

POPE HIGH SCHOOL
MASTER COURSE GUIDE
2026-2027

Pope High School Master Course Guide

In this course catalog, you'll find the information you need to begin planning for high school. Please read course descriptions carefully to make informed decisions. Teachers will recommend placements in core subjects, but students should understand the expectations of each course. Because high school classes are year-long, students are expected to honor their selections. If you have questions about a recommendation, please speak with the teacher.

At Pope High School, we encourage students to maintain balance in their schedules. Choose rigorous courses in areas that genuinely interest you, and keep extracurricular commitments in mind when registering. Our goal is for every school year to be a successful and well-balanced experience.

Balance is key to ensuring the most optimal learning experience.

- **Academic course recommendations** are based on your grades, test scores, and classroom performance. While we encourage students to challenge themselves, please be cautious when selecting a course different from your teacher's recommendation. **A waiver is required** for non-recommended courses – to move up and down a level. School personnel are not obligated to modify coursework, provide extra help beyond what is offered to all students, or make schedule changes during the year.
- **Courses are offered based on student interest.** If there are not enough requests for a class, the course will be dropped.
- **Review all prerequisites** in the course catalog. Departments have carefully determined the skills needed for success. Please aim for academic balance when selecting core and elective courses.
- **Ask questions!** Teachers can advise on appropriate course levels, and counselors can guide you on graduation requirements.
- **Have a great school year—and Go Hounds!**

Graduation Requirements

All students will be required to complete a minimum of **23 units for graduation**. All students must complete:

<ul style="list-style-type: none">• 4 units of English• 4 units of Science• 4 units of Mathematics• 3 units of Social Studies	<ul style="list-style-type: none">• 3 units from: World Language* and/or CTAE and/or Fine Arts**• 4 units additional electives• $\frac{1}{2}$ unit health• $\frac{1}{2}$ unit personal fitness
--	---

See detailed graduation requirements posted on the Pope Website.

World Language – Students planning to enter or transfer into a University System of Georgia school **must complete at least two units of the same world language**. Some colleges may require more. Students should check each college's website for current admission requirements. World Language courses count in HOPE GPA calculations.

Fine Arts and/or CTAE – Some colleges may require additional units, such as Fine Arts or computer-focused courses. Students are responsible for checking each college's website for up-to-date admission requirements.

Pathways:

Effective with the Class of 2017, the Georgia Board of Education has identified pathway opportunities in one of the following areas:

- **Advanced Academic Pathway:** Students complete courses required for graduation in any of the core content areas (English, mathematics, social studies, or science) including one course at the Advanced Placement (AP) or dual enrollment levels. Additionally, students must earn credit in two sequential courses in the same world language course.
- **World Languages Pathway:** Students complete three (3) sequential courses in one world language.
- **Fine Arts Pathway:** Students complete three (3) sequential courses in Band, Chorus, Orchestra, Theater, or Visual Arts.
- **CTAE Pathway:** Students complete three (3) or four (4) sequential classes in an approved CTAE Pathway.

Academic Information

Pope High School follows a traditional academic schedule with a 7-period day of year-long courses. Students are scheduled for six courses and one lunch period. Students can earn 3 credits each semester totaling 6 credits for the school year. Students do not change courses at the semester. Courses are year-long. **The master schedule is built in the Spring of the previous school year and is based on student requests at that time. Since all courses are year-long, mid-year changes requests are not accepted.**

Pope High School also schedules an Academic Opportunity (AO) period which is incorporated as part of the schedule on Tuesdays and Thursdays. On Wednesday afternoons, X-Block is scheduled (unless otherwise communicated to students and parents) into two parts:

- 2:10 Students can dismiss immediately if parents have signed and submitted the X-block permission slip.
- 2:15-2:50 - Tutoring or club activities. At 2:50, students must immediately leave campus OR report to the Greyhound Theater if they are waiting for the bus.
- 2:55-3:30 is designed for professional development time for teachers.

Grade Scale

Grade	Scale	GPA points
A	90 – 100	4
B	80 – 89	3
C	74 – 79	2
D	70 – 73	1
F	69 or below	0

An additional .5 is awarded each semester to grades earned in honors level courses. Advanced Placement (AP) classes receive 1.0 additional points each semester to grades earned. To receive the additional quality points on a course grade, the student must pass and earn credit for the course.

Middle School-High School Academic Credit

Middle school students can earn high school credit in math, science, world language, business, and visual art. These courses appear on the high school transcript with the numeric grade earned but do not count toward GPA. Once credit is earned, the course cannot be retaken.

Promotion and Retention

Per Cobb County School District policy, students must meet the *minimum* requirements identified below for grade promotion.

- **10th grade:** 5 units of credit including one credit in English, math, and science
- **11th grade:** 10 units of credit including two credits in English, math, and science
- **12th grade:** 16 units of credit (17 credits are required at the start of 12th grade) including three credits in English, math, and science

Athletic Eligibility

All first-year freshmen are eligible to participate in sports during Fall semester. To maintain eligibility, a minimum of 2.5 credits must be earned each semester.

Final Exams

Final exams are given during the last four days of each semester. If a student is absent, they have 10 school days from the start of the next semester to make it up. A grade of zero is recorded until the exam is completed. Students are responsible for scheduling makeup exams.

Milestone Assessments

Effective the 2020-2021 school year, Milestones (End of Course tests) will be administered in the following courses: Algebra, Literature and Composition II (as of 2025-2026 SY), Biology, and United States History (for non-Advanced Placement and Dual Enrollment students). The GaDOE determines the weight of the assessment as part of a student's final course grade.

Cobb Virtual Academy Classes

CVA online courses require an application and school approval. The Curriculum Office reviews each application, considering the student's academic history, maturity, motivation, and executive functioning to ensure success. CVA courses may be taken OFF CAMPUS, ONLY at the start or end of the school day. Students are responsible for transportation and cannot remain on campus for the course. See your counselor for the CVA contract.

Research indicates that students who are enrolled in computer assisted instruction, web-based learning, distance education, and student-controlled learning programs (such as on-line classes) are not learning as successfully as students who receive direct instruction and academic support (*Visible Learning*; John Hattie, 2009). In addition, accelerated interventions, enrichment opportunities, and academic support may not be provided with online courses.

Applications will be available during Core Registration and **are due Friday, March 6, 2025, by 3:00 to the Pope School Counseling office.**

Course Descriptions

English			
Course Title	Course Description	Pre-Requisites	Grade
ESL ENGLISH	This course is designed for the student for whom English is a second language. This course integrates basic English grammar and vocabulary by emphasizing comprehension and production of spoken and written English. This course focuses on interpersonal communication skills and United States culture. Students enrolled in this course hold active designation for ESL services. This course does NOT meet graduation requirements.	Teacher Recommendation ACCESS Test Score	9-12
LITERATURE AND COMPOSITION I A&B	This is a college prep course which integrates composition, grammar and literature in a variety of genres. It covers the writing process: planning drafting, revising, editing and proofing. The development of vocabulary, speaking, listening, and researching skills will be included. Parallel readings will include specific readings assigned during the term.	None	9
HONORS LITERATURE AND COMPOSITION I A&B	This course is an accelerated college prep course designed for the student who has a serious interest in the interpretation of literature. It integrates writing, grammar and usage, speaking and listening. It includes reading a variety of genres (short stories, novels, tales, poetry, mythology, drama and nonfiction) and emphasizes oral and written response to literature, distinguishing characteristics of various genres and vocabulary study. Research skills and a research paper are required. Parallel readings will include specific readings assigned during the term and required summer readings.	Teacher Recommendation	9
LITERATURE AND COMPOSITION II A&B Milestone course	This course is a survey course of global works of literature with an emphasis on American & British works. Student writing will include many types of persuasive writing and analysis of literature. Structure and style will vary from informal to formal writing and will include study of the steps included in a formal research project with an annotated bibliography, literary terms, vocabulary study, composition techniques, speaking and listening activities. Parallel readings will include specific readings assigned during the term.	Lit and Comp I	10
HONORS LITERATURE AND COMPOSITION II A&B Milestone course	This college prep course is an accelerated survey course of American & British works and authors from the Anglo-Saxon through. Specific literature will be selected from anthologies appropriate for Honors readers. Because this course is designed to prepare students for Advanced Placement English, critical reading and writing skills will be emphasized. Students writing will include types of persuasive writing and an emphasis on analysis of literature. Structure and style will vary from informal to formal writing and will include study of the steps included in a research paper and a formal research paper. Literary terms, vocabulary study, composition techniques, and speaking and listening activities will be included. Parallel readings will include specific readings assigned during the term and required summer readings.	Teacher Recommendation And Lit and Comp I	10
LITERATURE AND COMPOSITION III A&B	This course is designed for the college-bound student. The course will survey American & British works and authors and will provide writing experiences particularly exposition, literary analysis and a formal research paper. Grammar, vocabulary development, listening, speaking, and research will also be included. Parallel readings will include specific readings assigned during the term.	Lit and Comp II	11
HONORS LITERATURE AND COMPOSITION III A&B	This course is an accelerated college prep course designed for the student who has a serious interest in interpreting literature. The course will survey American & British works and authors and will provide writing experiences particularly exposition, literary analysis and a formal research paper. Grammar, vocabulary development, listening, speaking, and research will also be included. Parallel readings will include specific readings assigned during the term and required summer readings. This course has a required summer assignment.	Teacher Recommendation And Lit and Comp II	11

LITERATURE AND COMPOSITION IV A&B	This course is designed for the college-bound student who wishes to refine his writing skills in order to prepare himself for the level of writing expected in most college courses, regardless of discipline. It provides review and further exploration of the writing process, including planning, drafting, and revising, and emphasizes research skills and various elements of essay composition. The course focuses on argument, informative/explanatory, and narrative writing as well as style, voice, and grammatical structure, including mechanics and usage	Lit and Comp III	12
HONORS LITERATURE AND COMPOSITION IV A&B	This course is designed for the college-bound student who wishes to refine his writing skills in order to prepare himself for the level of writing expected in most college courses, regardless of discipline. It provides review and further exploration of the writing process, including planning, drafting, and revising, and emphasizes research skills and various elements of essay composition. The course focuses on argument, informative/explanatory, and narrative writing as well as style, voice, and grammatical structure, including mechanics and usage.	Teacher Recommendation And Lit and Comp III	12
HONORS DRAMATIC WRITING EMBEDDED WITH HONORS THEATER ARTS & LITERATURE A&B	Applies skills to culminate in creating and developing dramatic writing for theatrical media with special emphasis on film and television. Students will also engage in a variety of creative, analytical, and reflective writing experiences. Includes the development of “writerly stance” by reading, viewing, and analyzing texts and visual media from a writer’s point of view, with focus on understanding the construction process and including the application of conventions of standard English grammar and usage. <i>This course meets the fourth English Language Arts core requirement with HONORS Theater Arts & Literature as an embedded Fine Arts credit.</i>	Teacher Recommendation 9 th Literature, 10 th English credit and American Literature A&B	12
AP LANGUAGE WITH AMERICAN LITERATURE FOCUS A&B	This course focuses on the study of American literature, embracing its rhetorical nature and recognizing the literature as a platform for argument. It also emphasizes a variety of writing modes and genres and the essential conventions of reading, writing, and speaking. The students will develop an understanding of how historical context in American literature affects its structure, meaning, and rhetorical stance and they will encounter informational, literary, and non-print texts including visuals and graphic images as texts from all genres and modes of discourse. Students will become skilled readers of prose written in a variety of periods, disciplines, and rhetorical contexts and will compose expository, analytical, and argumentative writings. Students will analyze primary and secondary sources and develop the research skills needed to effectively synthesize these sources for their writing. Students enrolled in this course are prepared to take the Advanced Placement exam. There are required summer readings and assignments.	Teacher Recommendation And Honors 9 th & 10 th grade English Credits	11
AP LITERATURE/COMPOSITION A&B	This college-level course focuses on the reading and analysis of literary works and the writing of critical essays. This course is designed as an accelerated and enriching experience in analytical and critical thinking. It also pre-supposes that a student is proficient in composition. This course is geared to the student who aspires to take the AP exam. Parallel readings will include specific readings assigned during the term and required summer readings.	Teacher Recommendation AP Language	12
JOURNALISM/ ANNUAL A&B	This course explores writing through the analysis of yearbooks. It concentrates on the purpose, influence and structure, and language use. It also covers news gathering, ethics, copyrighting, editing, and revising. The course includes desktop publishing, circulation, and production as minor aspects.	Teacher Recommendation Application Required	10-12
MATH			
ALGEBRA A&B	Students will apply their algebraic and geometric reasoning skills to make sense of problems involving algebra, geometry, bivariate data, and statistics. This course focuses on algebraic, quantitative, geometric, graphical, and statistical reasoning. In this course, students will continue to enhance their algebraic reasoning skills when analyzing and applying a deep understanding of linear functions, sums and products	8 th grade mathematics credit	9

Milestone course	of rational and irrational numbers, systems of linear inequalities, distance, midpoint, slope, area, perimeter, nonlinear equations and functions, quadratic expressions, equations and functions, exponential expressions, equations, and functions, and statistical reasoning. High school course content standards are listed by big ideas including Data and Statistical Reasoning, Probabilistic Reasoning, Functional and Graphical Reasoning, Patterning and Algebraic Reasoning, and Geometry Patterning and Spatial Reasoning.		
HONORS ALGEBRA A&B Milestone course	Students will apply their algebraic and geometric reasoning skills to make sense of problems involving algebra, geometry, bivariate data, and statistics. This course focuses on algebraic, quantitative, geometric, graphical, and statistical reasoning. In this course, students will continue to enhance their algebraic reasoning skills when analyzing and applying a deep understanding of linear functions, sums and products of rational and irrational numbers, systems of linear inequalities, distance, midpoint, slope, area, perimeter, nonlinear equations and functions, quadratic expressions, equations and functions, exponential expressions, equations, and functions, and statistical reasoning. This course includes the study of Algebra but with more depth and rigor with emphasis on critical thinking and analysis of mathematical concepts.	Teacher Recommendation 8 th grade mathematics credit	9
GEOMETRY A&B	This is the second in a sequence of courses designed to provide students with preparation for more rigorous Mathematics courses in high school. Students will continue to enhance their analytical geometry and reasoning skills when analyzing and applying a deep understanding of polynomial expressions, proofs, constructions, rigid motions and transformations, similarity, congruence, circles, right triangle trigonometry, geometric measurement, and conditional probability.	Algebra I A & B	9-10
HONORS GEOMETRY A&B	This course enhances students' geometric, algebraic, graphical, and probabilistic reasoning skills. Students will apply their algebraic and geometric reasoning skills to make sense of problems involving geometry, trigonometry, algebra, probability, and statistics. Students will continue to enhance their analytical geometry and reasoning skills when analyzing and applying a deep understanding of polynomial expressions, proofs, constructions, rigid motions and transformations, similarity, congruence, circles, right triangle trigonometry, geometric measurement, and conditional probability. The honors course will include greater depth in problem solving, rigorous reasoning, and proof.	Teacher Recommendation And Algebra I A&B	9-10
ADVANCED ALGEBRA A&B	This course enhances students' algebraic, graphical, and probabilistic reasoning skills. Students will apply their algebraic reasoning skills to make sense of problems involving algebra, trigonometry, geometry, probability, and statistics. Students will continue to enhance their algebraic and analytical skills by applying a deep understanding of; descriptive & inferential statistics, exponential & logarithmic functions, radical functions, polynomial functions, linear algebra & matrices, trigonometry & the unit circle, and rational functions.	Geometry A & B	10-11
HONORS ADVANCED ALGEBRA A&B	This course enhances students' geometric, algebraic, graphical, and probabilistic reasoning skills. Students will apply their algebraic and geometric reasoning skills to make sense of problems involving geometry, trigonometry, algebra, probability, and statistics. Students will continue to enhance their analytical geometry and reasoning skills when analyzing and applying a deep understanding of polynomial expressions, proofs, constructions, rigid motions and transformations, similarity, congruence, circles, right triangle trigonometry, geometric measurement, and conditional probability. This course includes the study of Advanced Algebra but with more depth and rigor with emphasis on critical thinking and analysis of mathematical concepts.	Teacher Recommendation Geometry A & B or Honors Geometry A & B	10-11
COLLEGE READINESS MATH	College Readiness Mathematics is a fourth course option for students who have completed Advanced Algebra (or the equivalent.) The course serves as a bridge for high school students who enroll in non-STEM post-secondary study. The course has been approved by the University System of Georgia as a fourth	Teacher Recommendation Advanced Algebra A & B	11-12

	mathematics course beyond Algebra II for non-STEM majors, so the course will meet the needs of college-bound seniors who will not pursue STEM fields.		
STATISTICAL REASONING	Statistical Reasoning is a fourth Mathematics course option for students who have completed Accelerated GSE Geometry B/Algebra II or GSE Algebra II. The course provides experiences in statistics beyond the CCGPS sequence of courses, offering students opportunities to strengthen their understanding of the statistical method of inquiry and statistical simulations. Students will formulate statistical questions to be answered using data, will design and implement a plan to collect the appropriate data, will select appropriate graphical and numerical methods for data analysis, and will interpret their results to make connections with the initial question	Teacher Recommendation Advanced Algebra A & B or College Readiness Math	12
PRE-CALCULUS A&B	The course provides students a deeper understanding of Algebraic concepts, trigonometry and its applications that are critical to the study of Calculus and includes the study and analysis of piecewise and rational functions; limits and continuity as related to piecewise and rational functions; conic sections as implicitly defined curves; the six trigonometric functions and their inverses; applications of trigonometry such as modeling periodic phenomena, modeling with vectors and parametric equations, solving oblique triangles in contextual situations, graphing in the Polar Plane; solutions of trigonometric equations; and the manipulation and application of trigonometric identities. Topics will be analyzed numerically, algebraically, graphically, and verbally. Instruction and assessments include use of technology.	Teacher Recommendation Advanced Algebra A & B	12
AP PRECALCULUS AB A&B	This course follows the Advanced Placement Program from the College Board and is designed to prepare students for college-level calculus and provide grounding for other mathematics and science courses. The course revisits Advanced Algebra concepts but also includes Precalculus concepts. The curriculum includes polynomial, rational, exponential, logarithmic, trigonometric, and polar functions. Students who take this course are on track to take Calculus AB, or any other fourth year math.	Teacher Recommendation Advanced Algebra A & B or Honors Advanced Algebra A & B	11-12
AP PRECALCULUS BC A&B	This course follows the Advanced Placement Program from the College Board and is designed to prepare students for college-level calculus and provide grounding for other mathematics and science courses. The course revisits Advanced Algebra concepts but also includes Precalculus concepts. The curriculum includes polynomial, rational, exponential, logarithmic, trigonometric, and polar functions. This course moves at a faster pace and also covers functions involving parameters, vectors, and matrices. Students who take this course are on track to take Calculus AB or BC.	Teacher Recommendation Advanced Algebra A & B or Honors Advanced Algebra A & B	11-12
AP STATISTICS A&B	This course conforms to Advanced Placement Program of College Board and introduces students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. Students are exposed to four broad conceptual themes: exploring data, planning a study, anticipating patterns and statistical inference.	Teacher Recommendation Honors Advanced Algebra A & B Or Precalculus A & B	10-12
AP CALCULUS AB A&B	This course conforms to the Advanced Placement Program of the College Board and includes algebraic relations, limits, derivatives of algebraic and transcendental functions, and applications of derivatives. This course also includes basic integrations, applications of integrations, transcendental functions, methods of integration, and linear first-order differential equations. A typical equivalent would be a college Calculus I class.	Teacher Recommendation Precalculus A & B or Acc Precalculus A & B	11-12
AP CALCULUS BC A&B	This course conforms to the Advanced Placement Program of the College Board and includes the entirety of AP Calculus AB course in addition to the advanced BC topics. Topics include the differential and integral	Teacher Recommendation	11-12

	calculus skills and concepts from AP Calculus AB and extends them to include parametric, polar, and vector functions, along with an introduction to the study of functions represented as infinite sequences and series. A typical equivalent would be a college Calculus I and Calculus II class.	AP Precalculus A & B or AP Calculus AB A & B	
MULTIVARIABLE CALCULUS A&B	Multivariable Calculus is a fourth-year mathematics course option for students who have completed AP Calculus BC. It includes three-dimensional coordinate geometry; matrices and determinants; eigenvalues and eigenvectors of matrices; limits and continuity of functions with two independent variables; partial differentiation; multiple integration; the gradient; the divergence; the curl; Theorems of Green, Stokes, and Gauss; line integrals; integrals independent of path.	Teacher Recommendation AP Calculus BC A & B	12
SCIENCE			
BIOLOGY I A&B Milestone course	Biology is a required course in which the students will learn and understand biological functions and systems on the molecular, cellular, systemic, and environmental levels. Students should also be able to implement applications of biological processes to everyday situations.	Teacher Recommendation	9-10
HONORS BIOLOGY I A&B Milestone course	This is an accelerated course designed for students interested in pursuing advanced sciences or careers in the science or engineering fields. Students will learn and understand biological processes that occur on the molecular, cellular, systemic, and environmental levels. Students should also be able to implement applications of biological processes to everyday situations.	Teacher Recommendation	9
AP BIOLOGY A&B (Milestone Course if not previously tested in a previous Biology Course)	The Advanced Placement Biology course is designed to be the equivalent of a college introductory biology course usually taken by biology majors during their first year. The AP course in biology differs significantly from the usual first high school course in biology with respect to the textbooks used, the range and depth of topics covered, laboratory work done by students, and the time and effort required of students. It provides students with the conceptual framework, factual knowledge, and analytical skills necessary to deal critically with the rapidly changing science of biology. Some students, as college freshmen, are permitted to undertake upper-level courses in biology or register for courses for which biology is a prerequisite after achieving an adequate score on the Advanced Placement Examination.	Teacher Recommendation Honors Biology A & B Honors level math classes recommended	12
CHEMISTRY I A&B	Chemistry I is designed to introduce the student to how chemical principles and concepts are developed from observations and data, to understand and apply ordinary chemical and other scientific phenomena which he/she encounters in everyday activities, and to assist the student in appreciating the role of the chemist and the chemical industry in the evolution of our present day highly technological society.	Teacher Recommendation Biology A & B or Honors Biology A & B Algebra I	10-12
HONORS CHEMISTRY A&B	This is an accelerated course designed for students interested in pursuing science related and/or engineering collegiate degrees. Students will be introduced to how chemical principles and concepts are developed from observations and data, to understand ordinary chemical and other scientific phenomena, which he/she encounters in everyday activities, and to assist the student in appreciating the role of the chemist and the chemical industry in the evolution of our present day highly technological society. Emphasis is placed on experiments yielding data that when analyzed and interpreted; reveal important relationships such as trends and regularities, which can be used as a basis for developing unifying principles and concepts	Teacher Recommendation Biology A & B or Honors Biology A & B, And Honors Geometry or higher math	10-12
AP CHEMISTRY A&B	Advanced Placement Chemistry is designed to be the equivalent of a college introductory chemistry course usually taken by students who have an interest in biological sciences, physical sciences, or engineering. The AP Chemistry course expands the knowledge and skills gained during the introductory high school chemistry course. It provides students with the conceptual framework, factual knowledge, and analytical skills necessary to deal critically with the rapidly changing science of chemistry. Some students, as college	Teacher Recommendation Chemistry A & B and/or Honors Advanced Algebra	11-12

	freshman, are permitted to undertake upper-level courses in chemistry or register for courses for which chemistry is a prerequisite after achieving an adequate score on the Advanced Placement Examination.		
PHYSICS A&B	Physics is a detailed conceptual physics course that introduces the relationships among speed, acceleration, and displacement. The laws of mechanics as applied to both linear and circular motion systems are explored. The conservation of energy and momentum are also covered. Other topics covered include light, sound, electromagnetic waves, electricity, electromagnetism, electronic and nuclear physics	Two units of science and Algebra II as pre- or co-requisite	11-12
HONORS PHYSICS A&B	Physics Honors is an accelerated course that details the relationship among speed, acceleration, and displacement. Vector mathematics is used to make calculations involving both kinetic and dynamic quantities. Algebraic treatments of the laws of mechanics as applied to both linear and circular motion systems are derived and explained. The concepts of conservation of energy and momentum are covered in detail. Other topics covered include light, sound, electromagnetic waves, electricity, electromagnetism, electronics and nuclear physics	Teacher Recommendation Two units of science and honors or advanced level math courses	11-12
AP PHYSICS 1 A&B	Advanced Placement Physics I provides a systematic introduction to the main principles of physics and emphasizes the development of problem-solving ability. The course covers the first semester of the typical college physics sequence that serves as the foundation in physics for students majoring pre-medicine or applied sciences. Some students, as college freshmen, are permitted to undertake upper-level courses in physics or register for courses for which physics is a prerequisite after achieving an adequate score on the Advanced Placement Examination.	Teacher Recommendation Two units of science and concurrent enrollment in Algebra II A & B or Precalculus A & B	11-12
AP PHYSICS C A&B	Mechanics provides a calculus-based introduction to the main principles of physics and emphasizes the development of problem-solving ability. The course covers the first semester of the typical college physics sequence that serves as the foundation in physics for students majoring in engineering. Some students, as college freshmen, are permitted to undertake upper-level courses in physics or register for courses for which physics is a prerequisite after achieving an adequate score on the Advanced Placement Examination.	Teacher Recommendation 2 Units of Science Concurrent enrollment in AP Calculus AB or AP Calculus BC	11-12
HONORS ASTRONOMY A&B	This course explores topics relating to the atmosphere, planets, stars, galaxies, and the universe. Students will learn about the development of astronomy from ancient times through modern day, including how telescopes and astronomical observations are made, as well as computation and analysis of data from satellites orbiting the Earth, the ISS, and probes sent out into the far reaches of our solar system. Students will apply their knowledge of physics and mathematics to describe and understand the motion of planetary, stellar, and galactic bodies through space and to calculate distances with measurements of arc, light years, and parsecs. This course requires two-night viewings to study stars and planets that cannot be seen during the hours of a school day.	1 Unit of Science Algebra II A & B	12
ENVIRONMENTAL SCIENCE A&B	Environmental Science is designed as an integrated and global approach to science and technology. The concepts in this course focus on the links between living things, their surroundings, and the total environment of the planet. The scientific principles and related technology will assist the student in understanding the relationships between local, national, and global environmental issues. The intent of the course is to help individuals become informed, get involved, and care for oneself and the environment.	8 th grade Teacher Recommendation or Biology A & B	9-10
AP ENVIRONMENTAL SCIENCE A&B	AP Environmental Science (APES) is a laboratory science course equivalent to a one-semester college course in environmental science. This is an advanced study of topics in environmental science and will encompass multiple disciplines from the scientific field such as Earth Science, Biology, Physical Science, Chemistry, and Physics along with courses of study in math, geography, history, government, and literature.	Teacher Recommendation Biology A & B and Chemistry A & B	12

HUMAN ANATOMY/ PHYSIOLOGY A&B	This course is designed to give the student an overview of the structures and functions of the major systems of the human body. The course is particularly relevant for a student who is interested in pursuing a career in various medical fields. Students are expected to participate in laboratory activities including the dissection of various preserved animal specimens.	Biology A & B	12
HONORS HUMAN ANATOMY/ PHYSIOLOGY A&B	Honors Human Anatomy/Physiology is an advanced course designed to give the student an in-depth look at the structures and functions of the major systems of the human body. The course is particularly relevant for a student who is interested in pursuing a career in the allied medical fields or who is interested in advanced competency in medical science.	Honors Biology A & B	12
METEOROLOGY A&B	Meteorology is a science elective course designed to familiarize students with the Earth's dynamic atmosphere. Students will understand the formation and properties of atmospheric phenomena and the elements of short-term weather events to long term climatology. Topics covered in this course include the structure and characteristics of the Earth's atmosphere, the formation, structure, and other general information (naming, history, etc.) of clouds, weather systems/fronts, thunderstorms, tornadoes, hurricanes, and other meteorological events, basic forecasting and analysis of weather maps, climate change, relationships between weather and humans/societies, and more.	Biology A & B and 1 unit of additional science	12
AP COMPUTER SCIENCE PRINCIPLES A&B	The course will introduce students to the creative aspects of programming, abstractions, algorithms, large data sets, the Internet, cybersecurity concerns, and computing impacts. AP Computer Science Principles will give students the opportunity to use technology to address real world problems and build relevant solutions. Together, these aspects of the course make up a rigorous and rich curriculum that aims to broaden participation in computer science. <i>This course has been approved to meet the 4th Science requirement for graduation.</i>	Geometry A & B	10-12
AP COMPUTER SCIENCE A A&B	AP Computer Science A conforms to the College Board syllabus for the Advanced Placement Computer Science Examination. It covers programming methodology, features of programming languages, fundamental data structures, algorithms, and computer systems. Students will use JAVA as the language for the course. <i>This course has been approved to meet the 4th Science requirement for graduation.</i>	Teacher Recommendation AP Computer Science Principles & Algebra II A & B	10-12
HONORS SCIENTIFIC RESEARCH II A&B	Scientific Research II is designed to provide students with the tools necessary to perform an independent research project. During first semester, students will be introduced to many different techniques common in research labs and develop an idea for a project to be completed during spring semester. <i>This course does not meet the 4th Science requirement for graduation.</i>	Teacher Recommendation and Honors Biology A & B Honors Chemistry A & B (pre- or corequisite)	10-12
AP CAPSTONE			
AP SEMINAR	AP Seminar is a foundational course that engages students in cross-curricular conversations that explore the complexities of academic and real-world topics and issues by analyzing divergent perspectives. Using an inquiry framework, students practice reading and analyzing articles, research studies, and foundational, literary, and philosophical texts; listening to and viewing speeches, broadcasts, and personal accounts; and experiencing artistic works and performances. Students learn to synthesize information from multiple sources, develop their own perspectives in written essays, and design and deliver oral and visual presentations, both individually and as part of a team. Ultimately, the course aims to equip students with the power to analyze and evaluate information with accuracy and precision in order to craft and communicate evidence-based arguments. Students who complete AP Seminar are expected to enroll in AP Research their senior year. <i>This course does NOT meet the 4th Science requirement for graduation.</i>	Teacher Recommendation 1 unit of Advanced Placement credit	11

AP RESEARCH	AP Research allows students to deeply explore an academic topic, problem, or issue of individual interest. Through this exploration, students design, plan, and conduct a year-long research-based investigation to address a research question. In the AP Research course, students further their skills acquired in the AP Seminar course by understanding research methodology; employing ethical research practices; and accessing, analyzing, and synthesizing information as they address a research question. Students explore their skill development, document their processes, and curate the artifacts of the development of their scholarly work in a portfolio. The course culminates in an academic paper of 4000–5000 words (accompanied by a performance or exhibition of product where applicable) and a presentation with an oral defense. <i>This course does NOT meet the 4th Science requirement for graduation.</i>	AP Seminar	12
Social Studies			
HUMANITIES A&B	Humanities is a 9th-grade Social Studies course introducing Geography and early World History. Students study physical, cultural, political, social, and global aspects while developing reading, note-taking, and study skills. Teachers provide guided instruction, map skill practice, and review materials to support success on unit exams.	None	9
HONORS HUMANITIES A&B	Honors Humanities is a 9th-grade accelerated Social Studies course that lays the foundation for Honors and AP sophomore courses. Using a thematic approach to Geography and early World History, students study physical, cultural, political, social, and global aspects. The course emphasizes advanced reading, writing, note-taking, debates, document analysis, collaboration, and time management. Weekly map quizzes are required, and students should have a strong interest in Social Sciences/Geography.	Teacher Recommendation	9
AP HUMAN GEOGRAPHY A&B	Advanced Placement Human Geography is the equivalent of a one-semester college-level course and is designed to provide the student with an in-depth understanding of the earth's regions, religions, languages, recent regional histories, governments, economic systems, and physical features. Students will write frequently on current topics of interest. The free response questions will be patterned after the type of questions asked on the AP Human Geography Exam. Outside reading and writing are required. This course has a required summer assignment.	Teacher Recommendation	9
WORLD HISTORY A&B	A survey of people and nations of both Western and non-Western civilizations. This course explores the political, cultural, and economic heritage of civilization from the time of recorded history through the Industrial Revolution (5000 B.C.-1800's) and from the rise of nationalism to contemporary times (1800's-present). Concepts and skills in problem solving and critical thinking are developed along with writing skills	None	10-12
HONORS WORLD HISTORY A&B	A survey of people and nations of both Western and non-Western civilizations. This course explores the political, cultural, and economic heritage of civilization from the time of recorded history through the Industrial Revolution (5000 B.C.-1800's) and from the rise of nationalism to contemporary times (1800's-present). Critical thinking and problem solving are stressed. Extensive reading and writing are required.	Teacher Recommendation Honors World Geography A & B or World Geography A & B	10-12
AP WORLD HISTORY A&B	The purpose of the AP World History course is to develop a greater understanding of the changes of global processes and contacts, in interaction with different types of human societies. This course offers balanced global coverage with Africa, the Americas, Asia, and Europe. This course emphasizes relevant factual knowledge deployed in conjunction with leading interpretive issues and types of historical evidence.	Teacher Recommendation Honors World Geography A & B and Honors 9 th Literature A & B	10
US HISTORY A&B Milestone course	This course is a survey of the development of the U.S. from discovery to the present. The intent of this course is to increase knowledge, awareness, and appreciation of America's social, political, and economic evolution during the formative years. The student will also be encouraged to think independently and writing skills will be developed.	None	11-12

HONORS US HISTORY A&B Milestone course	This course is a survey of the development of the US from discovery to the present. The purpose of this course is to increase knowledge, awareness, and appreciation of America's social, political, and economic evolution during the formative years. Inquiry and analysis of historical situations are emphasized. Extensive reading and writing are required.	Teacher Recommendation Honors World History	11-12
AP US HISTORY A&B	AP United States History is a reading and writing intensive course that is designed, by requirement of the College Board, to mimic a college History course. Students in this course will analyze major themes in United States history to better understand the rich and complex nature of the nation. Students will also concentrate on the social, political, cultural, and economic impact of significant historical events and their influence on our nation today. In addition to strengthening their understanding of various authors, texts, and traditions in American history, students will improve their capacity to analyze, discuss, and write well-researched historical arguments.	Teacher Recommendation Honors or AP World History	11
AMERICAN GOVERNMENT (one semester)	This course is a study of the local, state, and federal governmental functions. Citizenship rights and responsibilities are emphasized. Focus areas include development of our political systems, federalism, civil liberties, political parties, political theory, and comparative government. Also, the functions of the Executive, Legislative, and Judicial branches of government will be studied.	US History A & B	12
HONORS AMERICAN GOVERNMENT (one semester)	This course is a study of the local, state, and federal governmental functions. Citizenship rights and responsibilities are emphasized. Focus areas include development of our political systems, federalism, civil liberties, political parties, political theory, and comparative government. Also, the functions of the Executive, Legislative, and Judicial branches of government will be studied.	Teacher Recommendation Honors or AP US History A & B	12
AP GOVERNMENT AND POLITICS U.S.	Designed to give students a critical perspective on government and politics in the United States. This course involves both the study of general concepts used to interpret politics in the United States and the analysis of specific case studies. It also requires familiarity with the various institutions, groups, beliefs, and ideas that make up the American political reality. AP Government and Politics is a cooperative educational endeavor of the College Entrance Examination Board. <i>This course meets the requirement for graduation.</i>	Teacher Recommendation Honors or AP US History A & B	12
PRINCIPLES OF ECONOMICS (one semester)	This course is a study of fundamental concepts and essential elements of the market economic system in a problem/issues orientation. Focus areas include opportunity costs and scarcity, supply/demand analysis, competitive markets, macroeconomics measurement, business cycles, inflation, unemployment, monetary and fiscal policies, and international trade.	US History A & B	12
HONORS PRINCIPLES OF ECONOMICS (one semester)	This course is a study of fundamental concepts and essential elements of the market economic system in a problem/issues orientation. Focus areas include opportunity costs and scarcity, supply/demand analysis, competitive markets, macroeconomics measurement, business cycles, inflation, unemployment, monetary and fiscal policies, and international trade.	Teacher Recommendation Honors or AP US History A & B	12
AP MICROECONOMICS	The purpose of this AP course in microeconomics is to give students a thorough understanding of the principles of economics that apply to the functions of individual decision makers, both consumers and producers, within the economic system. It places primary emphasis on the nature and functions of product markets and includes the study of factor markets and the role of government in promoting greater efficiency and equity in the economy. <i>This course meets the requirement for graduation.</i>	Teacher Recommendation Honors or AP US History A & B	12
AP MACROECONOMICS	The purpose of this AP course in Macroeconomics is to give students a thorough understanding of the principles of economics that apply to an economic system. The course places particular emphasis on the study of national income and price-level determination, and develops student's familiarity with economic performance measures, the financial sector stabilization policies, economic growth, and international economics. <i>This course meets the requirement for graduation.</i>	Teacher Recommendation Honors or AP US History A & B	12

PSYCHOLOGY (one semester/paired with Sociology)	This course provides a general overview of the principles and concepts of psychology. The purpose of this course is to provide a better understanding of human behavior and interpersonal relationships. Topics of applied psychology are also studied.	None	10-12
AP PSYCHOLOGY A&B	The purpose of the Advanced Placement course in Psychology is to introduce students to the systematic and scientific study of the behavior and mental processes of human beings and other animals. Students are exposed to the psychological facts, principles, and phenomena associated with each of the major subfields within psychology. They also learn about the methods psychologists use in their science and practice.	None	11-12
AP COMPARATIVE GOVERNMENT with CURRENT ISSUES A&B	AP Comparative Government and Politics is an elective for 11th–12th graders interested in government, political science, and world affairs. The course compares political structures, policies, and challenges in six countries (Great Britain, Mexico, Russia, Iran, China, Nigeria) and explores how governments address global issues. It also includes Current Issues, studying contemporary local, national, and international events. This course does not fulfill the government graduation requirement .	None	11-12
SOCIOLOGY (one semester/paired with Psychology)	Sociology is the study of human society and social behavior. The course provides students with a basic understanding of how humanity is shaped by the groups to which people belong and by the social interaction that takes place within those groups. Societal problems in the United States will also be discussed.	None	10-12
AP EUROPEAN HISTORY	AP European History is an introductory college-level European history course. Students cultivate their understanding of European history through analyzing historical sources and learning to make connections and craft historical arguments as they explore concepts like interaction of Europe and the world; economic and commercial developments; cultural and intellectual developments; states and other institutions of power; social organization and development; national and European identity; and technological and scientific innovation.	None	11-12

WORLD LANGUAGES

GERMAN I A&B	An introduction to the German language, which includes the four language skills: listening, speaking, writing, and reading. These skills will be expanded gradually through the first semester. Introduction to German culture will be an integral part of the course.	None	9-12
GERMAN II A&B	Designed to further develop the four skills of listening, speaking, writing, and reading with an increased emphasis on oral proficiency. The student will acquire a basic command of the key vocabulary and structures necessary for limited personal communication as well as an appreciation of the breadth and variety of the German speaking world.	German I	9-12
GERMAN III HONORS A&B	Designed to increase listening, speaking, writing, and reading skills through expansion of knowledge regarding grammatical structure, mastery of reading material, and through written and oral usage. The student will be able to participate in activities using oral and written forms, be able to inquire and describe using present, past, and future tense, and be able to read and demonstrate comprehension of a variety of texts.	German II	9-12
GERMAN IV HONORS A&B	This course is designed to increase oral and written fluency and to provide intensive study of the literature, culture, geography, and history of the German-speaking world.	German III	10-12
SPANISH I A&B	An introduction to the Spanish language, which includes the four language skills: listening, speaking, writing, and reading. These skills will be expanded gradually throughout the year. Introduction to Spanish culture will be an integral part of the course.	None	9-12
SPANISH II A&B	This course is designed to further develop listening, speaking, reading, and writing with an emphasis on oral proficiency. The student will acquire a basic command of key vocabulary and grammatical structures	Spanish I	9-12

	necessary for limited personal communication as well as an appreciation of diversity in the Spanish-speaking world.		
SPANISH III HONORS A&B	Designed to increase listening, speaking, writing, and reading skills through expansion of knowledge regarding grammatical structure, mastery of reading material and through written and oral usage. The student will be able to participate in activities using oral and written forms, be able to inquire and describe using present, past, and future tense and read and demonstrate comprehension of a variety of texts.	Spanish II	9-12
SPANISH IV HONORS A&B	This course is designed to increase oral and written fluency and to provide intensive study of the culture, geography, and history of the Spanish-speaking world.	Spanish III	10-12
AP SPANISH LANGUAGE A&B	AP Spanish Language is designed to prepare the student to take the AP language test by in-depth study of grammar, and intensive practice of listening, speaking, reading, and writing, as well as constant cultural study. https://apstudent.collegeboard.org/apcourse/ap-spanish-language	Spanish IV	12
FINE ARTS			
VISUAL ARTS COMPREHENSIVE A&B	Visual Arts Comprehensive introduces art history, art criticism, aesthetic judgment, and studio production to the beginning art student. Emphasis is placed on the ability to understand and use the elements of art and principles of design through a variety of art media projects. Students will learn the language of art, how to evaluate their own and others' artwork, and they will study the history of how artists have expressed their lives through a variety of artistic media.	None	9-12
DRAWING I A&B	Drawing I explores a variety of drawing techniques and media with an emphasis on developing foundation drawing skills. Students will learn the basics of contour line, black and white value, and color value drawing. They will examine solutions to drawing problems by critiquing their own work and the work of other artists; and they will focus on drawing from still life to develop a sense of three-dimensionality and form in their drawing. In the Drawing II class, a greater emphasis will be placed on problem solving, creative self-expression, and diverse approaches to drawing; a higher level of drawing proficiency is required in this second course.	Teacher Recommendation Visual Arts Comprehensive	10-12
DRAWING & PAINTING 1 A&B	In Drawing and Painting I students will continue developing their foundation drawing skills, with an emphasis on form and three dimensionality in a variety of black and white and color media drawing projects. A greater emphasis will be placed on self-expression, and a greater sophistication and individual style in the use of drawing media should be developing in the student's work. After nine weeks of drawing, students will focus on developing form and three dimensionality skills in a range of basic painting media and techniques. Students will work on more individualized, advanced projects, with an emphasis on self-expression, and utilize opportunities for competitive exhibition. Students might also create works to include in their portfolio for college admission, or to be included in a portfolio to be submitted to The College Board for the AP Studio drawing exam.	Teacher Recommendation Visual Arts Comprehensive Drawing I	11-12
DRAWING & PAINTING II A&B	In Drawing and Painting II is a continuation of D&P I in which students are introduced to the rigor and routine of the art production process including: planning, producing, and reflecting on art. With an emphasis on studio arts, students explore a wide range of 2D and 3D media, skills, and techniques, as related to contemporary and historical art perspectives. Projects may include but not be limited to: drawing, painting, printmaking, collage, mixed media, pottery, and sculpture. Students develop technical skills, foster their expressive abilities, and employ the use of the elements of art throughout the production process.	Teacher Recommendation Visual Arts Comprehensive Drawing I, Drawing and Painting I	11-12
AP STUDIO DRAWING A&B	This course covers topics as required by The College Board. Students will produce portfolios of original artwork that demonstrate college level drawing skills in a range of drawing problems, media, and	Teacher Recommendation Visual Arts Comprehensive	11-12

	approaches. The class provides students with college level studio class experiences and requires self-motivated artistic production outside of class. If students' portfolios receive a high enough score from The College Board, they may be awarded college credit for their portfolio work.	Drawing I & II	
AP STUDIO 2D DESIGN A&B	This course covers topics as required by The College Board. Students will produce portfolios of original artwork that demonstrate college level 2D design skills in a range of 2D design problems, media, and approaches. Many students in this class have chosen to develop photography portfolios as their media focus. The class provides students with college level studio class experiences and requires self-motivated artistic production outside of class. If students' portfolios receive a high enough score from The College Board, they may be awarded college credit for their portfolio work.	Teacher Recommendation Visual Arts Comprehensive Drawing I & II	11-12
	CHORUS		
BEGINNING CHORAL ENSEMBLE I A&B (<i>Serenata</i>)	This course will cover a variety of genres of music at an intermediate high school level for treble voices. Basic knowledge of music theory as well as ear training and sight-reading skills are helpful, though not required. These will be developed further through more intense curriculum. Students are required to sing and participate during all classroom activities. Students are expected to attend all after-school rehearsals and concerts included in the chorus handbook and syllabus. <i>Annual Dues associated with this course.</i>	None No audition required	9-12
INTERMEDIATE CHORAL ENSEMBLE I A&B (<i>Voce Angeli</i>)	This course will cover a variety of genres of music at an intermediate high school level for treble voices. Basic knowledge of music theory as well as ear training and sight-reading skills are helpful, though not required. These will be developed further through a more intense curriculum. Students are required to sing and participate during all classroom activities. Students are expected to attend all after-school rehearsals and concerts included in the chorus handbook and syllabus. <i>Annual Dues associated with this course.</i>	Acceptance by Audition	10-12
MEN'S CHORUS A&B	This course is an intermediate choral performance class for male voices. Basic knowledge of music theory as well as ear training and sight-reading skills are helpful, though not required. These will be developed further through a more intense curriculum. Students are required to sing and participate during all classroom activities. Students are expected to attend all afterschool rehearsals and concerts included in the chorus handbook and syllabus. <i>Annual Dues associated with this course.</i>	None No audition required	9-12
ADVANCED TREBLE CHORAL ENSEMBLE A&B (<i>Bel Canto</i>)	This course will cover a variety of genres of music at an advanced high school level for treble voices. Students will be expected to have a basic knowledge of music theory as well as ear training and sight-reading skills. These will be developed further through a more intense curriculum. Students are required to sing and participate during all classroom activities. Students are expected to attend all after-school rehearsals and concerts included in the chorus handbook and syllabus. <i>Annual Dues associated with this course.</i>	Acceptance by Audition	10-12
ADVANCED MIXED CHORUS I A&B	This course provides mastery-level performers opportunities to increase performance skills and knowledge in mixed choral singing. Covers performance and production, analysis and theoretical studies, historical and cultural contributions and influences, creative aspects of music and appreciation of music. Organizes objectives for self-paced progress through all four levels. Stresses individual progress and group experiences. <i>Annual Dues associated with this course.</i>	Teacher Recommendation	10-12
	BAND		
INTERMEDIATE BAND I A&B (<i>Concert Band</i>)	Course designed for those students beyond the beginning level, but not yet capable of the most advanced literature. Performance demands are not as high as in the Advanced Band, allowing more time for further technical development of individual skills. Advanced students who are unable to meet the rehearsal and	Acceptance by Audition	9-12

	performance demands of Advanced Band may choose this course. Extra rehearsals and performances are expected. Audition and director approval required. <i>Annual Dues associated with this course.</i>		
MASTERY BAND A&B (Wind Symphony)	Course designed for the more advanced high school student. Performance obligations are more intense than in Advanced Band. Development of individual skills is through home practice and /or private study is typical. Extra rehearsals and performances are expected. Audition and director approval required. <i>Annual Dues associated with this course.</i>	Acceptance by Audition	9-12
ADVANCED BAND II A&B (Symphonic Band)	Course designed for the more advanced high school student. Performance obligations are more intense than in Intermediate Band. Development of individual skills is through home practice and /or private study is typical. Extra rehearsals and performances are expected. Audition and director approval required. <i>Annual Dues associated with this course.</i>	Acceptance by Audition	9-12
	ORCHESTRA		
INTERMEDIATE ORCHESTRA A&B (POPE ORCHESTRA)	This course is designed for students in the ninth grade. Students work primarily to further strengthen the areas of shifting, variations in key and primary rhythmic variations and basic ensemble performance. Students work on level three music as per Georgia Music Educators Association classification. <i>Annual Dues associated with this course.</i>	None	9-12
ADVANCED ORCHESTRA II A&B (POPE ORCHESTRA II)	Students work primarily on moderately difficult ranges of shifting, key variation, and intricate rhythms. In this course, students perform level four music per Georgia Music Educators Association classification. <i>Annual Dues associated with this course.</i>	None	9-12
CHAMBER ORCHESTRA A&B (POPE SYMPHONY)	<i>This is an audition only course.</i> Driven by highly technical musicians who have taken private lessons and/or are highly motivated who want to pursue a high level of orchestra music. Students work on intricate key signatures, rhythmic variation and technique and highly challenging music levels. In this course, students read and perform level five music as per Georgia Music Educators Association classification. <i>Annual Dues associated with this course.</i>	Acceptance by Audition	9-12
MASTERY ORCHESTRA I A&B (POPE SYMPHONY)	<i>This is an audition only course.</i> Driven by highly technical musicians who have taken private lessons and/or are self-motivated to want to pursue a high level of Symphonic music. Students work on the highest level of music available and deal with the most intricate of key signature, rhythmic variation, and technique. In this course, students read a level five and level six music per Georgia Music Educators Association classification. <i>Annual Dues associated with this course.</i>	Acceptance by Audition	9-12
	THEATER		
THEATRE ARTS: FUNDAMENTALS I A&B	This are course introduces and develops a basic working knowledge of theatrical skills including: script analysis, improvisation, theatrical methods, acting, technical theatre, directing, dramaturgy, theatre history, theatre business, critique, and theatre etiquette. This course offers performance opportunities.	None	9-12
THEATRE FUNDAMENTALS II A&B	<u>Theatre Arts/Fundamentals II</u> enhances level-one skills.	Teacher Recommendation and/or Theater Fundamentals A & B	10-12
THEATRE ARTS: FUNDAMENTALS III A&B	<u>Theatre Arts/Fundamentals III</u> enhances level-two skills.	Teacher Recommendation and/or Theater Fundamentals I & II A & B	10-12
Technical Theatre I	Open to all students, regardless of experience level, this course serves as an introduction to the technical side of putting on a production. Students will explore history, design, and execution in technical areas such as costumes, makeup, lights, sound, sets, and props. After learning the basics of each area, students will demonstrate their knowledge and skill with multiple hands-on projects.	None	9-12

AP MUSIC THEORY A&B	This course is designed to teach the analytical aspects of music. Musical form and analysis, compositional techniques, harmony, part writing, sight-reading, and ear training concepts will be the focus of the curriculum discussed. This course will be offered to music students as well as those not currently enrolled in a music class but have a background in music.	Teacher Recommendation & Student must have musical background	10-12
MUSIC APPRECIATION I A&B	Music Appreciation I is a study of music literature and styles that is intended to raise awareness of music fundamentals and the role of music in our world. Introduces production and performance; covers terminology and idioms, elements of music, perceptive listening and attitudes and appreciation. Stresses the ability to become a literate consumer and the ability to speak and write about music.	None	9-12
AP ART HISTORY A&B	The AP Art History course explores a wide array of aesthetic topics as the nature of art, its uses, its meanings, its role in culture, art making, artists' lives, art movements, and responses to art. Through investigation of diverse artistic traditions from prehistory to present, from European, Asian, African and American traditions, the course fosters in-depth and holistic understanding of the history of art from a global perspective. There are no prerequisites for AP Art History. Students who have been successful in history and literature courses, or in studio art courses are encouraged to enroll since those experiences will support and enrich the context of the art history course.	None	10-12

CTAE

	COMPUTER SCIENCE		
INTRODUCTION TO SOFTWARE TECHNOLOGY A&B	Exposure to foundational knowledge in software, programming languages, web design, IT support, networks, hardware, and emerging technologies are all taught in a computer lab with hands-on activities and project-focused tasks. Students will be exposed to several languages including HTML, CSS, JavaScript, and Python. They will learn to read, write, and edit code. Students will be taught to share information in several ways, including building a website. Code structure is taught in this course as a foundational knowledge to prepare students for future computer science courses.	None	9-12
AP COMPUTER SCIENCE PRINCIPLES A&B	The course will introduce students to the creative aspects of programming, abstractions, algorithms, large data sets, the Internet, cybersecurity concerns, and computing impacts. AP Computer Science Principles will give students the opportunity to use technology to address real-world problems and build relevant solutions. Together, these aspects of the course make up a rigorous and rich curriculum that aims to broaden participation in computer science. <i>This course has been approved to meet the 4th Science requirement for graduation.</i>	Teacher Recommendation and Geometry	10-12
AP COMPUTER SCIENCE A A&B	AP Computer Science A conforms to the College Board syllabus for the Advanced Placement Computer Science Examination. It covers programming methodology, features of programming languages, fundamental data structures, algorithms, and computer systems. Students will use JAVA as the language for the course. <i>This course has been approved to meet the 4th Science requirement for graduation.</i>	Teacher Recommendation and AP Computer Science Principles and Algebra II	10-12
AP CYBERSECURITY A A&B	The course examines cyber vulnerabilities, attacks, mitigation, and detection across physical spaces, networks, devices, data, and applications. Students analyze the impact of cybersecurity on individuals, organizations, society, and government. Course content aligns with the National Initiative for Cybersecurity Education (NICE) Workforce Framework.		10-12
HONORS COMPUTER SCIENCE RESEARCH A&B	The course is designed to research, strategize, design, and develop mobile and desktop games, applications, and websites. Students will learn about life cycles of project development. Work is project based with direction and deadlines provided. Projects will be published and reviewed.	Teacher Recommendation and AP Comp Science Principles or AP Comp Science A	12

	BUSINESS AND FINANCE		
INTRODUCTION TO BUSINESS & TECHNOLOGY A&B	This course introduces business and technology skills needed in today's workplace. Students learn business principles, financial decision-making, and technology applications, along with essentials for working in, managing, and owning a business. Employability skills are integrated through activities, projects, and tasks aligned with industry standards.	None	9-12
FINANCIAL LITERACY A&B (Personal Finance)	Students will explore trends in investing, bank accounts, types of credit, types of investments, financial contracts (example: car loans, rental agreements, credit applications, etc.), investment and financial planning, and careers in business finance. The curriculum is supplemented with the <i>Dave Ramsey's – "Financial Peace" – High School Curriculum</i> .	Introduction to Business and Technology <i>preferred</i>	10-12
AP BUSINESS WITH PERSONAL FINANCE A&B	The course covers entrepreneurship, marketing, finance, accounting, and management through real-world applications, case studies, and project-based learning. Students also learn and apply all National Standards for Personal Financial Education, as established by the Council for Economic Education and the Jump\$tart Coalition.	Introduction to Business and Technology	10-12
BROADCAST AND VIDEO PRODUCTION			
AUDIO VIDEO TECH AND FILM I A&B	This course prepares students for employment or entry into a postsecondary education program in the audio and video technology career field. Topics covered may include, but are not limited to: terminology, safety, basic equipment, script writing, production teams, production and programming, lighting, recording, and editing, studio production, and professional ethics.	None	9-10
AUDIO VIDEO TECH AND FILM II A&B	This is the second course in the Broadcast/Video Production pathway. Course topics include: Planning, Writing, Directing and Editing a Production; Field Equipment Functions; Operational Set-Up and Maintenance; Advanced Editing Operations; Studio Productions; Performance; Audio/Video Control Systems; Production Graphics; Career Opportunities; and Professional Ethics.	AV Tech I	10-12
AUDIO VIDEO TECH AND FILM III A&B	This course is the Third in a series to prepare for a career in Broadcast/Video production and/or to transfer to a postsecondary program for further study. Topics include Planning, Writing, Directing and Editing a Production; Field Equipment Functions; Operational Set-Up and Maintenance; Advanced Editing Operations; Studio Productions; Performance; Audio/Video Control Systems; Production Graphics. Students work cooperatively and independently in all phases of broadcast/video production. Students in this class will produce GNN/Pope TV programming viewed throughout the school 2-3 times per week.	AV Tech I & II	11-12
AUDIO VIDEO TECH AND FILM IV A&B	Students will be responsible for video production projects either in school or after hours. Projects include filming presentations for the Guidance Department, Administrators, Athletic Events, or a variety of other projects including Public Service Announcements. Students work independently to produce video projects, within given deadlines.	AV Tech I, II, III	12
CULINARY ARTS			
INTRODUCTION TO CULINARY A&B Level 1	Introduction to Culinary Arts is a foundational course that introduces students to basic food preparation terms, concepts, and methods. Laboratory practice complements class instruction, emphasizing kitchen and dining room safety, sanitation, and equipment operation. The course also covers professionalism in the culinary industry and career opportunities. Students develop skills through project-based learning, technical practice, and FCCLA leadership activities, preparing them for post-secondary education or entry into the global workforce. A chef hat and coat are required.	None	9-12
CULINARY ARTS I A&B Level 2	Culinary Arts I is designed to create a complete foundation and understanding of Culinary Arts leading to post-secondary education or a foodservice career. Building from techniques and skills learned in	Introduction to Culinary Arts	10-12

	Introduction to Culinary Arts, this fundamentals course begins to involve in-depth knowledge and hands on skill mastery of Culinary Arts. Students are required to purchase a chef hat and coat if one is not already owned.		
CULINARY ARTS II A&B Level 3	Culinary Arts II is an advanced and rigorous in-depth course designed for the student who has continued the Culinary Arts Pathway and wishes to continue their education at the post-secondary level or enter the foodservice industry as a proficient and well-rounded individual. Strong importance is given to refining hands on production of the classic fundamentals in the commercial kitchen. Students are required to purchase a chef hat and coat if one is not already owned.	Introduction to Culinary Arts and Culinary Arts I	11-12
	GRAPHIC COMMUNICATIONS		
INTRODUCTION TO GRAPHICS AND DESIGN A&B	This course is designed as the foundational course for both the Graphics Production and Graphics Design pathways. The Graphics and Design course provides students with the processes involved in the technologies of printing, publishing, packaging, electronic imaging, and their allied industries. In addition, the Graphics and Design course offers a range of cognitive skills, aesthetics, and crafts that includes typography, visual arts, and page layout.	None	9-12
GRAPHIC DESIGN AND PRODUCTION A&B	As the second course in the Graphics Communication and Graphics Design Pathways, this course builds on knowledge and skills learned in the Introduction to Graphics and Design course and focuses on procedures commonly used in the graphic communication and design industries. Students will gain more experience in creative problem solving and the practical implementation of those solutions across multiple areas of graphic design and graphic communications	Intro to Graphics and Design	10-12
ADVANCED GRAPHIC DESIGN A&B	In this first advanced course, students continue to explore design principles and layout procedures in an increasingly independent manner. The course covers graphic design software, page composition, image conversion, and digital printing. Students enhance digital design and imaging skills through experiences simulating the graphic design industry and both school- and work-based learning opportunities. This is the final course in the Graphic Design Pathway, with an opportunity to certify in Adobe Illustrator.	Graphic Design and Production	11-12
ADVANCED GRAPHIC OUTPUT PROCESSES A&B	In this second advanced course, students gain higher-level experience completing projects independently. They learn to manage output processes, including customer relations, printing, finishing, and binding, while continuing to build a personal portfolio. Upon completion, students are prepared for employment or post-secondary education requiring self-motivation and advanced skills. This is the final course in the Graphic Communication Pathway, with an opportunity to certify in Adobe Photoshop.	Graphic Design and Production	11-12
	ENGINEERING		
PLTW INTRODUCTION TO ENGINEERING DESIGN (IED) A&B	IED is a foundational high school engineering course that introduces students to the engineering profession through the use of the engineering design process. Students solve real-world problems using a structured approach involving design briefs, modeling, prototyping, testing, and evaluating. The course emphasizes 3D computer modeling (CAD), additive manufacturing (3D printing), and statistical analysis as tools for informed decision-making. Students gain experience in technical sketching, reverse engineering, materials science, and systems design, working both individually and collaboratively to develop and communicate solutions. Key professional skills developed include project management, technical writing, and presentation.	None	9-12
PLTW PRINCIPLES OF ENGINEERING (POE) A&B	POE is a survey course that builds upon foundational engineering concepts and introduces students to key topics in mechanical, structural, and automation engineering. Students explore systems including mechanisms, energy transfer, material strength, and motion. The course reinforces STEM integration as students design, build, and test projects using VEX components, sensors, and motors. Emphasis is placed on the application of mathematical and scientific principles, system optimization,	PLTW INTRODUCTION TO ENGINEERING DESIGN	10-12

	problem-solving, and documentation. Collaboration and communication are central as students present their findings and refine their designs through testing and feedback.		
PLTW AEROSPACE ENGINEERING (Aero)	Aero is a PLTW specialization course that immerses students in the science and engineering of flight. Topics include aerodynamics, propulsion systems, orbital mechanics, and atmospheric vs. space flight. Students explore aerospace design through airfoil creation, rocket launching, satellite mapping, and autonomous robotic missions. The course blends engineering analysis with industry-standard software tools and physical prototyping. Projects encourage innovation in sustainable flight, including wind turbines and parachutes. Students simulate mission sequences and apply both mechanical and coding knowledge to accomplish tasks autonomously.	PLTW PRINCIPLES OF ENGINEERING (POE) A&B	11-12
PLTW CAPSTONE	This capstone course challenges students to apply their accumulated PLTW knowledge to research and solve an open-ended real-world problem. Working in teams, students follow a rigorous engineering design process, identifying a need, conducting research, designing, building, testing, and refining a solution. Emphasis is placed on documentation, engineering notebooks, iterative testing, and final presentation to a panel of industry professionals. The course culminates in a comprehensive demonstration of technical, analytical, and professional competencies, preparing students for post-secondary education and careers in engineering or related fields.	PLTW PRINCIPLES OF ENGINEERING (POE) A&B	11-12
WORK BASED LEARNING			
Work Based Learning I-IV	Work-Based Learning I-IV allows students to engage in a mentor-supervised, on-the-job training experience for career awareness and exploration. WBL placements are the culmination of the Career-Related Education experience. To participate, students must be in grades 11 or 12 and have a defined Career Pathway, ensuring their job placement aligns with completed or concurrent pathway courses. The Work-Based Programs Teacher-Coordinator visits mentors to assess performance and supervises job search skill development. Students maintain a weekly journal, track hours worked, and complete program participation forms. LUNCH PERIODS AND CLASS PERIODS WILL NOT BE ADJUSTED BASED ON STUDENT APPROVAL FOR INTERNSHIP. STUDENTS ACCEPTED INTO THE PROGRAM ARE EXPECTED TO MEET REQUIREMENTS FOR THE SCHOOL YEAR. STUDENTS ARE ENROLLED IN THE COURSE FOR THE ENTIRE SCHOOL YEAR. MID-YEAR SCHEDULE CHANGE REQUESTS CANNOT BE HONORED. Must submit application form by Spring Deadline. ROTC			
JROTC NAVY I, II, III (Cadets are transported to Lassiter H.S.)	Naval Science I introduces students to the Navy JROTC Program, emphasizing leadership, citizenship, patriotism and a disciplined lifestyle. Students participate in academics, close order drill, and physical fitness. The curriculum includes Navy JROTC organization and regulations, introduction to leadership, our nation and its people, sea power and maritime geography, oceanography, naval history, health and first aid. Additionally, students can advance in the Navy JROTC promotion system based on individual merit accomplishments and participation. Normally, first year students achieve the rate of Seamen during their first year. Students can continue to levels II & III. Annual Dues associated with this course. Beginning with the Class of 2021, students who complete 3 full credits/units in JROTC I-III, will meet the Health and Personal Fitness graduation requirements.	JROTC NAVY I – None JROTC NAVY II - JROTC NAVY I JROTC NAVY III - JROTC NAVY II	9-12
JROTC NAVY IV (Cadets are transported to Lassiter H.S.)	Naval Science IV begins and ends with advanced leadership techniques to include applying leadership traits and principles. Students continue to develop their close order applying leadership traits and principles. Students continue to develop their close order drill ability and physical fitness and are expected to develop their instructional abilities in these areas. In addition to learning how to apply leadership techniques, Naval Science IV students are leaders within the Navy JROTC unit. Most are billet holders, meaning they are assigned jobs and responsibilities that they perform under the tutelage of the Naval Science Instructor and	JROTC NAVY I JROTC NAVY II JROTC NAVY III	11-12

	Associate Naval Science Instructor. Normally students have advanced through the promotion system achieving the rate of Chief Petty Officer, Ensign Lieutenant Junior Grade, Lieutenant, or Lieutenant Commander. <i>Annual Dues associated with this course.</i>		
PHYSICAL EDUCATION			
PERSONAL FITNESS (one Semester) *This course is required for graduation	This course is designed to help students understand why exercise and fitness are important in developing a healthy and active lifestyle. The course is designed to support the development of a higher state of wellness and understanding of fitness strategies. Students will be able to develop a personal workout plan that will serve as the foundation for good overall health. Students spend classroom time learning knowledge and application concepts in cardiorespiratory endurance, muscle strength and endurance, skill and health related fitness and nutrition. An emphasis is placed on the decision-making process and preventive fitness concepts.	None	10-12
