

# High School Registration

Eighth grade students will register for high school in the spring (February/March timeframe). The grades that students make during the first semester of the eighth grade school year and the current math level determine placement in high school courses and special programs. When a grade average is used as criteria for the high school credit option, only the eighth grade average is used. Academic teachers will select the appropriate courses to recommend for English, math, science, and social studies. Parents and students will choose the elective courses and have final approval of classes chosen. A ninth grade orientation should be held at the high school previous to registration to help with any questions regarding the specifics of the school's policies.

It is very important that you become familiar with high school course offerings and programs during the eighth grade year. Generally, a course catalog or registration website is available on each high school's webpage. This provides a means for parents/families and students to ask important high school questions throughout the school year PRIOR to registration time.
