, we will provide customized lessons and take-home projects for each theme. Students will have fun, learning lifelong skills in our interactive Eco-Science program.

Craft & Create – Students will learn craftsmanship and creation techniques by building and taking home one item such as a car, bird house, possession keeper, and gadgets.

Culinary - Students will explore cooking measurements, ingredients, tools/ techniques with optional/nut free class tastings and take-home recipes.

Fun Finance – Students will learn principles of saving and spending money with interactive purchasing exercises. Students will receive a piggy bank to take home.

Farm 2 Table – Students will learn gardening techniques/tools, seasonal crops and start a garden to take home and love.

Stitch & Style - Students will discover sewing techniques like close/open loops and complete a pillow, emoji-con, t-shirt and other projects to take home.
