

the **STEAM** club

Maker's Workshop

After School Enrichment Classes

The STEAM Club is built on the idea that creating and exploring are the roots of innovation! Our Maker's Workshop embodies this concept to the fullest. Using a wide variety of supplies and tools, your student will create 3-dimensional masterpieces each week. These builds will engage problem-solving skills, engineering concepts and imagination! Your student's confidence will soar as they turn everyday materials into amazing art! Many projects and concepts are inspired by the latest trends on popular crafting and social media outlets, so our curriculum is fresh and exciting each session!
