

the **STEAM** club

Robotek **After School Enrichment Classes**

Students will:

Build robotic models featuring working motors and sensors!

Program their models!

Learn new technologies!

A new fun and exciting experiment each week!

See how robotic technologies works in the real world!

Students will be grouped based on grade level
and experience.

We have multiple levels of projects including,
Snap Circuitry, drone tech, LEGO WeDo and
working through WeDo 2.0, NXT and EV3.

Students progress through the levels each time
they return to the program.

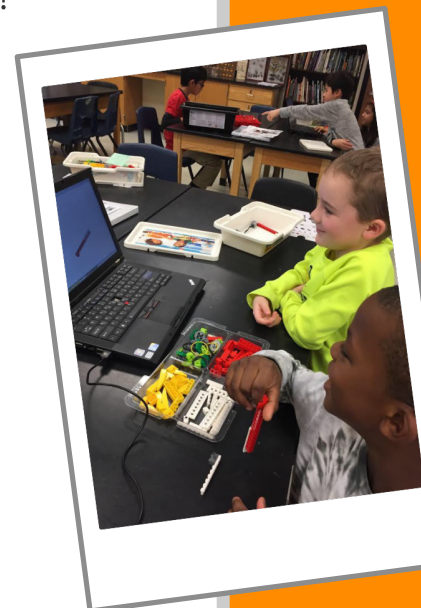

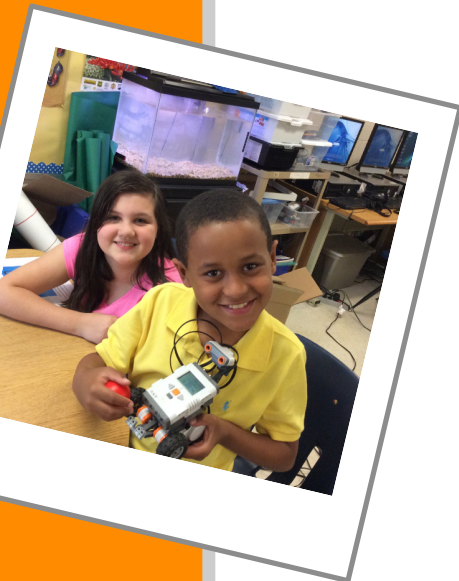

Register Now! Spaces are limited!

Hands on, experiment based party

Multiple fun and exciting science themes to choose from

Rockets | Slime | Chemical Reactions and more

School Break Camps

**Full STEAM ahead! These combo camps will feature exciting
Science, Technology, Engineering, Art, and Math activities to
spark the imaginations of our campers.**

Start planning now for the upcoming school year!

Multiple locations to choose from.

Visit our website for complete details.

Summer Camps

Make sure to participate in our Awesome Summer Camp program!

**Fine Arts Camps, Science & Technology Camps including
robotics, Music Camps, and Combo Themed Camps. With all
of these great offerings in the same location, you can find the
perfect theme for every camper! Camp curriculum is age
appropriate with hands on projects and experiments
designed to keep your camper active and learning all
summer long. Several convenient locations and several
weeks of camp in June and July.**
