

Math Team

What is it?

The Harrison High School Math Team is a place for students to grow and experience the fun of mathematics with others who share the same interest. Anyone can join math team regardless of grade or GPA. Everyone has a place on the team! We engage in several activities including Pi Day, competitions, Trunk or Treat, tutoring, and more. Join to make new friends, improve your math skills, compete and challenge yourself, and look great on college applications.

When do we meet?

We do not have a set frequency for meetings; however, we meet occasionally to discuss upcoming events, point opportunities, and other important information.
