Principal's Advisory Committee (PAC) members were able to see a presentation of the schools CCEPA Program, CTAE Pathways, and academic data of the school. Dr. Giles had visual examples of how the school is performing academically and what areas we need to improve upon. She also asked participants to partner with the school through the PTSA to provide greater support and financial assistance to the school. Dr. Hayden was very detailed in her discussion of possible collaboration with community members on industry standards and how this could enhance our CTAE Pathways that are taught at the school. Members were able to have a delicious brunch after the presentation by our Culinary Department and network with each other to see how our school-community partnership can be strengthened.
