## LEARNING

The Cobb County School District is committed to providing your child an academic experience that will develop his or her knowledge and skills at every grade level and to ensure a strong foundation is established for your child to reach his or her greatest potential. Our teaching is aligned with content standards and our teachers bring those standards to life for your child through various strategies designed to meet your child's learning strengths and needs.

In Cobb County classrooms, students are immersed every day in learning experiences based on exploration, problem-solving, and critical thinking in all content areas, including the core areas of English Language Arts, Mathematics, Social Studies, and Science; and in specialized academic content including Health, Music, Physical Education, Technology, Visual Arts, and World Languages\*. Quality teaching guides your child's educational experience from kindergarten to graduation and into life. The link above will take you to an overview of what your child will be learning this year. \*Programming availability varies at local schools

## ASSESSING

Your child will have a variety of classroom assessments that will aid his or her teacher in knowing how to provide the best possible instruction for your child. These assessments will also help you know how well your child is learning and what extra support may be needed. In addition, your child will participate in some standardized assessments that are used to gauge how well your child is doing in his or her grade level.

In Kindergarten, teachers assess student progress using the Georgia Kindergarten Inventory of Developing Skills (GKIDS 2.0). The GKIDS 2.0 helps teachers identify the strengths and needs of your child, and teachers can adjust their instruction so learning is personalized for each student.

All students in grades K-9 participate in the universal screening process for reading and math using a computer adaptive assessment. In Kindergarten, the assessment measures foundational reading skills, such as letter/word identification, word recognition skills, and phonological awareness. As students become proficient with these skills, they are introduced to connected text and assessed on comprehension and vocabulary.
